# PATENTS

# NOTICE TO INVENTORS.

There was never a time in the history of our country when the demand for branched hulf-circle JL commented in left should inventions and improvements in the arts and sciences generally was so great as now. The conveniences of maikind in the factory and workshop, the household and on the farm, as well as in official life, require continuai accessions to the appurtenances and impliments of each in order to save labor, time and expense. The political change in the administra-tion of government does not affect the progress of the American inventor, who being on the alert, and ready to per-cive the existing definencies, does not i armit the affairs of government to due ter him from quickly conceiving the remedy to overcome existing discreptor cises. Too great exre cannot be exer-cised in choosing a competent and skill-ful attorney to prepare and prosecute inventions and improvements in the arts c'sed in choosing a competent and skill-ful attorney to prepare and prosecute an application for patent. Valuable in-tarests have been lost and destroyed in innumerable instances by the employ ment of incompetent counsel, and es-pecially is this advice applicable to those who adopt the "No patent, no counsers of a Glasson, Hardman,  $O_{1}$ —Horses IP on the fully for the source of the fully constructed on the source of the fully constructed on left hip, horses on left stills and wards on news. Banny in first county. Peerson, Olave, Eight Mile, Or.—Horses, Ipar-te circle should an left shoulder and 34 on loft hip. Cattle, fork in loft shoulder and 34 on loft hip.
