# SPEAR HEAD TAGS.

<ul> <li>1,155 STEM WINDING ELGIN COLD WATCHES</li></ul>
23,100 IMPORTED GERMAN BUCKHORN HANDLE, FOUR BLADED POCKET KNIVES
115,500 ROLLED GOLD WATCH CHARM ROTARY TELESCOPE TOOTH
115,500 LARGE PICTURES (14x28 inches) IN ELEVEN COLORS, for framing, no advertising on them. 28,875 66
261,030 PRIZES, AMOUNTING TO \$173,250 00
The above articles will be distributed, by counties, among parties who show SPEAR HEAD Plug Tobacco, and return to us the TIN TAGS taken therefrom. We will distribute 226 of these prizes in this county as follows:
TAGS from this county we will give
To the FIVE PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each, 1 OPERA GLASS 5 OPERA GLASSES.
To the TWENTY PARTIES mending us the next greatest number of SPEAR HEAD TAGS, we will give to each 1 POCKET
KNIFE
To the ONE HUNDRED PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each 1 LARGE FUTURE IN ELEVEN COLORS
Total Number of Prizes for this County, 226.
CAUTION No Tags will be received before January 1st, 1894, nor after February 1st,

and package containing tags must be marked plainly with Name of Sender, Town, State, and Number of Tags in each package. All charges on packages must be

Couply, State, and Number of Tags in each package. All charges of package in the preparate READ. -SPEAR HEAD possesses more qualities of intrinsic value than any other plug tobacco produced. It is the wrectest, the tonghest, the richest. SPEAR HEAD is basolitely, positively and distinctively different to flavor from any other plug tobacco. A trial will convince the most skeptical of this fact. It is the largest seller of any similar shape and skyle on earth, which proves that it has caught the popular taste and pleases the people. Try it, and participate in the contest for prizes. Fee that a TIN TAG is on every 10 cent pleee of SPEAR HEAD row buy. Send in the tags, no matter how small the quantity. THE F. J. SORG COMPANY, MIDDLETOWS, OHIO.

A list of the people obtaining these prizes in this county will be published in this paper immediately after February 1st, 1994.

With a brick for a pillow "We sleep of the just, with no reference to his room darkened nor does he require

others to be still. The "infant crying in the night" may continue to cry for all he cares, for it does not disturb him. In some regions the entire popula-tion seem to fall asleep, as by a com-mon instinct (like that of the hibernating bear) during the first two hours of summer afternoons, and they do this with regularity, no matter where they may be. At two hours after noon the universe at such seasons is as still as at two hours after midnight. In the case of most working people at least and also in that of many others position in sleep is of no sort of conseuence. It would be easy to raise in China an army of one million-nay, of ten million-tested by competitive examination as to their capacity to go to sleep across three wheelbarrows with head downward like a spider. their mouths wide open and a fly inside. The same freedom from tyranny of nerves is exhibited in the Chinese endurance of physical pain. Those who have any acquaintance with the operations in hospitals in China know ho common or rather universal it is for the patients to bear without flinching degree of pain from which the stoutest of us would shrink in terror.

IN THE HAYFIELDS.

There the Artist Finds Sketches Designed by Mistress Nature. "St. Barnabas, mow the grass," is an are generally ripe for mowing, there is no crop so "tickle," as the Yorkshire must be cut. Hay must fall when the grasses are in flower. Walk into a hayfield in the second week in June, says an English review, and you will see the pollen dropping from the fescue and timothy, and the yellow from the buttercups lodges on your boots. Then the beauty of a good meadow can be seen and understood. The trefoil and yellow suckling are ankle deep, and a little above rises the perennial red clover-the white being not yet in full blossom. The true grasses reach to the knee, the growth becoming less dense as it rises higher, and the crown-

### SEA GULL AS MESSENGER. Chinese from Their Infancy Learn to Ig- News of a Famous Disaster Carried to the

Living by a Gull. It seems to make no particular differ- ! "The news of a famous disaster of. ence to a Chinese how long he remains the great Indian ocean was lately in one position. It seems to me that a few such facts as these would serve to build a narrative upon, and you can easily believe that it would be more interesting than fiction."

DOG TRAINED TO STEAL.

The Latest Curiosity of Crime in the World's Metropolis. This curious account of the depreda-

tion of a felonous dog is from the Lon don Daily Graphic. Frederick Hamp ton, forty-five, described as a fish monger, of London road, Croydon was charged on remand recently before Mr. Biron, at the Lambeth police court with stealing and receiving a lady's silk umbrella, value seven shillings six pence, the property of Louisa Squires. The evidence already given showed that on Saturday the prosecutrix was walking along Kensington park road with an umbrella in her hand. She saw a trap coming along and a dog run-

ning behind. The dbg came toward her, took hold of the umbrella and shook it, and she had to let go. The dog then ran off with the um-

brella in the same direction as the trap. The prisoner, who was driving, was af terward arrested, and upon searching the trap the policeman found seven um-brellas, including the one identified by Miss Squires.

'A second case was gone into. Mrs Henrietta Ray, the wife of Dr. Ray, of East Croydon, stated that at the begin ning of last month she was walking old country saying; but, although St. Barnabas' day falls when the meadows pany with two other ladies. The witare generally ripe for mowing, there is no crop so "tickle," as the Yorkahire farmers say, as the time at which it sunshade and ran after the trap, in which there were two persons That morning she saw the sunshade at the court.

Other victims testified. Eight umbrellas were found at Hampton's lodgings. The prisoner was committed.

He Sang in Court to Convince the Judge of His Ownership.

A very unique and amusing trial de-veloped out of a sult of replevin for a dog, brought by Dr. E. T. Brady against John A. Levi, in Justice Shan-Kansas City Journal.

Both parties claimed the ownership the question of ownership as at first.

Mr. Brady's attorney, however, stated accordingly summoned. The dog immediately jumped from his place in the prisoner's dock and showed with every of Stanley's route when he suffered so demonstration of canine joy his recognition of his mistress. In consideration of the adverse testimony this was still proof of the dog's ownership.

She sinted that if she would sing a dog fashion and voice and sing the song through. This she did and at the first words of the song the dog leaped for the astonishment of the spectators and the court

the dog returned home with Mrs. Brady waters of the lake into Albert Nyanza by order of the conet."

### FLOCKING TO NEW ENGLAND.

French Canadians to the Number of Half tion Now Over the Border.

A quieter immigration movement on a scale so extensive as that of the French Canadians to the United States has never been witnessed. The majority of our citizens have as yet no idea of the extent and results. It is chiefly within the last generation that this "new nation," as it may be styled, has nefselessly oversprend the northeastern states. To-day, according to the New England Magazine, this new population through out the United States numbers considerably over \$00,000. In New England and New York there are more than 500,000; in Massachusetts alone the figures reach 120,000. This is an astounding aggregate for the brief period of their immigration and the extent of the sources of supply. This result far exceeds, proportionately, that to the credit of either Ireland or Germany. According to La Guide Froncaise des Etats Unis (1891), they own real estate to the amount of \$105,528,500, and 10,-696 of the race are doing business for themselves. As we have already seen, this people, chiefly agricultural, backeducation and primitive in habit, numbered 65,000 at the time of theres ssion of Canada to England-1759-

A Party Going to Complete the Study of guminosae, yellow weasel shout, but-Lake Albert Edward,

An exploring party is about to under- strangely beautiful picture of Durer's T. Brady take a very interesting mission in Cen- which we once saw the artist had evitral Africa. The Duc d'Uzes will lead dently painted the section of a hayon's court the other morning, says the the party, and will be accompanied by field. One seemed to be lying on the four white comrades and tifty Sengalese out grass and looking at the wall left both parties claimed the ownership soldners. They are to be taken up too the last state of the dog, and after several witnesses Congo river as far as Stanley Falls on had been examined on either side the one of the steamers of the free state. The white daisies filling the painted, the white daisies filling the soldiers. They are to be taken up the after the last sweep of the scythe, judge was at as great a loss to decide At Stanley Falls they expect to hire top of the canvas. Not only sight but from Tippu Tib and his nephew, Rochid, scent is needed to judge the maturity two hundred and fifty porters, and then of the crop. In a walk through acres that they could prove the claimantship they will plunge into the great forest of "mowing grass" to determine the east of Stanley Falls, with the inten- condition of the blossom, the fragrance the dog for Mrs. Dr. Brady, and she was tion of making their way to Lake Albert Edward.

Their route will lie a good way south clovers, crowsfoot and many hardships in the same great for- the bottom is almost stupefying, and est, on his way to Albert Nyanza. Un- is certain in some cases to bring doubtedly the party will find tribes of Brady agreed to give a last indisputable fore. The most interesting part of their must be cut, no matter how threatenwork, however, will be in the basin ing the weather, and no crop where Lake Albert Edward gathers the completely at the mercy of the skies as certain song the dog. In response to his streams that are among the headwaters does the hay. If the crop be short it training, would join in with her in his of the Nile. This lake is as yet known cannot then be left to grow. The only on its north and east sides. Stans grass must fall while the ley solved the question which so long puzzled geographers, as to whether the joy and fulfilled his part of the duet to lake flowed into Albert Nyanza and spoil as it grows" is a country axiom. a factory has been started for the purwas therefore a Nile tributary, or For the latter is a certain loss, and a pose of making brushes and brooms of whether its waters fed the Congo. He day's bright sun and wind may always No further evidence was taken and found that the Seniliki river carries the dry a fallen crop.

and the Nile, and along the east bank of this little river he discovered the wonderful snow-elad mountain range of which the now famous Ruwenzori is the crowning feature. Blanc. As the workmen who tunneled last year through the snow just below

It is not known as yet, however, how large Lake Albert Edward really is, and Janssen has decided that the building this will be one of the questions for the present exploring party to settle. They A wooden cabin was put up as an exalso expect to make a thorough study of the hydrography of this region, so it may be known how far south and west the basin of the Nile extends. It is probable that the great forest hides in its gloomy depths more than one of the sources of the Nile. In a geographical sense the work which this expedition is to undertake is one of the most interesting enterprises which yet await the explorers of Africa.

### Specimen Cases.

S. H. Clifford, New Cassel, Wis., was troubled with neuralgia and theumatism. his stomach was disordered, his liver was affected to ro alarming degree, spectite fell away and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him. Edward Shepherd, Harrisburg, III, had a run-ning sure on his leg of eight years' stand-ing. Used three hottles of Electric Bit-ters and seven hoxes of Encklen's Arnica his stomach was disordered, his liver was ters and seven hoxes of Bneklen's Arnival youth the stormy disposition of "Car-Salve, and his leg is sound and well,

veching and a dozen other small le much damage was done because the engines were out of repair. The counci tercups and wild blue geranium. In a met, and after much argument it was voted that on the eve preceding every fire the town officers should carefully examine the engines, pumps, etc. One of the greatest profits of the town was the toll exacted at the gates. The council wished to increase the income and instead of increasing the toll i voted to double the number of gates. This same council also ordered the sun dial to be taken from the courthous common and placed under cover, where it would be protected from the weather But of all the queer things that are told of Kempen and its people nothing flowers of the grasses and of the tiny is so absurd as this: Grass grew on the trefoil top of a very high tower, and the only "blush unseen" in the thick growth at way these droll Dutchmen could think of to get it off was to hoist a cow up on a and let her eat it. violent attack of hay fever at night.

The Palmetto Proving Useful The graceful palmetto, that grows profusely in the lower tiers of the lies so southern states, has recently become a factor in the industries of the south. for its wood is hard enough to carve blossom is and its fiber is strong enough to make excellent cordage and a useful substiupon it or the cattle will not eat i. "Better let it spoll on the ground than tute for sponges. In Jacksonville, Fla., the fiber, and elsewhere sink brushes are being made of the wood, half of

### Mont Blanc Observatory.

A second attempt is to be made to build an observatory at the top of Mont the summit did not come upon rock, M shall be crected upon the frozen snow. periment at the end of last summer, and in January and early in the spring it was found that no movement had occurred. According to a Lucerne cor-respondent the observatory is to be a wooden building eight meters long and four meters wide, and consisting of two floors, each with two rooms. The lower Dr. King's New Discovery for Consump floor, which is to be imbedded in the tion, coughs and coids, is guaranteed to snow, will be placed at the disposition give relief or money will be paid back of climbers and guides, and the upper
