The Original Webster's Unabridged DICTIONARY

By stecial areas and the publishers, we are able to obtain a number of the above book and propose to furnish a copy to each of our subscribers.

The dictionary is a necessity in every home, school and business house. It fills a vacancy, and furnishes knowledge which no one hundred other volumes of the choicest books could supply. Young and old, educated and ignorant, rich and poor, should have it within reach, and refer to its coutenle every day in the year.

As some have asked if this is really the Original Webser's Unabridged Dictionary, we are able to state we have learned direct from the publishers the fact, that this is the very work complete on which about forty of the best years of the author's life were so well employed in writing. It contains the entire vocabulary of about 180,000 words, including the correct spelling, derivation and definition of same, and is the regular standard size, containing about 300,000 square inches of printed surface, and is bound in cloth half morocco and sheen.

Until further notice we will furnish this

Until further notice we will furnish the valuable Dictionary— First—To any new subscriber. Second—To any renewal subscriber.

Third—To any subscriber now in arrears who pays up and one year in advance, a the following prices, viz:

Full Cloth bound, gilt side and back stamps, marbled edges, \$1.00.

Half Morocco, bound, gilt side and back stamps, marbled edges, \$1.50.

Full Sheep bound, leather label, marbled

How to Get Twenty-five Hundred Dollars for Nothing.

The Winner has a clear Cift of a Small Fortune, and the Losers Have Patents that may Bring them in Still More.

Would you like to make twenty-five hundre ollars? If you would, read carefully what follows and you may see a way to do it. The Press Claims Company devotes much ttention to patents. It has handled thousands practical results. That encouragement the Press laims Company propose to give.

NOT SO HARD AS IT SEEMS.

A patent strikes most people as an appalling ly formidable thing. The idea is that an inventor must be a natural genius, like Edison or Bell; that he must devote years to delving in complicated mechanical problems and that he must spend a fortune on delicate experiments before he can get a new device to a patentable degree of perfection. This delusion the company desires to dispel.
