

Give your business to Heppner people and therefore assist to build up Heppner. Patronize those who patronize you.

WATER PROPOSITION CARRIED.

The Gates proposition, contrary to the expectations of nearly every resident of Heppner, was carried by a vote of 69 to 34. This was a close shave on a two-thirds majority, which is required by our charter, where bonding the town is desired. Just one vote taken from the victors would have defeated them. It is an evident fact that many voted for the proposition who were not contented that way, but this shows one of the virtues of the Australian ballot system—a man is free to do as he pleases without outside dictation.

Everyone knows how the Gazette shop stood on the Gates proposition. Under the present management it has always been on the side of water, and it looked upon the Gates plan as the best ever offered, considering the town's lack of money, by which it might have been constructed and operated a plant without anyone's help. But this was impossible, and there was nothing left but to take the next best thing. There were cheaper propositions talked of, but as they had never been presented to the council, that body had nothing left but to proceed with what was before them. It has carried, and it shall be the disappointment of this paper's existence, if it is not successful in every particular. We firmly believe that it will prove even more beneficial than the most sanguine of its adherents have claimed. In the main the town has voted independently in this matter, and we sincerely hope that friends and neighbors who differed on this question, will be friends still. Now that it is over there should be no animosities; the Gazette feels none, that is one thing sure. And while it has been vindicated in its course, has for often that it has been accused of everything in the line of crooked dealing in connection with this water movement. It is a thing of the past. The Gazette believes it is in the right; unselfishly so, if at all. So here we rest, believing that if the votes were cast again there would be but few dissenting ones.

THE CORRECT COLUMBUS DAY.

The recent action of congress changing the date for the national public school celebration from October 12th to October 21st is a step in the direction of scholarly accuracy, and it is remarkable that it should have been so long overlooked.

If there is to be a national observance of the 400th anniversary of the discovery of America it should take place on the date which marks the true centenary point. It is obviously stupid to await the recurrence of a date which by reason of arbitrary changes in the methods of reckoning time has lost its significance and does not indicate the true cycle of years.

Every American knows that Columbus discovered this hemisphere on October 12, 1492, and at first thought October 12, 1892, would seem to mark the 400 anniversary of that event. But it will be remembered that time was then calculated upon a different basis than is now in vogue. For many centuries the Julian calendar was the accepted authority for all calculations, although its inaccuracy was not unknown. In 1582 a reformation took place. The Gregorian calendar was then introduced in Europe, and this calendar is now used by all civilized nations, with the exception of Russia, which still adheres to the Julian method of computing time. When this reformation occurred it was found necessary to drop ten days from the calendar, and October 4, 1582, became October 15, 1582. These dropped days were the accumulations of many centuries of erroneous reckoning. The Julian calendar assumed that a year contained 365 1/4 days, and as this was 11 minutes and 14 seconds too long the error amounted to 3 days every 400 years. The Gregorian calendar corrected this defect by making every centennial year a common year unless divisible by 400, whereas by the Julian calendar every year (centennial year included) divisible by 4 was a leap year. Thus by the new style of computation the years 1600, and 1700 and 1800 were not leap years.

As previously stated the reformation took place in 1582, and ten days were suppressed. But as the discovery of America was previous to the year 1500, which by the Gregorian calendar was common, there are but 9 days to omit. Consequently on October 21, 1892, the sun will occupy the same relative position to the earth as on the 12th of October, 1492, when for the first time Columbus beheld these shores.

For these reasons, together with the fact that every precedent is in favor of adopting the "new style" of reckoning, we favor the change.

The Gregorian calendar was not introduced into Great Britain until 1752, and it is to be regretted that the change up to that time. Consequently it has been necessary to correct the dates of our American anniversaries which commemorate events previous to 1751. Washington was born Feb. 11th, but by the "new style" his birthday falls on the 22nd, and that is the day we celebrate. The anniversary of Forefather's Day and of the founding of the city of Boston are both observed on the corrected date. It is unfortunate that the act of congress of April 25, 1890, naming Oct. 12th, 1892, as the date for the dedication of the World's Fair grounds has not been amended by a change of date to October 21st. The fair will practically be a year late, and the dedicatory exercises should take place on the true anniversary, which is October 21. Congress has already shown its good sense by placing the popular and general celebration of which the public schools are to be the centers on the correct date. It only remains for congress to extricate the nation from the ceremonial predicament of a two-headed celebration of Discovery Day by changing the Chicago date to correspond with the corrected date it has already set for the popular public school celebrations.

This way to prevent violations of the same law is to enact a sensible law.

The Morning Enquirer, the farmers' favorite paper at Baker City, has ceased publication owing to lack of patronage. It is reported that the corps of topographical engineers looking for the most feasible route for an extension of the Oregon and Washington railroad from Pendleton to a junction with the Oregon Pacific road have reached Steen mountains and have been very successful in finding easy grades.

SENATOR VOORHEES declared in the senate of the United States that he wishes that Carnegie had been at the head of the Pinkertons who were shot down at Homestead, and a Russian nihilist put that sentiment into execution by assassinating Carnegie's manager. Mr. Voorhees ought to feel gratified over his influence with the lawless elements, and old Hoover himself should be proud of such a representative man.

The gold brick swindlers have found another victim in the person of Micojan Cross, a wealthy farmer living near Dayton, Washington. He paid \$5000 for two "gold bricks" which proved afterwards chunks of copper covered with a coating of gold. Look upon the victim of the gold brick swindler, and you see the man who has his house covered with lightning rods, signs a contract, which afterwards proves to be a promissory note, and last but not least never has time to read the newspaper.

In connection with the examination of Wilson, the murderer's brain, it is interesting to note that it ranks in weight among the brains of the distinguished men of the world. The French naturalist, Cuvier's brain weighed 64.5 oz., Wilson's, 61 oz., Edward Henry Knight's, 64 oz.; Abercrombie's, 63 oz.; Schiller's, 63 oz.; Daniel Webster's, 53.5 oz.; Lord Campbell's, 53.5 oz.; Agassiz's, 53.4 oz.; Napoleon's, 53 oz.; De Morgan's, 52.7 oz. So it will be seen that there is but one superior and one equal in weight, and many of those that are much less in weight than Wilson's.

That portion of the Starr block occupied by Whittier, Fuller & Co., on Front and Pine streets, Portland, was partially destroyed by fire last Monday night. The loss will probably reach \$300,000. The cause of the fire is shrouded in mystery. There was no one in the building at the time, and spontaneous combustion is the only tenable theory as to its origin. It is not believed that the fire was started by incendiaries, from the fact that it broke out on the third floor. There was an explosion almost immediately after the first blaze was seen, and several more explosions occurred soon after. This block was owned by Messrs. D. P. Thompson, J. N. Dolph and C. A. Dolph, and from what could be learned, was but lightly insured, though the two firms who were the heaviest losers were fully insured.

A whole lot of us are inclined to grumble at Agent Hart for carelessness here and there, and though he is the agent of the company, he cannot help matters beyond his reach. All acknowledge that Mr. Hart is a very accommodating agent, and no better could be gotten at Heppner station. But the Lord knows that the telegraph service into Heppner could be helped materially. It is slow and entirely inadequate for the demands of Heppner. It is only at certain times that a message can be sent down through the Willows, and of Sundays there is practically no opportunity at all to reach the outside world. In fact the old Heppner Castle Rock line was, six years ago, a better line than the one running into Heppner now. The corporation having charge of the service should attend to this. The earning power of the line here can never be increased so long as it continues as it is.

Know more about yourself. Every day the readers of our newspapers are regaled with cases where, by the least knowledge of anatomy, physiology and hygiene, lives would be saved. For instance, a few days ago a Crook county sheepherder severed an artery in his foot, and had he knitted a handkerchief, and with a short stick or even the handle of a pocket-knife, brought the knot tightly down on the flesh of the extremity between the heart and the wound, his life would have been saved. Instead he was ignorant of the simplest idea of the circulation, or the mode of stopping the flow of blood from a severed artery, and he paid the penalty. Have your children know more of the human body, God's grandest specimen of handiwork and they will in after years, bless your name for it. Every common school has a short course of anatomy, physiology and hygiene, and the student should not pass it over.

TAKES EXCEPTION.

Mr. Otis Patterson: In the issue of the 26th you speak of my having political views of my own, just as if I had to have a separate card to camp them in. Now Pat, if you will give space in the Gazette, I will let you have some of them, and you will find that seven out of ten of the men of this county will agree to them. I will advance the planks I believe in, and any one is welcome to convert me from the error of my ways. And I would like your readers to stand up and be counted, and if they decide I am in the wrong, to spit it out. We fellows over this way are not being some of J. D.'s farmers and laborers, and if we are in error, some of your politician lawyers, doctors, or other professional men, ought to be able to convince us and bring us back in the folds of the g. o. p.'s. This is the first bone for you to pick: That the state should furnish all text books at cost, utilizing convict labor for that purpose. Then take the meat off of this: We demand that all officers shall be elected by a direct vote of the people. Let every man sign his name to his article. HEMAS CALDWELL. Editor Mills, Or., Aug. 1, '92.

MORE REGARDING THE D. O. P.'S.

Ed. Gazette: I regret that you failed to follow every verbatim of my article entitled "Don't Like the D. O. P.'s," yet I must confess that you far exceeded my expectations. I certainly have much hope that ere many moons have come and gone you will embrace the evangelical gospel of political Christianity, and that you will no longer follow the dictates of that clique of corruption of which you so repeatedly have been warned. That clique of corruption which as for the last past thirty years made our temple of Liberty a den of thieves, and robbed the poor to enrich the rich. It says money is king and "the public be damned." It has caused the Goddess of Liberty to weep over the ruins of a once glorious republic. But, Brother Patterson, brave men and women with hearts of steel are coming to the rescue, the voice of God is heard, its echoes are heard from ocean to ocean, the spirit of liberty is being fanned into a flame. The fires of the revolution are being kindled. The people are uniting, hope is in every eye, and look! The Goddess of Liberty smiles. Man is free, God is avenged.

Yours truly, D. W. BAYANT.

A. Andrews, the general postmaster of Alpine, was in the city yesterday.
