PATENTS!

NOTICE TO INVENTORS.

There was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of meakind in the factory and workshop, the household and on the farm, as well as in official life, require continual accessions to the appurtenance and impliments of each in order to saye labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who being on the alert, and ready to perceive the existing deficiencies, does not permit the affairs of government to deter bim from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skillful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employ ment of incompetent counsel, and es pecially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who entrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee-THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, and general periodicals of the country, was instituted to protect its patrons from the unsafe methods beretofore employed in this line of business. The said Conpany is prepared to take charge of all patent business entrusted to it for ressonable fees, and prepare and prosecute applications generally, including mechanical inventions, design patents, trade-marks, labels, copyrights, interferences, infringements, validity reports, and gives especial attenion to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents. Write for instructions and advice.

Antiquity of Bell Founding. The art of bell founding is undoubted-ly of great antiquity. The Saxons are known to have used bells in their churches, although probably but small ones, for the Venerable Bede, writing at the end of the seventh century, alludes to them in terms which seem to show that they were not unfamiliar things. The towers of the Saxon period have belfries of considerable dim most cases, and at Crowland abbey, in South Lincolnshire, there was a famous peal of seven bells many years before the Norman conquest.

The monks at that time and for long after were the chief practitioners of the art of bell founding-which indeed is one of the many things those well abused men have handed down to us. Their bells were rarely without inscriptions, often in very bad Latin, containing perhaps some obscure joke, the point of which is quite lost. More often they were of a religious nature, sometimes, we fear, not unmixed with a dash of superstition, as when the bell declares that its sound drives away the demons of the air who caused pestilence and famine, lightning and thunderstorms.

As a rule, unfortunately they put no dates on their bells, a defect which has been in some measure overcome by the researches of many enthusiastic campanologists, but which is likely to keep the early history of bells shrouded in darkness for a long time to come.—Gentle-

A Noted London Mission.

The other Sunday night at the Char-rington mission, which is held in a long, narrow room, double galleried all around, the coughing (from the fog) was more like Fourth of July with conglomerate firecrackers, church bells and cannonading than one would conceive as possible issuing from a merely human assembly.

Just a word about this Charrington mission, which is a feature of the east end. Frederick Charrington belongs to wealthy family of brewers. About 17 years ago he began to do a sort of street missionary work in East London, near his father's brewery. His father threatened to disinherit him, but finally left the business. Once, on being taunted on the street with wearing the blue ribbon—"What does it cost you to wear that ribbon?"—he was able to reply,

"A hundred thousand dollars." He sold out his interest in the brewery to his brothers and built in Mile End road, the prolongation of Whitechapel, the Great Assembly hall, which had been projected but never begun by Keith-Falconer. Every Sunday night 3,000 or more people gather at the evangelistic service of the mission, and its fellowship society, with the constant religious, educational and entertainment work centering at the Great Assembly hall, makes it a power for good in a district which contains a number of powers for evil.—Lon-don Cor. Hartford Courant.

With Proper Construction and Equip ment Fast Trains May Be Safest. It may be said that in constantly de manding more rapid facilities of travel people invite a corresponding increase of the rate of danger to be encountered; but, according to a writer in the Engi neering Magazine, it is very doubtfu if this proposition can be maintained. The facts go to prove, rather, that faster trains develop more care on the part of the railroad people, and that there is really little, if any, more liability to accidents on such account. As a rule the "Wild Irishman" and "Flying Dutchman" and "Cannon Ball trains are run on schedules so arranged as to insure the utmost degree safety, so far as all ordinary contingencies are concerned. Their success depends largely upon this point, and the railroad companies well under-stand that they cannot afford to take any avoidable risk. The demand for increased speed carries with it the demand for increased prudence. Fast trains must have men of superior skill and caution to operate them: they must have good permanent way to move upon, and they must be provided with all known appliances for security and comfort. The general ef-fect, in short, is to improve the railroad system in all respects, and to pristine vigor. eliminate from it the carelessness and incompetency that would be a source of fixed peril under the slowest of fixed time schedules. There must always be more or less danger on a railroad train, but it is by no means sure that any-thing is gained in the way of safety by taking a train which runs twenty miles an hour instead of one which goes five times as rapidly. On an Eng-lish railway a high rate of speed is maintained, and this, when kept at a regular rate, unchanged by numerous stops, is found to be safer than the slower rate, stopping often and subecting machinery to concussions and erks in starting and stopping, which disorder parts of the train more than is done by the uniform velocity of high speed. The writer has covered the ace of five miles at the rate of sevenened to disinherit him, but finally left him a share, though not a full share, in the himses of the control of an entire absence of oscillation. So

far as any motion of the cars was concerned, it was impossible to tell whether they were going at the rate of seventy miles an hour or twenty. The multiplication of fast trains therefore is a thing to be commended and encouraged, and the railroad authorities are wise to make them as fast as they can within reasonable limits of forethought and precaution. There is one unvarying rule for womn, married and single. It is never right, says Harper's Bazar, to sign one's name with the addition of Miss or You are Mary Emily Jones, not Patrick Fitzgerald Jones, to Mrs.

were prepared for dinner, but such was their tenacity of life that both, after having undergone the process of scaling and a sound steamer. "That is a fog horn, my dear," was the reply. The little fog horn was, and her mother exfog the steam whistle was blown while it lasted. "But why?" persisted the young inquirer. "I should think that anybody could see there was a fog, and what is the use of blowing a whistle mother sighed and gave it up.

Excusable Ignorance. It is often said that one of the best ways of learning a thing is to teach it to be living ays hold good. Says a correspondent of the Boston Transcript: One day my brother went to buy a bushel of buckwheat for sowing. The man of whom he was to get it was away, but his wife was at home, and undertook to make the sale. She got a peck measure, and they went to the granary. There the oman filled the measure twice, poured the contents into the bag, and was proceeding to tie it.

But Mrs. F ... said my brother, "it takes four pecks to make a bushel."
"Oh, does it." said she. "Well, you see. I never had any experience in measuring grain before I was married.

Trapped by a Photograph.

Here is a curious little story told by an English solicitor. He had among his clients a few years ago a notorious company promoter, whose financial af fairs came to grief. One day, happen-ing to pass by a stationer's shop, his attention was attracted by a portrait of Mr. —, the well-known barrister. Mr. - was attired in a wig and gown and in his hand he held a paper on which the solicitor's sharp eyes caught the name of his client. His curiosity aroused, he purchased the photograph and proceeded to decipher the words of Mr. —'s brief, speedily discovering that they indicated that a warrant was "out" for the arrest of his client. In a few hours the man of finance was out of England.

Habits of Snipe.

Newspaper naturalists report a change of habit among snipe in that they no longer follow the Atlantic coast indentations in their southern flights, but, departing from the British provinces, fly out at sea, barely skirt-ing the extreme end of Cape Cod or Nantucket, unless driven shoreward by stress of weather. From Nantucket they pass out of sight of land until they reach their feeding grounds on North Carolina sounds, snipe shooting is still enjoyed in its

Spry Old Maine People. Maine is noted for her hale and spry old people. Ex-Gov. Garcelon, in Lewiston, eighty-five years old, is an active rider and driver of fast horses, of which his stables contain twenty-three fine animals. Mrs. Jonathan Dow, of Deer Isle, eighty years old, has knitted forty pairs of stockings and woven two hundred yards of rag carpeting and one hundred yards of cloth during the past season in odd moments snatched from her general housework and the care of a flock of hens. Mrs. Joanna Bunker, of West Trenton, eighty-seven years old, has just finished a waistcoat which she cut and made without the use of glasses. Mr. Robbins, also of Deer seventy-six, and, last year, besides doing much repairing to vehicles, he made all the woodwork for four carts, one jigger, a double-seated
