The office keeps a watch upon such accidents as are likely to result in damage suits, and as soon as a suit is begun the office sends out an agent to look up the facts in the case and especial ly to examine the scene of the accident The assistant who is to represent the corporation counsel at the trial usually visits the scene of the accident and makes himself thoroughly acquainted with the conditions then prevailing .-New York Sun.

Cultivation of the Gladiolus.

In an address before the Massachusetts Horticutural society, H. B. Watts said: "A new type of gladiolus is a cross be tween Gladiolus saundersoni and the hybrids of Gladiolus gandavensis. It It is called Gladiolus hybridus manceianus. The special claims for it are the large size of the flower, length of spike AGENTS WANTED on salary and comand fine coloring. The cultivation of the many thousands annually. The corporation counsel systematized the work of sed to their growth. A light loam with the office a few years ago and placed a persuas subsoil gives the best results. The land is plowed about six inches deep and furrows made three feet apart. The fertilizer is sprinkled in the furrow and the bulbs planted six inches apart and about four inches deep, two rows to a quaintance with the methods of those furrow. Never plant the gladiolus two lawyers that bring damage suits against years in succession on the same land. One result of specializing the work of frost is out of the ground, until June 10. K. P. Jordan, of Maine, took 112 orders un list They can be placed closer than than six inches if one has but a limited amount of space, but they are easier kept free of weeds if they are at that distance.

throughout the season and drawn up slightly to the plants. Stake them if you wish. If very fine spikes are wanted, liquid manure applied when they have formed their seventh leaf will greatly improve them. When frosty nights begin, the bulbs should be lifted and be dry. The old bulb roots and bulblets making herself heard. What's the man and warrants all work. Give him a lawif matter with Oregon? call call work on the man and warrants all work. Give him a lawif making herself heard. What's the man and warrants all work. Give him a lawif miless the justice of the plaintiff's case is during the winter."

Powdery Mildew.

Professor Beach, of the New York experiment station, says that the first indication of the powdery mildew which attacks the apple, peach and plum seedlings is the appearance of cobweb spots on the leaves in spring. These spread tailing strength. Vigor, no less the source of happiness than the condition of large line, can be created and perpetuated where it does not exist. Thousands who have experienced or are cognizant—including many physicians of emi importance to get into the newspapers on the leaves applications of the ammoniacal solution. of copper carbonate at intervals of about twelve days, the first to be made when the leaves are about half developed. Both upper and under surfaces should be thoroughly sprayed. The cost, aside from the labor expended in making the applications, is about ten cents per 1,000

Capons.

It there were more small sized but well fattened capons sent to the market people would buy them. Not every one cares to buy a bird of ten or twelve pounds weight. And it is said that the few capons that are raised in New Eng land are usually smaller than the Phila delphia capons, being more frequently made from the smaller breeds. After they are caponized, it costs no more to grow or fatten than any other fowl, but they sell at higher prices, because the market is not well supplied with them -American Cultivator.

The Vermont maple sugar crop is a failure this year.
