PICKS 57,500 says the Detroit Free Press, the male stickleback monopolizes all the gay 115,500 LARGE PICTURES (14x28 inches) IN ELEVEN COLORS, for framing, no advertising on them. 28,875 06

261,030 PRIZES, AMOUNTING TO ..... The above articles will be distributed, by counties, among parties who chew SPEAR selfishness on his part, and that is that HEAD Plug Tobacco, and return to us the TIN TAGS taken therefrom.

To the ONE HUNDRED PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each 1 ROLLED GOLD WATCH CHARM TOOTH FICK

To the ONE HUNDRED PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each 1 LARGE FICTURE IN ELEVEN COLORS

Total Number of Prizes for this County, 226.

CAUTION.—No Tags will be received before January 1st, 1891, nor after February 1st, Each package containing tags must be marked plainly with Name of Sender, Town, ty, State, and Number of Tags in each package. All charges on packages must be

county, State, and Number of Tags in each package. An energies of package where prepaid,

READ.—SPEAR HEAD possesses more qualities of intrinsic value than any other plus tobacco produced. It is the sweetest, the toughest, the richest. SPEAR HEAD is absolutely, positively and distinctively different in flavor from any other plus tobacco. A trial will convince the most skeptical of this fact. It is the largest selfer of any similar shape and style on earth, which proves that it has caught the popular taste and pleases the people. Try it, and participate in the contest for prizes. See that a TIN TAG is on every let cent piece of SPEAR HEAD you buy. Send in the tags, no matter how small the quantity.

Very sincerely,

THE P. J. SORG COMPANY, Middle than other with the richest.

A list of the people obtaining these prizes in this county will be published in this fresh balt when the cord was pulled the paper immediately after February 1st, 1891.

DON'T SEND ANY TAGS BEFORE JANUARY I. 1894.

# THE LAKE OF DEATH.

A Mysterious Sheet of Water Which No Living Thing Can Survive.

"Devil's Lake," in Calhoun County, Ala., seventy miles east of Birmingham is one of the most remarkable materi curiosities to be found in America The lake is oval in shape and cover about four acres of ground. No vege tation of any kind grows on its bank and nothing rives in its waters. Ever snakes and terrapins shun the waters of Devil's Lake, and fish placed in it diin a few hours. The water is clear lime stone, with a premuar taste, which makes it unpulatable to man or beast Horses and cows will not drink it, no

matter how thirsty they may be. Deep down below the surface of the lake may be seen what appears to be the trees. They stand purisht in the water never rise to the surface nor sink to the bottom. The lake has no outlet and the volume of water in it is the same

all the time. A strange fatality attaches to this lake. Once it was the favorite resort or the boys of the neighborhood for bath ing and swimming, but now they never go near it. Fifteen boys have beer drowned in its waters, in twice as many years. A few of the bodies were recovdistance from the banks sunk to the bottom and were never brought to the

The depth of the lake has never heer ascertained. Soundings to a depth of seven hundred feet found no bottom. and the people in the vicinity say the take has none. The Indian legend of the origin of the lake is that before the the even of the frightened officer, and white mun came to this country two after a number of bloody battles the similler tribe was almost exterminated. Then the old men and chiefs of the weak tribe sund for peace and arranged for a council. While the pipe was being passed around a signal was given and sprang up with drawn tomaliawks and

ried on until the weak tribe was exter minated. A few tosons after the mas the pine forest where the massacre occurred. The fire burned in this spot of eight moon and the row of sunk down out of sight and the representation of the first tend and such a like. The Indian gave the labe a many which means "lake

An Illuminated Coa An illuminated cat is among the curiosities of the patent office at Washington, D. C. It is made of pasteboard tin painted over with phosphorus, and is intended to frighten away "rats

and mice and such small deer" in the

darkness of cellars and garrets.

SIBERIA NOT A DESERT. Its Valleys as Perille as Those of Western America.

Siberia, coupled as its name is with stories of Russian barbarity, is not the barren, terrible land of limitless deserts which flotion and the drams have pictured it. The building of the trans-Siberian railway and the extension of lines along the northern frontier of China will greatly change the entire drama of civilization. The railroad from Vladivostock to the Ural moun tains will bring that great Russian naval station within fourteen days' journey of St. Petersburg, and along route stations will rapidly grov into towns and offer opportunities for new and striking development.

Russia's enterprise, says the Hartford Globe, stimulates that of China, not only as a matter of competitive ambi-tion, but for strategic reasons. The railways now being surveyed and completed within the celestial empire are numerous, and to this end many foreign engineers are employed. Soldiers and convicts are largely employed as workmen, thus cheapening the cost of labor as far as possible. The transsiberian railway extends to a length of nearly five thousand miles, and it is expected to cost two hundred million dollars. It is divided into six sections, each section comprising three or more divisions, and the contract for building is given to these, thus employing a large number of contractors for limited distances.

It is a mistake to suppose that Siberia is a desert, or a glacier, or a mountain fastness, or incapable of being made habitable. The valleys are level plains, and said to be as fertile as the western portion of the United States, and it is not unlike the west in the variety of its resources-in minerals, timbers and in agricultural facilities. It is a marvel-ous treasure-trove of stored-up opportunities. Its wealth is practically un-limited. With the advantages of railroad communication and telegraph lines, a vast country is added to the world of civilization. The cultivation of the land and the introduction of all the elaborate machinery of enlightened life will, as scientists depict, modify the rigors of the climate, although in southern Siberia even this obstacle does not

WARLIKE FISHES.

The Diminutive Stickleback Is a Great

Fighter.

The sticklebacks are insignificant in size and mighty in valor. They are always ready and anxious to fight; one provoking glance from the eye of a rival and straightway the buttle rages In contradistinction of the human race, says the Detroit Free Press, the male colors, Mrs. Stickleback being demned to a sober, Quakerish dress. \$173,250 00 But she has one compensation for this We will distribute 226 of these prizes in this county as follows:

'to THE PARTY sending us the greatest number of SPEAR HEAD

TAGS from this county we will give.

To the FFVE PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each, I OPERA GLASS.

To the TWENTY PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each I POCKET KNIVES.

To the TWENTY PARTIES sending us the next greatest number of SPEAR HEAD TAGS, we will give to each I POCKET KNIVES. himself, as purnacious as ever. The stickleback is one of the very few fish that build nests for their young. In ad-.100 TOOTH PICKS. dition to its instinctive skill and intelligence the stickleback may be trained and instructed by man. At an aquarium which I have often visited, by the the aid of an ingenious but simple device, the sticklebacks had been taught to ring a bell when they wanted food. The bell was suspended above the tank where they were kept, and the connecting rope, a fine thread having been baited, was lowered into the water be-The nibbling of the bait rang the Care having been taken to add their attendants by this means.

> DANIEL WAS VERY IGNORANT. Mr. Webster Didn't Believe the West

Ever Would Be Valuable. How a Hungarian Nobleman Outwitted a In his day Mr. Webster had a very vague idea of the great west, according The famous Hungarian, Count Zichy, to Ben Perloy Poore. raised window of the rate-office. "I have just caught that dog again. Would you like to look at him?" "Get eway! Get out, you and your infernal deg?" And with a crash the win dow went down, and the smiling butcher entered Vienna. But no dog was that time in his sack, but the fattest lamb that could be found in the suburbs of the capital. The Cause of Beath.

People are lauthing at a doctor in a little village in 1 maylvania who, in filling out a certain so of death, insdvertently wrote at own name in the blank space reserved for 'cause of death."

All Esquimanx are superstitions about death, and, although they bold festivities in memory of departed triends, they will usually earry a dying to drag out his remaining days without tood, medicine, water or attendance. After the death of a husband or a wife the survivor cuts the front hair short and fasts for twenty-five days.

The Queer Inventions That Are Sent to Be Investigated.

To fully realize how many cranks live among us one has only to visit the Patent Office in Washington, says the New York Herald, and examine the models which fill the shelves of that department and read the specifications, in which are set forth in glowing terms the many benefits which they propose to donate to mankind. Every imaginable scheme is suggested and laid before the patent examiners. The quesnot enter into the taking out of a pat-

plicant pay the legal fees.

compass the working model. Many of the old models were burned

One of the most curious of these was a hen's nest constructed with a spring trap at the bottom of the nest. The weight of an egg was sufficient to press down the spring and allow the egg to slip out. The theory of this thoughtful inventor was that as soon as the hen laid an egg it would press down the trap-door tom after laying an egg, would rise and eackle, but finding no egg, would conclude that she had made a mistake and would proceed immediately to lay another, and so on ad infinitum. On this prin-ciple the owner of a hen would have a

A trip through the model rooms resome of the more unusual of

One of the most original is an ordnance plow, patented by C. M. French and W. H. Fancher, of Waterloo, N. Y., in June, 1862. The object of the invention was to produce a plow equal in point of strength and lightness to the one ordinarily in use and yet which would combine the elements of a small sized cannon, so that it could be utilized by the frontier settler both for defensive purposes as well as agricultural.

which the horses or oxen are yoked is in fact a gun barrel or piece of light The plowshare takes the place of a gun carriage and serves to anchor the improvised cannon firmly in the ground and enable it to resist the recoil, while the handles furnish means of giving the plow or gun, as the case may be, direc tion or aim. To use the language of the inventors: "as a means of defense in re-

pelling surprises and attacks on those engaged in a peaceful avocation it is unrivaled, as it can be instantly brought into action by disengaging the team, and in time of danger may be used charged with deadly grape. This combination enables those in agricultural pursuits to have at hand an efficient weapon of defense at slight expense, in addition to a common and indispensible implement, and one hardly inferior to expensive light ordnance on wheels." With due deference to the originality of

How General Wallace Came to Write His

'I don't know-do you? Is there a God? I don't know-do you? Was Christ the son of God? I don't knowdo you? He paused and looked keenly at Wallace. The General was a little embarrassed by the abruptness of the great infidel's interrogatories. He replied: 'Really, Ingersoll, I have never given much thought or study to the questions you propound. I had a Christian training, and I have always tacitly accepted them.' 'Indeed?' said Colonel Ingersoll. 'Why, man, you sur-

were sold in the United States from six bundred and seventy two bottles sold in one year, and each and every bottle was sold on a positive guarantee that money would be refunded it satisfactory results did not follow its use. The secreof its success is plain. It never disapas the very best remedy for coughs, colds,
