# DEAFNESS CURED!

WONDERFUL BUT TRUE!

ELECTRO-MEDICAL SCIENCE STILL TRIUMPHANT!

The Deaf Made to Hear by Electricity!

Invented in April, 1891, Patented in June, yet thousands Proclaim its Wonderful and Perfect Results!

THE ONLY SUCCESSFUL TREATMENT IN THE WORLD!

Any one, old or young, whose ear drum is unbroken can be made to hear and converse in ordinary tones, and be cured by Dr. G. F. Webb's Electrical Apparatus for Treating Deafness. An Electro-Medical Body Battery with appliances invented especially for treating Deafness and the diseases which produced it.

Send 10 cents for my Electro-Medical Theory and Practice, describing treatment. 72 pages. Address

## THE SUMMER BOARDER.

**The Airs She Assumes on the Boarding House Table.**

The summer boarder is abroad in all her glory. One uses "her" advisedly for somehow the male adult rarely poses as the summer boarder. He stands it over Sunday, perhaps, but a consecutive fortnight of traditional summer boarding house life would, as he tells his neighbor in the smoking car as they are being whirled from the city on Saturday, put him in Bloomingdale at the end of it—and his neighbor agree with him. So the summer boarder has come to be a noun of the feminine gender. The genus is the same, the species is several.

Perhaps, says the New York Times the most interesting as a study is the woman of forty or thereabout, who, as housekeeper all the rest of the year, becomes for six or eight weeks in the summer a boarder. At home she is a simple, more or less practical woman in her new environment she becomes quite a different being. She finds herself on her arrival invested with the transient halo of the last-comer, and she feels that to this circle of strangers she may present whatever personality she desires. So she takes on a few little mannerisms and affectations which she has some time admired in another woman. She does not usually say "calmt" or "either," she says both now. She wears her best wrapper to breakfast and puts up her hair every morning in the way she puts it only every afternoon at home. The children have always called her "mar" she teaches them to say "maumma" here, and they do when they think of it. They, like herself, enjoy the importance of good clothes all day, and try to distinctively, at first at least, to live up to it.

Meantime, their mother gets acquainted with the plazza ladies, reads their books, admires their fancy work, imitates some of it, perhaps, learns all they know of one another, talks glibly to them of her home and surroundings.

It remembers every time to speak of her one servant as a "maid," to call the sitting-room, with the children's school books and the encyclopedia in it, the library, and to expand the somewhat scrubby yard about the house into a lawn.

And she has a beautiful time, unless, as occasionally happens, somebody from her town—somebody who knows all about her—arrives. Then she is crushed. It is not that she has actually aid or acted anything alarmingly untrue. In point of fact, she has imposed upon nobody. Rather has she imposed upon herself. Her own exaggerated height, the pedestal upon which fancy has placed herself in the eyes of others has also fallen. And if the newcomer announces a stay of any length, our heroine, if possible, makes a change of mode. She packs her trunk, finding a brief consolation in the distraction of coming departure, and with her children makes her exit. Dreams—on account of her stage—till the season is done—be the role of summer boarder.

**Horses in War.**

The people of Thessaly were the first to break horses for service in war, and their proficiency as equestrians probably first gave rise to the ancient myth that their country was originally inhabited by centaurs, fabulous creatures supposed to be half horse and half man.

**A New Sort of Carillon Bells.**

The "Cedonophone," invented by M Lacape, and now employed in place of a carillon bell at the Parisian Opera seems to consist of the hollow musical tubes which have for some time past been in use in this country, but which in Paris are now played by means of a keyboard and hammer mechanism. The result is said to be thoroughly satisfactory.

# FARM AND GARDEN

## MANURES FOR THE GARDEN.

**Nitrates, Wood Ashes and Other Specific Fertilizers Employed by Gardeners.**

No other single manurial element gives to the gardener the opportunities and possibilities that he finds in nitrates, especially in the form of nitrate of soda, says Greiner, in his "How to Make the Garden Pay." The effects of this salt on many garden crops is remarkable and can generally be observed within a few days after its application in the darker foliage and thrifty growth. It is readily soluble and its nitrogen is in right form for immediate absorption by the roots of plants. The natural process of converting unavailable nitrogenous matter into soluble nitrates is very slow in early spring. In nitrates we have just the element of plant food needed, and by applying it in small quantities, as fast as the plants can utilize it, we can stimulate thrifty growth of foliage at a small cost.

Nitrate of soda contains about 16 or 17 per cent. of nitrogen, but this in a most soluble form, so that it would not be safe to use it in large quantities at a time, for what is not at once converted into plant structure will gradually sink through the soil and be lost. The most economical method is the application of not over 100 pounds to 150 pounds per acre, repeated at intervals of about two weeks. If lumpy, pound fine before applying it. Scatter it over the ground when the foliage of plants is dry, as it is apt to scorch the leaves otherwise, or still better, apply just before or during a rain, when it will be dissolved and carried into the soil at once. Sprinkling over the land in solution is a safe but generally less convenient mode of application.

Sulphate of ammonia is slower, but more lasting in its effects, and it can be applied in larger quantities or in single

SPINACH FED WITH NITRATES, ETC.—AS USUALLY GROWN.

applications without fear of loss. It may take the place of nitrate of soda during the warmer part of the season with gratifying results, and in combination with that salt at any time, the latter for immediate effect, the former as a more gradual source of supply. The price of sulphate of ammonia is a trifle higher than that of nitrate of soda. Hen manure, which is especially rich in nitrogen, Greiner composts with loam, muck, leaves, etc., and applies after plowing broadcast, and stirs into the surface soil by means of harrow, cultivator and rake. In the cut is shown spinach grown on ground manured with one ton per acre of high grade complete fertilizer and a good topdressing of composted hen manure, with frequent but very light applications of nitrate of soda, also spinach, fed in the usual way with stable compost.

In cotton seed meal we have another nitrogenous manure of special value for the market gardener, but as yet very little appreciated. A ton contains about 140 pounds of nitrogen, 60 pounds of phosphoric acid, and 40 pounds of potash. When mixed and composted with stable manure it increases the comparative amount of nitrogen of the latter, and therefore its effectiveness. Gardeners who keep stock should feed cotton seed meal. It then gives double return, namely, in increase of flesh and improvement of manure. Where nitrate of soda, on account of distance from source of supply and consequent high cost, cannot be used advantageously, cotton seed meal can often be had at a comparatively low price, and should then be used in place of the nitrogen compounds.

Potash in any special form is hardly ever needed for the crops on common garden land, since stable compost and the average high grade complete fertilizer supply an abundance, and often an excess of it, to the crops already. A different thing it is with peaty and mucky soils. These have already an abundance of the nitrogenous element, although mostly in fixed combinations, and hence in an unavailable form. On the other hand the mineral elements are scantily supplied. Stable manure would add a comparatively large amount of nitrogen at great expense to the already vast store, and but small quantities of phosphoric acid and potash. Such lands, for that reason, can be made productive in the cheapest and quickest way by applications of the form of a plain superphosphate or bonemeal in combination with wood ashes.

**Concerning Silos.**

It has been demonstrated over and over again, says Hoard's Dairyman: First—That there has been no way yet discovered whereby any man, be he rich or poor, can harvest, shelter and keep from waste fodder for cows, whether few or many, so cheaply, expeditiously and certainly as by storing same in a silo. While the preponderance of testimony is decidedly in favor of cutting the corn or clover or whatever may be put in the silo, it is nevertheless true that not a few farmers prefer to put it in whole. In the latter case it will be unnecessary to buy or hire a cutter and power to run it, and this item of expense may be deferred. Second—One acre of corn will yield more and better feed when put in silo than two acres of meadow or three acres of pasture. Third—Good, sweet silage, in quantities from forty to sixty pounds per day, may be fed to any healthy cow without injuring her milk for any purpose whatever. Fourth—The poor man, of all others, is the one who cannot afford to do without a silo.

**Glue Coated Grapes.**

East they spray grapes with the Bordeaux mixture—a kind of whitewash stuff. One farmer found it did not stick to the fruit well so he added glue and glued it on so finely that no one would buy his grapes.

Note the growing demand for good bacon. Rangy breeds, with tender, lean, juicy meat, will fill the bill.

A horse has a small stomach and active digestion. The food therefore should be of the highest nutritive quality, with as little waste matter as may be.

The milk value of shade trees in pastures is conceded by all progressive dairymen.

## NEW DEAS.

**Varieties Tried Last Season and Reported Upon by The Rural New Yorker.**

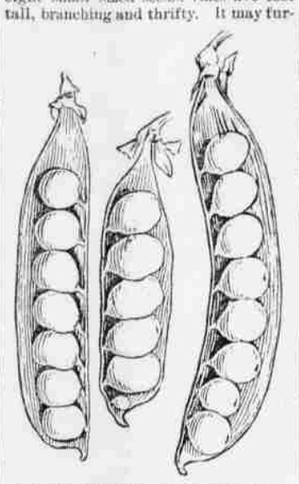
The varieties tested were Shropshire Hero, Heroine, Mayor, Admiral, New Dwarf Prolific and Nott's Excelsior. All were planted April 1. Following are notes made concerning them:

Shropshire Hero—Vines 2½ by 3 feet; vigorous like those of Stratagem; large leaves; extra large pods; about eight large seeds to the pod. Prolific, intermediate.

Heroine—Vines not quite so tall as Shropshire Hero; same foliage; matures same time; pods as large; better filled; seeds large; equally prolific. It is of the Stratagem order.

Mayor—Vines 2½ feet; ripens after Heroine and Shropshire Hero two or three days; pods medium sized, not well filled.

Admiral—It may be said for this that it bears for a long time, the later pods being exceptionally well filled, so that the pod is crowded as the catalogue illustrations are often made to appear; the pods, though under size, often hold eight small sized seeds; vines five feet tall, branching and thrifty. It may further be said that the pods are all uniform in shape and size. The variety seems to be thoroughly fixed and carefully selected.



SHROPSHIRE HERO—MAYOR—HEROINE.

New Dwarf Prolific is a smooth late dwarf pea. Vines very bushy and branching eighteen inches tall. It was at its fullest bearing July 19. Vines full of peas, pods medium to small, generally well filled, about six to a pod. Seeds vary from small to medium, and large. Vines uniform as to size—no rogues. The most prolific dwarf we have seen. For a second planting or fall pea it may prove valuable.

Nott's Excelsior is reported as the best of the early dwarf wrinkled peas. Vines eighteen inches, more productive than Wonder or Little Gem. As early as Alaska or very nearly. Pods fair size, averaging six seeds of fair size.

To give measureable values to the trials of new peas it is of course necessary to cultivate standard varieties under the same conditions for comparison. No attempt of this kind was made last summer, but it is stated, as a matter of judgment, that the preference is given to Heroine and Shropshire Hero over any similar intermediate wrinkled pea previously tried, while Mayor, for a somewhat later pea, is worthy of trial.

**To Rid Poultry of Lice.**

Kerosene ointment is often recommended in the poultry journals as a remedy for lice. As many readers do not know just what kerosene ointment is, we give the following abstract from a report of the Michigan state board of agriculture:

Kerosene ointment may be made by simply mixing kerosene and lard or, better, kerosene and sulphur. This ointment is excellent to rid poultry of lice. It should be kept in a closed can in a poultry house, and in the summer the roost poles should often be rubbed with the ointment. An old rubber or leather glove makes this an easy and not unpleasant task. After the poultry are on the roosts some of this ointment should be placed under the wings, about the breast and legs, once in four or five weeks in the late summer. If, in addition to this, you frequently spray the house and yard when the fowls are out with diluted crude carbolic acid, and whitewash the house once a year, you will not only have a neat house but healthy birds, if the other requisites are provided. Chickens ought to be a very profitable adjunct to every farm and will be if the above suggestions are carried out and the birds well housed and fed.

**Things Said and Done.**

The general drift of opinion lately expressed appears to be that the practice of harrowing corn, both before and after it is up, is increasing in popularity.

Professor Roberts commends the plan of using land plaster in stables instead of spreading it directly on the clover. The plaster is just as effective in the clover field, and it has arrested much that would otherwise have been lost in the stable manure.

A company has been organized in New Jersey for making cranberries into jam and canning them.

"Society of the Friends of Trees" is the name of an organization in France, its object being the restoration of the forests.

The New England Homestead suggests that animals awarded first premiums at our agricultural fairs should be placed on a platform, and judges made to give their reasons for such action to the public. This is what ex-Governor Hoard, of Wisconsin, advocated at some of the Farmers' institutes last winter.

A hop picking machine has been invented in Australia.

The largest ranch devoted to blooded horses is said to be at Greeley, Colo., where there is a grass range of over 8,000 acres.

A New York World correspondent says: It is the practice among many good farmers to change the seed of oats, wheat and other small grains, as it is found that grain which has been raised and sowed on the same land year after year has less vitality in it to produce a generous crop than seed procured from another locality, even if the change has been only the distance of a few miles. Usually if a change of any distance is made it is better to bring the seed grain from the north of the location where it is to be used. Seeds from the south carried further north do not mature as well as though raised in the same or a northern latitude. The same rule applies to corn and fruit trees.

**A Plain Inference.**

Dallas—I hear that you proposed to Miss Testy last night and got a refusal?

Gallows—Well as to that, she didn't bluntly refuse me; she wouldn't wound my feelings by doing that, yet the inference of her remark was plain enough.

Dallas—What reply did she make to your proposal?

Gallows—She said if I was the last man on earth she might consider it.—Boston Courier.

**That Monument Fund.**

Well Dressed Gentleman (to ticket seller at elevated station) In making change, will you be kind enough to give me five copper cents instead of the nickel?

Ticket Seller (loyally) Here's another wealthy New Yorker going to contribute to the Grant monument. The best for the contributions is right over there, sir.—Texas Siftings.

**Science to the Rescue.**

Housekeeper Has any way been discovered to kill the pests that destroy carpets?

Great Scientist Yes madam. Take up the carpets, hang them on a line and beat them with a heavy stick.

"Will that kill the insects?"

"Yes, madam, if you hit them."—N. Y. Weekly.

**Too Unanimous.**

Husband—Your jealousy of that woman is wholly unreasonable. I haven't seen her for a month.

Wife—I happen to know that you write to her every day, though.

Husband (tonight)—I'm merely declining her invitations.—Judge

**Anything But That.**

He (savagely)—Marry me!

She—If I refuse you will marry that widow?

He—I will.

She (coolly)—Then I'll marry you.—Truth.

**Good Reason.**

She—That odious Mrs. Newritch seems to think more of her dog than of boy.

He—Oh, well, the dog has a pedigree.—Life.

**Getting Better.**

"How is your wife getting on?"

"She's improving slowly. She is not well enough to attend to her household duties yet, but yesterday she was out shopping."—Puck.

**THE FLIGHT AT MIDNIGHT.**

Augustus Fitzgibbons Moran,
Fled to save with arms Ann'ella
With a vow and a whoop
He cleared the front stoop
Just ahead of her papa's shotgun.
—Brooklyn Life.

**Always the Way.**

"That was a great eulogy of the marriage institution that Hinkley made in his after-dinner speech last evening, wasn't it?"

"Yes. What a lovely domestic life he must have."

"Not much. Hinkley's a sworn bachelor."—Chicago News.

**Time to Leave.**

Mrs. Witherby—How long did Mr. Bangle stay the night that I wasn't at home?

Witherby—Until half past ten.

Mrs. Witherby—Half past ten! Why didn't he stay longer?

Witherby—Because I held four aces.—Life.

**Had Had All She Wanted.**

Mr. Smith (to Mrs. Farrem, who has been telling him about her new house)—I suppose you will have dumb waiters in the house?

Mrs. F—No, I shan't! I had a deaf cook once, and I vowed then never to have another crippled servant.—Jury.

**Expiated.**

Mrs. Henpec (plaintively)—I don't see why a big dog like that should be afraid of a little girl like you.

Little Girl—We've been together so long, I guess he thinks I'm his wife.—Good News.

**Quite the Contrary.**

Terwilliger—Miss Playne doesn't like you, old fellow. She says you're a conceited popinjay.

Jenkinson—The reason Miss Playne doesn't like me is because I am not a peppin jay.—Chicago Tribune.

**No Suicide Allowed.**

"I wish you would get me a couple of packets of cigarettes," said the condemned murderer to the jail warden.

"Can't do it," replied the officer. "The law must be allowed to take its course."—Brooklyn Life.

**Impossible.**

Cudlip—I wish the man on the corner who grinds that beastly hand-organ would take up his quarters elsewhere.

Sapley—He can't, poor fellow. He takes up only nickels and pennies.—Truth.

**The Trunk Got There.**

Mr. Citimann—Where in creation is that furnished cottage I rented for the summer?

Rural Carman—Right over yonder, sir, behind your wife's trunk.—N. Y. Weekly.

**A Hint.**

Ethel—George, you remind me of an hour-glass.

George—In what respect?

Ethel—The more time given you, the less sand you seem to have.—Truth.

"Hardware" did you say? Why, you at P. C Thompson & Co.'s stand, and the place for bargains. a

Why go hungry when the City hotel furnishes you a good meal at living rates. a

SHOEMAKER.—Ed Birbeck, a shoemaker and repairer of many years' experience, has just located in the Abraham brick building, on May street, where he is prepared to do everything in his line. Mr Birbeck is strictly a first-class workman and warrants all work. Give him a call. 14-tf

# CONSTIPATION

and other bowel complaints cured and prevented by the prompt use of

## STRAYED.

Two sorrel horses. One of them branded "8" on the right shoulder, likewise on the right stifle.

The other was branded "8" on the right shoulder, also "R." The weight of each was about 1,050 pounds

Anyone returning the same to my ranch at Eight Mile will receive a reward of $15 sw tf SYLVANUS WRIGHT.

Plenty of flour, bran, mill feed and chop always on hand at the Heppner Flouring Mills. a

## STOCK BRANDS.

While you keep your subscription paid up you can keep your brand in free of charge.

Allen, T. J., Ione, Or. Horses GG on left shoulder; cattle same on left hip, under bit on right ear, and upper bit on the left; range, Morrow county.

Armstrong, J. C., Alpine, Or.—T with bar under on left shoulder of horses; cattle same on left hip.

Allison, O. D., Eight Mile, Or.—Cattle brand, O D on left hip and horses same brand on right shoulder. Range Eight Mile.

Adkins, T. C., Dayville, Or.—Straight mark across the thigh and two crops and a slit in the right ear; horses, J, upside down on the right shoulder. Range in Grant county and Bear valley. P O address also at Dayville.

Adkins, J. J., Heppner, Or.—Horses, JA connected on left shoulder; cattle same on left hip.

Ayers, Johnny, Lena, Or.—Horses branded triangle on left hip; cattle same on right hip; also crop off right ear and upper bit on same.

Blyth, Percy H., Heppner, Or.—Horses Roman cross on right shoulder. Range in Morrow county.

Brockman, Geo., Hardman, Or.—Horses, a flag on left shoulder; cattle same on right shoulder.

Chichester, J. W., Hardman, Or.—Cattle branded B on left hip and chuck; split in each ear.

Brenner, Peter, two sobers, Oregon.—Horses branded P B on left shoulder. Cattle same on right side.

Burke, M St C, Long Creek, Or.—On cattle, MAY connected on left hip, crop off left ear, under half crop off right. Horses, same brand on left shoulder. Range in Grant and Morrow county.

Bowman, A., Mount Vernon and Burns, Or.—Cattle, A B on right hip, two crops in each ear; same on horses, on right shoulder. Range in Grant and Harney counties.

Brosnine, Jerry, Lena, Or.—Horses branded 7 on right shoulder; cattle B on the left side. Left ear half crop and right ear upper slope.

Barton, Wm., Heppner, Or.—Horses, J B on right thigh; cattle same on right hip; split in each ear.

Brown, Ira, Lexington, Or. Horse IB on the right stifle, cattle same on right hip; range, Morrow county.

Brown, J. P., Heppner, Or.—Horses and cattle branded S with ox-yoke above on left shoulder.

Brown, J. C., Heppner, Or.—Horses, circle J with bar over it on left hip; cattle, same.

Brown, W. J., Lena, Oregon.—Horses W bar over it, on the left shoulder. Cattle same on left hip.

Boyer, W. G., Heppner, Or.—Horses, [illegible] brand on [illegible] hip; cattle, same, with split in each ear.

Borg, P. O., Heppner, Or.—Horses, P B on left shoulder; cattle, same on left hip.

Brownlee, W. J., Fox Or.—Cattle, J B connected on left side; crop on left ear and two splits and middle piece cut out on right ear; on horses same brand on the left thigh. Range in Fox valley, Grant county.

Cain, E., Caleb, Or.—Y D on horses on left stifle; U with quarter circle over it, on left shoulder, and on left stifle on all colts under 3 years; on left shoulder only on all horses over 3 years. All range in Grant county.

Clark, Wm. H., Le a, Or.—Horses WH connected, on left shoulder; cattle same on right hip, in Morrow and Umatilla counties.

Cole, Chas. L., Vinson, or Lea a, Or.—Horses 3 C on right shoulder; cattle same on right hip. Range Morrow and Umatilla counties.

Cochran, Chas., Ione, Or.—Horses, RP connected on left shoulder; cattle, C on both left hip and stifle. Range in Morrow county.

Calhoun, J. B., Long Creek, Or.—T on cattle on right side, crop off right ear and under bit on left ear. Our horses same brand on left shoulder. Range in Grant county.

Cecil, Wm., Douglas Or.; h rses J C on left shoulder; on the same on left hip, waddles on each jaw and two bits in the right ear.

Carl, L. H., John Day, Or.—Double crose on each hip on cattle, swallow fork and under bit in right ear, split in left ear. Range in Grant county. On sheep, a vertical A and spear point on shoulder. Ear marked ewes, crop on left ear, pouched upper bit in right. Wethers, crop in right and under half crop in left ear All range in Grant county.

Cook, A. J., Lena, Or.—Horses, 90 on right shoulder. Cattle, same on right hip; ear mark squar crop off left and split in right.

Curtis, R. A., Curtinsville, Or.—Horses, 76 on left stifle.

Cochran, J. H. Monument, Or.—Horses brandes I & A on left shoulder. Cattle, same on right hip, swallow fork in right ear and crop off left.

Cox Ed S., Hardman, Or.—Cattle, C with center; horses, CE on left hip.

Cochran, R. E., Monument, Grant Co., Or.—Horses branded circle with bar beneath, on left shoulder cattle same brand on both hips, mark under slope both ears and dewlap.

Cowin, R., Hardman, Or.—Horses branded on right hip. Cattle branded the same.

Cross, S L., Dayville, Or.—Cattle branded + two crops and a split in left ear; on horses a reversed 2 on left stifle. Also have the following brands on cattle: 72 on left hip, 7 on right hip, 2 on left shoulder, two parallel bars on left shoulder. Ear marks, two crops.

Doonan, Wm., Heppner, Or.—Horses branded 40 with bar over them, on left shoulder; cattle same on left hip.

Douglass, W. M., Gallowy, Or.—Cattle, H P on the side, saw, bow-fork in each ear; horses, H P on left hip.

Douglas, O. T., Douglas, Or.—Horses TD on the left stifle; cattle same on right hip.

Dimock, W. E., John Day, Or.—Quarter circle on right shoulder; both on horses and cattle same Grant county.

Dricken, W. E., Heppner, Or.—Horses branded A inside of O on left shoulder. Cattle same on off side of neck.

Ely, J. B. & Sons, Douglas, Or.—Horses brand A U on left shoulder, cattle same on left hip or right ear.

Elliot, Wash., Heppner, Or. Diamond on [illegible] shoulder.

Creek, Jackson, Heppner, Or.—Horses, H connected on right shoulder; cattle same on left hip. Ear mark, hole in right and crop off left.

Florence, L. A., Heppner, Or.—Cattle, LF on right hip; horses F with bar under on right shoulder.

Florence, S. P. Heppner, Or.—Horses, F on left shoulder; cattle, F on right hip or thigh.

Fox, Henry, Heppner, Or.—On left shoulder.

Gilman-French, Land and Live Stock Co., Fossil, Or.—Horses, circle S on left shoulder; vent, same on left side. Cattle, same on both hips; ear marks, crop off right ear and underbit in left. Range in Gilliam, Grant, Crook and Morrow counties.

Gentry, Elmer, Echo, Or.—Horses branded H, with a quarter circle over it, on left stifle; same on Morrow and Umatilla counties.

Gilbaker, J. J., Prairie City, Or.—On horses, C with bar on left shoulder and stifle; cattle, on right side. Range in Grant county.

Gunn, James, Hardman, Or.—Horses shaded oval on shoulder; circle same on left hip. Range in and about Hardman.

Gaylor, —, Lena, Or. Brand JH connected, on left ear crop on top, and in under.

Gunn, A. B., Baker, Or.—Cattle, reversed quarter circle same as on the right hip, on sheep in Morrow and Umatilla counties.
