NOTICE TO INVENTORS.

There was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as Free. Address now. The conveniences of mankind in the factory and workshop, the household jan25-3m sw and on the farm, as well, as in official life, require continual accessions to the appurtenance and impliments of each GREATLY in order to save labor, time and expense. The political change in the administraprogress of the American inventor, who RATES being on the alert, and ready to perceive the existing deficiencies, does not permit the affairs of government to deter him from quickly conceiving the Southern Pacific Company remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skillful attorney to prepare and prosecute an application for patent. Watches to Card Cases. * Among the latest novelties in the way of card cases is a very dainty little one made of very finely dressed leather. In one corner of the case is set a tiny little watch. The effect of this is very protty, and, besides this, the combina tion is a very useful one. Ladies are often put to a great deal of trouble in taking out their watches when on the street. Carrying this little time-piece set in their card case or pocket-book saves them all this trouble, and then, too, when making calls they have a little gentle reminder in their hands that they must not overstay their welcome. Watches set in this way in card cases and pocket-books are much more popular than the bracelet watch attachment. but is now being manufactured very targely in this country. AN INVASION OF CANADA. Uncle Sam's Troops Lost on British Ter-

It is a fact not generally known that a few years ago an armed force of Americans invaded the British possessions. It occurred in the early part of 1877, during the pursuit of Sitting Bull's band of renegades. A few troops of the Second cavalry were hot on the trail of the Indians, says Capt. C. C. Elliott, in St. Louis Globe-Democrat, and we hoped to eatch them. We had been wandering about for several wee'es, and did not know exactly where we were. Just about dusk one evening the major in command, who was riding at the head of the column, came upon one of the iron posts that marked the British boundary. I never heard a man swear harder in my life, for the trail was hot and he was hopeful of bringing the Indians to a fight. He called the officers around him and beld a council of war. Both horses The novelty was imported from Paris, and men were worn out, and it was twenty miles to the nearest water on targely in this country. The cost of one side of the line. Under the circumthese oned cases and pocket-books is stances he decided to take the risk and camp with his command on Brit.sh soil. We went about three miles into British Columbia and spent the night there. Next morning, however, we were up early and slipped back to our own side of the frontier very quietly Fortunately no one saw us the time between September, 1493, and matter was not brought to the knowledge of the Canadian government. dle of the tenth century in the Academy of History at Madrid. AMERICAN AMUSEMENTS.

The Immense Amount of Money Spent in Theaters.

A Large Army of Professionals Are Kept Busy-Fortunes Annually Spent in Traveling on the

It is estimated that there are perhaps as many as 1,000 traveling theatri-cal companies in the United States. says the Washington Post. This insidered strictly professional companies, to say nothing of the countless amateur organizations. Of the strictly theatrical organizations it is safe to presume that the average receipts per night for the 1,000 companies are \$400 each. At seven performances per week for each company the weekly average, as will be seen, would be \$2,800. The average theatrical season is forty weeks. The entire 1,000 companies with an average nightly receipt of \$400 would produce weekly receipts at seven performances per week amounting to \$2,800,000. This multiplied by forty, the number of weeks in a season, would yield gross receipts amounting to \$112,000,000.

From the above estimates some idea can be formed of what the American people spend annually for amusements companies which are known as strictly professional. Thousands of dollars are also spent with amateur theatrical organizations and lecture

It would appear from the above state ment that a great deal of money is made by theatrical people. The expenses inident to earning \$112,000,000 are very It is reasonable to say that arge. ne-third, or \$39,000,000, of the total \$112,000,000, is spent with railroads. Another very large item is expended for printing. Great fortunes have been amassed by printing houses in the production of theatrical printing alone. Hundreds of thousands of dollars are also spent for advertising in news-It is safe to say that 40 per papers. cent. of the correspondence between theatrical managers is carried on by telegraph, which amounts to a great

deal in a year's time. The traveling companies, however, are not the sole possessors of the grand total, \$112,000,000. This is divided between the traveling companies and the owners of the houses where the companies play. The net receipts derived by the companies would perhaps be in the neighborhood of 65 per cent. or 70 per cent., making an average net result of between \$75,000,000 and \$80,000,-000. Out of this, of course, comes all of the expenditure for railroad transportation, and over one-half of the total amount paid for newspaper advertising. Out of this also is paid fully 95 per cent, of the amount paid to print-

The 1,000 traveling companies will average fifteen people to a company, making a total of 15,000 theatrical people traveling over the country forty weeks out of the fifty-two. This, of course, does not include the number of people employed at theaters. Upon the estimate made as to the number of companies there must of nocessity be the same or more number of theaters, as two companies cannot play at the same theater on the same night. There are at least on an average fifteen peo-ple employed at every theater, which would be 15,000. This added to the number of people traveling would make a total of 30,000 people. It is said that there 3,000 actors and actresses now out of employment. There are at least engaged in the theatrical business directly or indirectly-those

who make a living from it-60,000. Some actors make a great deal of money; some do not. Those who make the most are generally those who say the least about it. Those who make the least on annual tours are as a class those who do the most talking about having done the greatest business. A great many managers and stars hold to the old-fashioned idea that they must always talk about the enormons business they are doing, the people they are turning away from their houses, and how many times a week the "Standing Room Only" sign is out. They do this for the express purpose of attempting to deceive the public. best evidence that a traveling theatri cal attraction is a good one is the fact

that large audiences attend it.
A Horse Lives in the White House. A horse has a home in the white house, says a Washington correspondent of the St. Louis Globe-Democrat This is a literal fact which visitors never discover and which few Washington people know. The horse which shares the executive mansion with the president isn't a thoroughbred. He has either pedigree nor record. He is ist a plain, everyday horse, with a white star in his forehead, a faith-ful companion to Edgar R. Beckley. And who is Edgar R. Beckley? The man who for twenty-five years has carried to and from the white house all of the interesting and valuable mail re ceived and sent, and who has never been found remiss in his duty. Rain or shine, in all seasons, he makes hourly trips between the white house and the city post office. He is the white house mail carrier. And the horse that has his home in the white house carries Beckley. The part of the mansion set apart for the horse is one corner of the conservatory. A thin partition is all that separates the roomy stall from the orchids. There is just room enough for the stall and a temporary supply of for the stall and a temporary supply of sarring, feed, and there the horse eats and series. sleeps, under the same roof with the president of the United States. -

Adopted the Amendment.

A member of the house of commons had been paying attention to a young lady for a long while, and had taken her to attend the house until she was perfectly posted in its rules. On the ast day of the session, as they came out, he bought her a bouquet, saying:
"May I offer you my handful of flow-She promptly replied: "I move to amend by omitting all after the word 'hand.'" He blushingly accepted the amendment, and they adopted it unanimously.
