

Some People

Buy advertising space because rates are low—generally the circulation is a slight lower. Circulation determines the value of advertising; there is no other standard. The Gazette is willing to abide by it.

Heppner Gazette.

CIRCULATION MAKES

The Paper. Without it advertisers get nothing for their money. The Gazette, with one exception, has the largest circulation of any paper in Eastern Oregon. Therefore it ranks high as an advertising medium.

TENTH YEAR

HEPPNER, MORROW COUNTY, OREGON, FRIDAY, JULY 29, 1892.

NO. 511.

SEMI-WEEKLY GAZETTE.

Tuesdays and Fridays THE PATTERSON PUBLISHING COMPANY.

ALVA H. PATTERSON, Manager. OTIS PATTERSON, Editor.

Half Mo. bound, gilt side and back stamps, marbled edges, \$2.50. Full Sheep bound, leather label, marbled edges, \$2.00.

Free to the Afflicted. All who are suffering from the effects of youthful errors, Loss of Manhood, Falling Powers, Gonorrhoea, Gleet, Stricture, Syphilis and the many troubles which are the effects of these terrible disorders will receive, FREE OF CHARGE, full directions how to treat and cure themselves at home by writing to the CHEAPNESS MEDICAL AND SURGICAL ESTABLISHMENT, 123 1/2 Market Street, San Francisco, California. 465-17.

RHEUMATISM

neuralgia, and sciatica can always be successfully treated with Ayer's Sarsaparilla

A cure is sure to follow the persistent use of this medicine. Has Cured Others will cure you.

Weak, Nervous or in Pain

From some long-standing ailment, or food that your constitution (nervous system) is failing, or that some affliction has taken, or is taking, permanent hold of you, which you have been, and are still, unable to shake off or control, whether in the first or last stage, remember that

Dr. Gregg's ELECTRIC BELTS And Appliances.

and system of home treatment will cure you.

No medical or other medical electric treatment can be compared with them. Thousands of people who suffer from various complaints, particularly those of a nervous nature, and who have been completely and permanently restored to health. No fever men have been cured.

The Gregg Electric Belt and Appliances are the only ones in existence that supply a perfect mode of application.

Winter rye and wheat are frequently the better for a good harrowing in spring. At this season of the year the roller, too, can be used to great advantage on the new meadows, where it is used liberally in the fields.

Great Britain there is an implement in use by all farmers that would prove equally useful here. We refer to the chain harrow, and we would be pleased to learn that some of our enterprising implement makers had put it upon the market.

The best plan is to have plenty of seed and plant as early as the ground will work mellow, and then in about eight days plant another patch, so if the first should fail you have more coming on.

The first crop of sweet corn I ever grew I turned up the ground in the middle of the first time the melons were plowed a furrow was run in the middle between the rows and early Egyptian sugar corn drilled in it six inches apart.

Real Merit. THE S. B. HEADACHE & LIVER CURE.

It works so nicely, cleansing the Liver and Kidneys, acts as a mild purgative without causing pain or sickness, and does not stop you from eating and working.

MISS-OUTS CRAP. Fullerton Bros. Headache & Liver Cure. It works so nicely, cleansing the Liver and Kidneys, acts as a mild purgative without causing pain or sickness, and does not stop you from eating and working.

Phurder's OREGON BLOOD PURIFIER. HEALTH RESTORER. USE IT! IT IS THE IDEAL MEDICINE.

It cures the Liver and Kidneys and Stomach, cleans the blood, restores the appetite, cures the Impure Blood, and makes the Weak Strong.

OREGON BLOOD PURIFIER. PHURDER'S KIDNEY & LIVER REGULATOR. Used everywhere. \$1 a bottle; six for \$5.

FALLEN MEDICINE. It cures the Liver and Kidneys and Stomach, cleans the blood, restores the appetite, cures the Impure Blood, and makes the Weak Strong.

FARM FIELD HARROW AND HARROW AGAIN.

A Liberal Use of the Harrow Advised by the Farmer's Review.

It is not enough to give land the customary single or even double time of the harrow as a preparation and completion of the spring seedling? One can scarcely harrow too much where the labor is cheap and the boys have little else to do.

There are more at the disposal of the enterprising farmer several different sorts of harrows all of which may be used to good advantage. In addition to the old forms of drags and Scotch harrows, we now have those furnished with levers, by means of which the teeth may be made to "take land" or merely tickle the surface.

By means of these implements the soil may be got into the best possible condition for spring seedling, and there is no longer any good excuse for slovenly work. But not only should the harrow be used liberally in the fields seeded to spring grain. They may be employed with great profit upon the pastures where horses and cattle perhaps run all summer and fall and possibly on many days in winter.

Importance of the Hay Crop. The importance of the hay crop to the whole country is hardly to be estimated. For hay of the best quality in all respects, that made from timothy grass stands highest in the public estimation. Consequently this is the variety to cultivate when the highest price that can be obtained from critical buyers is the object aimed at.

Winter rye and wheat are frequently the better for a good harrowing in spring. At this season of the year the roller, too, can be used to great advantage on the new meadows, where it is used liberally in the fields.

MARKET GARDENING.

American Agriculturist Tells How Competition Affects It.

Since the establishment of extensive truck farms in the south, and the great celery fields in Michigan and Ohio, the market gardens of the north have in some respects been injuriously affected by the competition.

There are more at the disposal of the enterprising farmer several different sorts of harrows all of which may be used to good advantage. In addition to the old forms of drags and Scotch harrows, we now have those furnished with levers, by means of which the teeth may be made to "take land" or merely tickle the surface.

By means of these implements the soil may be got into the best possible condition for spring seedling, and there is no longer any good excuse for slovenly work. But not only should the harrow be used liberally in the fields seeded to spring grain. They may be employed with great profit upon the pastures where horses and cattle perhaps run all summer and fall and possibly on many days in winter.

Importance of the Hay Crop. The importance of the hay crop to the whole country is hardly to be estimated. For hay of the best quality in all respects, that made from timothy grass stands highest in the public estimation. Consequently this is the variety to cultivate when the highest price that can be obtained from critical buyers is the object aimed at.

HOW TO MAKE GOOD COFFEE.

A Judicious Mixture of Chicory Frequently Improves the Flavor.

Coffee may be made with equal success either by infusion or by decoction, under pressure, in vacuo or in the open air. There is only one secret, that the coffee should be freshly ground and not burned in the roasting, and it should be a strong infusion or decoction and not largely diluted with water.

There are more at the disposal of the enterprising farmer several different sorts of harrows all of which may be used to good advantage. In addition to the old forms of drags and Scotch harrows, we now have those furnished with levers, by means of which the teeth may be made to "take land" or merely tickle the surface.

FEED FOR A DRIVING HORSE.

The Best Ration for a Horse That Makes Heavy Journeys.

A gentleman in Flagstaff, A. T., writes to The Breeder's Gazette asking information on the above subject, and Professor W. A. Henry, of the Wisconsin agricultural experiment station, replies. We give below both question and answer.

There are more at the disposal of the enterprising farmer several different sorts of harrows all of which may be used to good advantage. In addition to the old forms of drags and Scotch harrows, we now have those furnished with levers, by means of which the teeth may be made to "take land" or merely tickle the surface.

By means of these implements the soil may be got into the best possible condition for spring seedling, and there is no longer any good excuse for slovenly work. But not only should the harrow be used liberally in the fields seeded to spring grain. They may be employed with great profit upon the pastures where horses and cattle perhaps run all summer and fall and possibly on many days in winter.
