PHILOSOPHY OF THE GIZZARD

How It Alds the Ostrich to Display Extraordinary Digestive Ability.

A fowl's gizzard, where so many los articles turn up, is a curious trap as well as a necessary vital egan of the fowl. Diamonds, pearls, coin, buttons, tacks. orange peel and about everything else, save dynamite, have been found in the gizzards of fowls. A study of the organ is interesting. Experiments have demonstrated that what may be called the gastrie juice in fowls has not sufficient power to dissolve their food without the subjected to a triturating process, and as are not sufficiently braised in this manner, before passing into the chanical, this organ serving as a mili to brought 1,000 francs.

lancets given to turkeys have been

They do, however, serve a useful

broken in pieces and voided without any apparent injury to the stomach. The reason undoubtedly is that the larger species of birds have thicker and more powerful organs of digestion. It has long been the general epinion that from some deficiency in the digestive apparatus fowls are obliged to resort to the use of stones and gravel in order to enable them to dispose of the food which they consume. supposed that the use of stones is to sheathe the gizzard in order to fit it to break into smaller fragments the bard, angular substances which might be swallowed. They have also been con sidered to have a medicinal effect, Others have imagined that they acted as absorbents for undue quantities of acid in the stomach, or as stomalants to digestion, while it has ever been gravely asserted that they contribute directtised. ess to autrition. The Bartford Times claims that repeated experiments, however, have established that pebbles are Good Looks. not at all necessary to the trituration of the hardest kinds of substances

TOYS OF PRINCES SOLD.

They Bring High Prices at Auction, Escivily Napoleon's Wooden Horse Old toys so very seldom survive the rough work their youthful possessors give them that if any do weather the storm they become extremely valuable. A collection of old playthings, many of which belonged to royal children, was sately sold at the Hotel Dronot.

Some of them brought high prices. For instance, a little doll, rather less than a foot long, but clad in a panoply aid of the grinding action of the gizzard. Before the food is prepared for modeled, and made at the period when digestion, therefore, the grains must be Louis XIII sat on the throne of France, sold for 615 francs.

Even this price was exceeded by that

paid for a tiny set of carriages carved gizzard, are there reduced to the proper in wood and accompanied by an escort gradually growing larger. In 1860 the state by its natural action. The action of little wooden soldiers, made when of the gizzard is, in this respect, me- Napoleon I. was first consul, which grind the feed to pieces, and then, by kitchen was interesting as being an exneans of its powerful muscles, pressing act model of those in use in the time of it gradually into the intestines in the Louis XVL A little jointed doll, sixform of a pulp. The power of this organ leen inches in length, and dressed in a form of a pulp. The power of this organ is said to be sufficient to pulverize hollow globules of glass in a very short. The frames, while the kitchen was only time, and solid masses of the same substance in a few weeks. The rapidity of dressed in the original faded brocade. this process seems to be proportionate silk, which had belonged to Marie Angenerally to the size of the bird. A loinette as a child, was sold for 1,800 chicken, for example, breaks up such francs. A roughly made wooden horse, substances as are received into its stom- with a broken nose and one leg missach less rapidly than the capon, while a ing, authenticated as having belonged goese performs the same operation to the great Napoleon when he was a sooner than either. Needles and even baby, went for 2,000 francs.

> "Exchanges" in English Journals A peculiar feature of the English woman's journals is the "exchange" solumn, wherein the woman who has a tartar. silver fox muff, boa and Medici collar," and on account of going into mourning desires to exchange it for a manifest. One lady offers in this colamn a "lovely Persian kitten; exchange to the value of one pound: honey wanted." Another offers to exchange a pair of exquisite Dresden china candelabra for "anything useful." Magazines and for other magazines and books. The woman who is tired of her parrot will give it in exchange for the pug that iome other woman is equally tired of into retreat.

poultry in return, and everything but husbands and deformities are adver age were beyond comparison.

Good looks are more than skin deep which can be introduced into their depending upon a healthy condition of stomachs; and, of scores, the usual food stomachs, and, of except, the usual food of fowls can be bruised without their aid. There do however some a useful and. They do, however, serve a useful auxiliary purpose. When put is motion by the muscles they are capable of producing some effect upon the contents of looks. Electric bitters is the great alterthe stomach, thus assisting to grind down the grain and separating its parts, vital organs. Cures pimples, blotches, so that the digestive fluid or gastric boils, and gives a good complexion. Sold the comes and the contact at Slocum-Johnson Drug Co., 50e per

THEY LIVE IN BOATS

Hundreds of Families Float Up and Daws the Great Rivers.

A Memphis writer introduces to the public a strange population who are counted as residents of that city, although most of them were born on the Mississippi or one of the streams emptying into it, and have never lived on dry land. The people occupy a floating set-tlement of house boats. The boats are sometimes named, and many of them are neatly painted and show signs of comfortable furnishings, judging from lace curtains at the windows and pic-

tures to be seen hanging on the walls of the interior. The colony is made up of representatives from twenty odd states drained by the Mississippi and its tributaries. Moored side by side one hundred and fifty boats were counted by the writer, who learned that some of the families began their navigation of the river as far north as Montana. It is not a fixed population, for, although most of the ats have been anchored at Memphis a long time, the absence of one of the families is noted now and then, and the inquirer is told that the head of the ouse has changed his habitat to New Orleans or some other river city.

The house-boat owner, of course, pays no rent. To escape it he took to the water. His food consists chiefly of fish, at catching which he is an adept. He knows better than anybody else where to find the cat, the buffalo, the perch and innumerable other fish. Driftwood serves him for fuel, and clothes, tobaceo, spirits and a few necessaries are secured by an occasional day's labor as a 'longshoreman,roustabout or farm hand.

IN THE AZORES. There Is Romance to Be Found Hidden in

Bloody History. In 1580 the Azores came under the power of Spain, and in the history of the next twenty years their name is fre quent as the favorite battleground of the English and Spanish fleets. partiality was, indeed, according to Macmillan's Magazine, mainly on the side of the former, and for a good reason. These islands lay right in the track of all vessels sailing to and from that enchanted region known then to all men as the Spanish Main. On the highest peak of Terceira, whence in clear weather the sea could be scanned for leagues around, were raised two columns, and by them a man watched night and day. When he saw any sails approaching from the west he set a flag upon the western column, one for each

lar sign was set up on the eastern column. Hither in those days came up out of the mysterious western seas the great argosies laden with gold and silver and \$173,250 00 jewels, with silks and spices and rare woods, wrung at the cost of thousands of harmless lives and cruelties unspeakable from the fair lands which lie between the waters of the Caribbean sea and the giant wall of the Andes. And turn her eyes to El Dorado, came the great war galleons of Spain and Portugal to meet these precious cargoes and convey them safe into Lisbon or Cadiz 100 TOOTH PICKS. before those terrible English sea wolves the Archduke Heinrich, who sacrificed could get scent of the prize.

> HEADS ARE BIGGER NOW. Craniums of All Nations, Though Diffee-

ent, Are Enlarging Together. It is interesting to observe how the shape of a man's head acts as an index sides. With the German it is the regypsy colonies, and to try to teach verse, if any difference. The head of a them the arts of agriculture and industrue Rhinelander is wide at the tem- try, and then built sixty little cottages ples; if the hat is the exact length, in for as many families on his Alesuth esstretched sideways in order to make it he corralled a gypsy caravan and led it fit. English heads are wide, but not so to his uninhabited village. He chose a pronounced as those of the Germans. There is more of a "sliding scale" with them as to the relative length and breadth. The Celtic head is almost invariably round or oval, and without pronounced phrenological "bumps." For general smoothness of the cranial protuberance, the Italian comes next to the Celts, either of the two besting the it may seem, anatomists declare that ding procession with a wreath of flowclassic Greeks in that respect. Odd as the Turkish skull is almost identical in shape, size, etc., with that of the enlightened nineteenth century inhabitant of the United States. Hat dealers, such as makers, furnishers, etc., say that the heads of all nations are average hat used was 63%; to-day it

CAT AND WEASEL. Pussy Began the Fight, But Gave It Up

as a Bad Job. Puss had been watching a wheat stack which yields her toll of a rat per night, and one evening a weasel made some inquiries.

By and by the weasel, in the pursuit of a rat, popped out of a hole under the stack, and puss instantly pounced upon it, and caught it, happily enough for her, round the neck.

Somewhat dubious, it would appear, as to what manner of rat she had in her mouth, she brought it into the house, half throttled, and began mewing loud-Presently the weasel revived, and began to move away, puss instantly following in pursuit; but she had caught a

The little creature, with wide-open mouth, and uttering a sharp, repeated sound. like "kek, kek, kek," sprang Persian lamb collar and muff, makes it straight at pussy's nose, just missing it and this she did again and again. fury was unbounded, and it was totally

Sometimes pussy only saved herself by a high jump and had to retreat, the weasel victously following, once corner reviews are also proffered in exchange ing pussy and forcing her to take a high

arched spring.

For several minutes the fight went on until pussy was fairly frightened into retreat. The weasel was appetting. Plants are offered to obtain parently about one-twentieth of the cat's size, but its viciousness and cour-

Awful and Lawful.

A Windsor Locks (Conu.) little girl, just old enough to enter the infant class at the Sunday-whool, was ambitious to repeat a text of Scripture as the older ones did at the concert exercises. To

THE EMPEROR OF ETHIPOIT.

An Enlightened Prince Who Can Work and Who Prays Two Hours Daily. Count Pietro Antonelli, a member of the Italian parliament, who has spent several years in Ethiopia and has been sent many times as Italian ambassador to Emperor Menelik, has given an interesting account of that monarch in a recent issue of the Riforms of Rome, says the New York Tribune.

Menelik, says the count, who was married to the Princess Taita in 1883, is now forty-eight years old. He is a man of medium height and powerful body, with dark-brown skin and coarse al though not irregular features. He is not naturally cruel and the signing of death-warrants often makes him sor-rowful and reflective. He understands his people and is able to gain their love

and rule them wisely.

Although he now bears the title of emperor of Ethipoit, commands an army of one hundred and thirty thousand men with sixty thousand guns and displays at times oriental splendor, he is not ashamed to subject himself to physical labor. He saws wood, makes house models and superintends the con-struction of buildings. A short time ago a terrible disease carried away many of the oxen, and Menelik and his courtiers used rakes and spades in order to prepare the fields for the reception of the seed.

He worked also three months as stone-mason on a church which he ordered built not long ago. He under-stands the main facts about railroads and steamships and the principles of telegraphy. He would gladly acquaint his people with the technical advances in science and the arts, but his advisers will not consent to it.

Since the early '80's, adds the count, Menelik has kept up his connection with Europe. In mercantile affairs he is the equal of experienced tradesmen. In diplomatic matters he well stands the art of prolonging the discussion until he has reached a decision One who has to carry on business with him must be observant and attentive. The emperor takes great interest in European newspapers. He is fond of talking with Europeans, also, in order to increase his knowledge of Europe. He always receives Europeans in friendly and flattering manner.

As a rule the emperor breaks his night's rest at three o'clock in the morning. He prays then for two hours. From five o'clock till seven he dictates letters to his secretaries. At seven o'clock he receives his ministers and visitors of importance and listens to their reports of the state of the empire. He gives his orders for the day after reports and makes his appointments. During the day he also finds time to regulate watches, draw archititectural plans, give medicine to the sick and take care of his army.

AN ARCHDUKE'S COLONY. His Efforts to Lead the Gypsies to the Ways of Civilization.

Archduke Joseph of Austria is little less eccentric in his tastes than the Archduke Johann, who married a chorus girl and became a sea captain, or his royal honors to wed an opera singer. Archduke Joseph's inclination, however, turns him to gypsies rather than to actresses, and his writings on gypsy traditions, gypsy music and gypsy customs have secured for him a high place in the folk-lore literature of the checkered Austro-Hungarian em-

of ten it has to be tate in Hungary. About two weeks ago strapping fellow of twenty-five chief, or mayor, and had married to him by the pastor of Alesuth the prettiest girl in the caravan. The archduke himself gave the girl away, and a friend was the best man. In the subse quent festivities the archduke appeared in the full attire of a gypsy chieftain, and, according to custom, as the man who gave the bride away, led the weders on his head and a bamboo stick wrapped with gray cloth in his hand. Each family in the new village has a cow and a pony and a quarter of an acre of ground. The archduke is about to erect a factory near the village, at which all who are not thrifty enough to support themselves without day labor may find employment. Should the colony prove a success other caravans are to be captured by the archduke and located in similar surroundings. His purpose is to lead into ways of comfort and civilization the great horde of wandering folk who pass all their time in mi-grating in picturesque caravans from one end of the Austro-Hungarian empire to the other.

An Accidental Reunion. For some time a young woman from Sweden had been looking for her sister, of whose whereabouts she knew nothing except that she was somewhere in the United States. Finally, the other day, she drifted to Portland, Me., and inquiring for this sister mentioned a name that sounded a little like Swift. So she was taken to the store of Mr. Swift in that town, who, however, proved to be entirely ignorant of the girl's whereabouts. But while she was telling her story a man happened to be in the store who said he had a Swedish servant girl who might possibly be able to help the inquirer. denouement was quite dramatic, the servant girl proved to be the longlooked for sister.
