A LIGHT SMOOTHING HARROW.

A Progressive Agriculturist Tells in The Ohio Farmer How to Make It.

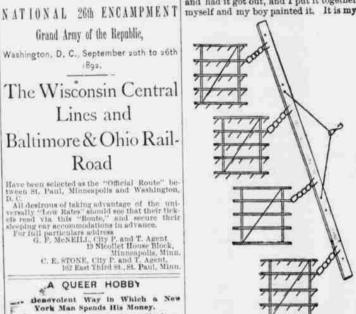

The harrow I had made to suit me for a special purpose (harrowing corn—corn for ensilage being our main fodder crop).

The harrow I had made to suit me for that? I will make two sponge cakes, and put one in one and the other in the other."—Puck. drag I ever saw that I would not like to be without it. It is just as good for Killing weeds in potatoes as in corn.

The field should be harrowed as a corn. The field should be harrowed as soon as two or three days after planting, and surely twice a week until the corn is four to six inches high. Use one horse you air courtin's lady wat was slittle until the corn is up nicely and then use girl wen I was a grown woman.-N. Y two horses, always driving between the rows so as not to trample on corn or

The woodwork of this harrow is all of timid creatures. good, seasoned white oak painted three coats with Venetian red dry mixed in raw oil. The teeth can be made of old sulky hayrake teeth three-eighths of an hammock would break. inch, or get 36-inch square steel and cut in 6-inch lengths and have sharpened, making teeth about seven inches long, and drive down even with top of beams. I will give a bill of the material needed for such a drag: Twenty beams 2x2x4 ft., planed on all sides; 8 crossrails 2x2x3 t., planed on all sides; 1 doubletree 11/2x4x13 ft.; 120 steel teeth 1/2x7 in., round or square; 4 iron braces 14x1x4 ft.; 10 small clevises; 6 ft. 16-inch iron rod for draw rods; 4 chains of 3 or 5 links; 2 chains of 9 links; 40 bolts 5-15x4 in.; 8 bolts 5-16x214 in. I made out a bill of what I wanted

and had it got out, and I put it together

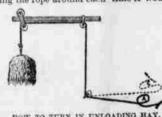

HOMEMADE SMOOTHING HARROW. called, no one can object. A Commercial Advertiser reporter dropped into a furnishing and clothing store on Nassau furnishing and clothing store on Nassau station and no patent, so any on can use it. The teeth are set a little station back and sidewise also. The The teeth are set a little street the other day and saw one of the slanting back and sidewise also. The salesmen busily engaged with a well-sections are hung to doubletree just as dressed, portly old gentleman of benign far apart as rows are. If rows are close expression who held a boy, ragged and unclean, by the hand. A few moments on each other, lengthen chains about later that urchin was taken into a dress- eight or ten inches on Nos. 1 and 3 (see

later that urchin was taken into a dress-ing-room, from which he soon appeared, clad from head to foot in clothes such as he had probably never dared hope to ever possess. Hat and shoes, necktie and handkerchiefs completed the pres-ent to the little fellow, who was also given underwear enough to last six months. The old man and the lad be had befriended disappeared, and the re-imply bent around and not welded, and WE HAVE FOR SALE ALL KINDS OF UN.

We have for sale all kinds of Repparer, at what is known as the stown as t

street arabs. I suppose he comes in An Illinois farmer says that new hay here or goes into some other store down ropes ought to be tied to the hind axle of town two or three times a week with a a wagon and a rail or other heavy object poor boy in tow, who is soon transformed into a decent-looking lad. It's tied to the other end and dragged a mile or two. When placed in the his hobby, and a good one, too, I think. the rope should be untwisted a few turns Don't you? He can afford it, and I beif it offers to kink. Sometimes the lieve the solid enjoyment he gets out of his pet way of getting rid of some of driver of the hoisting horse causes trouble by turning one way all the time, his surplus money is much greater than the pleasure many a rich man finds in crossing and twisting the rope as shown at A in the illustration herewith.

In unloading twenty tons of hay in a day, seven forkfuls to a load, and twisting the rope around each time it would How a Pennsylvania Man Foretells the

prognosticate by his feelings, but by HOW TO TURN IN UNLOADING HAY. me strange markings on his left forereceive 140 twists. If the horse is turned These marks resemble the discharger at the outer end of the rope he of a Leyden jar as much as anything should be turned haw at the inner, as else. There is one mark about two at C.

A Nebraska correspondent of The wide, and from this project two other prairie Farmer, from which the fore-red lines. On the end of each of these going is a reprint, writes: "My way of taking the kink out of a rope is to wrap it is a blue spot. When the indications are for rain these two spots travel under around a tree or stump three or four times and hitch a good span of horses to Have a man pull on the back end of dry weather they separate until they are diametrically opposite. Physicians have the rope enough so that the team will need to draw hard in pulling it over the tree. examined the discolorations, and say that they are only some kind of pig-ment under the skin, and that they are similar in nature to birthmarks. They When the man holding the other end is drawn up to the stump have him and the team change ends and repeat three or four times. This kind of warming cannot explain the traveling proclivities will take the kink out of any rope."

Kerosene Emulsion. Kerosene emulsion, a most useful insecticide, is prepared at the Massachuand they may not be affected, or vice setts station in the following manner. One-quarter of a pound of common bar soap is dissolved in two quarts of boil-The traveling men in California ob-ject to the use of the word "drummer," ing water, and while still hot four quarts of kerosene oil are added and the whole mixture churned through a small sh the term. In olden times, says the hand force pump with a small nozzle san Francisco Merchant, when it was the wont of quacks, fakirs and itinerant must be continued about five minutes, nountebanks to make periodical visits until the whole forms a creamy white country towns on market days, they mass which becomes jellylike when cool. would beat a big drum to call up a Care must be taken to have the solution growd. This was called "drumming for of soaphot when the kerosene is added rade," and it is presumed, and in fact to it and the churning done, but it must renerally accepted that this is the orgin of the offensive name. It is strange Before applying this emulsion to the

plants it should be diluted with water in the proportion of one quart of the emulsion to nine quarts of water, which must be thoroughly mixed. The above will make sixty quarts of the insecticide ready for use, but the emulsion will keep for a long time without injury and may be diluted when needed for use. This insecticide is said to be one of the best substances for the destruction of vermin on domestic animals and in hen-
