

PATENTS!

NOTICE TO INVENTORS.

There has never been a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of mankind in the factory and workshop, the household and on the farm, as well as in official life, require continual accessions to the apparatus and implements of the arts in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who being on the alert, and ready to perceive the existing deficiencies, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skillful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially in this advice applicable to those who adopt the "No patent, no pay" system. Inventors who entrust their business to this class of attorney do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee.

"For Years,"

Says CARIE E. STOCKWELL, of Chesterfield, N. H.: "I was afflicted with an extremely severe pain in the lower part of the chest. The feeling was as if a ton weight was laid on a spot the size of my hand. Paroxysmic attacks, the perspiration would burst in drops on my face, and it was agony for me to move. In great distress I made a resort to whisky, but it only made me worse. They came suddenly, at any hour of the day or night, lasting from thirty minutes to half a day, leaving me suddenly but, for several days after, I was quite prostrate and sore. Sometimes the attacks were more frequent. After about four years of this suffering, I was taken down with bilious typhoid fever, and when I began to recover, I had the worst attack of my old trouble I ever experienced. At the first of the fever my mother gave me Ayer's Pills, my doctor recommending them as being better than anything he could prepare. I continued taking these Pills, and so great was the benefit derived that during nearly thirty years I have had but one attack of my former trouble, which yielded readily to the same remedy."

HOG CHOLERA

I HAD A SURE, TRIED, PROVEN AND GUARANTEED CURE FOR HOG AND CHICKEN CHOLERA, which has stood the test for seven years without failure, that I know of, but has effected thousands of cures. I have sold over 20,000 of my pills, and in eight months and not a single complaint received yet. I sold each and every one of a guarantee, and in every case, if Holland's Cholera Cure and Preventative fails to cure or prevent Cholera, I will refund your money. This is fair enough, six pounds of the medicine can be made at a total cost of from \$1 to \$2.50, enough to do 20 hogs and 100 chickens in a year. You are best assured against cholera for a year. If you will try this remedy, I assure you you will never regret. Use it, and your hogs and chickens will look better and healthier than ever before. Recipe and family right out at \$2.00, Family prepared medicines, and \$1 per bottle or package. Address:

HABITS OF SOME PRESIDENTS.
Of Recent Years None Save Arthur Paid Attention to Society.

Gen. Grant brought the camp into the white house, says Harper's Magazine. Mr. Hayes had lived at Washington as a representative at a hotel or a boarding-house. Gen. Garfield had settled in the capital in a house of his own, and had enjoyed the kind of social life that may be had anywhere in this country and that runs to literary clubs that are formed to facilitate the escape of unpublished manuscripts. To encourage talent and literary ambition was a great pleasure of the president, whose murder cut short the term that would have been marked with more gentleness and agreeable talk than is usual at the white house. Mr. Arthur brought city manners and customs with him. People who did not know him were greatly mistaken in him. There had been a good deal of refinement and elegance in Mr. Arthur's home, and his influence made the white house more of a social center than it had been before or than it has been since. Then came Mr. Harrison who had passed six years in the senate and a Washington boarding-house, and Mr. Cleveland, who went to the capital a bachelor, having lived most of his life in apartments in a Buffalo business block.

None of these men adopted the manners and customs of court life, with the exception of Mr. Arthur, who insisted that those with whom he came in contact should pay his office, respect something more than the formal respect of good manners. The rest knew nothing of the rules which Washington society had laid down for its own and their guidance, and which were as conflicting as the various interests that invented and frequently modified them. Moreover, they were seemed to care a good deal less. They or their wives or their secretaries studied up the necessary regulations that govern the intercourse between the head of the nation and the diplomatic representatives of foreign powers. And, although Mr. Jefferson insisted on taking out to dinner what woman he would, modern presidents have done their best to observe the proprieties in this respect.

THE CARDINAL'S CLOSE CALL.

His Knees Sense of Small One Saved Him from Being Poisoned.

Years have rolled by since, but the story of an almost fatal accident to Cardinal Gibbons has lost none of its interest through not having been previously told, says the Philadelphia Call. Just before he rose to give the impassioned reading of his poem, "King Lear" at the anniversary dinner of the Sons of St. George, Prof. H. H. Hay, of Girard college, told of the happening as it had been related to him while he was traveling in Europe with a priest acquainted with the circumstances.

"While the cardinal, who was then an archbishop," said Prof. Hay, "was traveling across the Atlantic some years ago he complained one afternoon that he wasn't feeling very well. He was told by the ship's surgeon to await medical treatment until the following day, when something would be done for him if his sickness continued. On the day following the steward of the steamer was duly sent with a remedy for the eminent prelate. As he was about to place the glass containing the draught to his lips the archbishop was almost overcome by a strange and pungent odor. He hesitated a moment and lowered the vessel containing the liquid until he recovered from the effect of the smell. Glancing incidentally at the bottle in the steward's hand he noticed the word 'poison' on a label and not without a little alarm, asked the man if he knew what he was offering. The steward replied that he had done as was directed by the doctor. Alarmed, the archbishop sent post haste to the medical man to make sure of what was being tendered him. This time it was the surgeon who had occasion to manifest surprise. He hurried to his distinguished patient's bedside and informed the archbishop that the glass offered him contained enough deadly poison to kill any two men."

BRITISH "DRUMMERS."

Some Minor Differences from the American Commercial Traveler.

The commercial traveler in England is little different from his American brother, pursuing the same line of policy in "getting there" so far as securing trade is concerned, says Hardware.

His invariable rule, however, is that his first proffer to a local merchant is his last and only one. There is no going in the morning with an offer, and then in the afternoon with an offer.

When persons are weak and languid from sickness or overwork, feel depressed and depressed, it is an indication that the blood is out of order, and they need help to throw off the miserable feeling. The best remedy for this purpose is Dr. J. H. McLean's Strengthening Cordial and Blood Purifier. It restores lost strength, gives vigor to circulation, promotes good appetite and a flow of cheerful spirits. Price \$1.00 per bottle.

BROWN GOT THE MONUMENT.

And as He Had Been a Good Fellow, the Boys Said He Deserved It.

At a little settlement on the Indian river, Florida, before the railroad was built, lived a penniless, good hearted fellow of the name of John Brown. When Brown got any money he would divide it to the last cent with his friends among the boys, and of course the boys liked him. One day the boys found Brown dead in the woods. They dug him a grave, rolled him in a horse blanket and let him down in it and then drank several bottles of east coast bitters to his health and expressed the hope that whatever new climate he was in he would be healthy.

Some time later that a stranger came among them. He died and, as the weather was too warm to ship his body off, he was buried next to Brown. A week or two passed and the relatives of the deceased stranger sent down money to erect a monument over the grave of the stranger.

The boys took the thing in hand and discussed it pro and con. They came to the conclusion that Brown was a "durned" right fellow in every way than the stranger and more entitled to a monument, so one night they went out and swapped the men from one grave to the other. As a result Brown, the merriest old hobnobman and all around good fellow, sleeps beneath a handsome marble monument and the rich stranger lies in an unmarked grave.

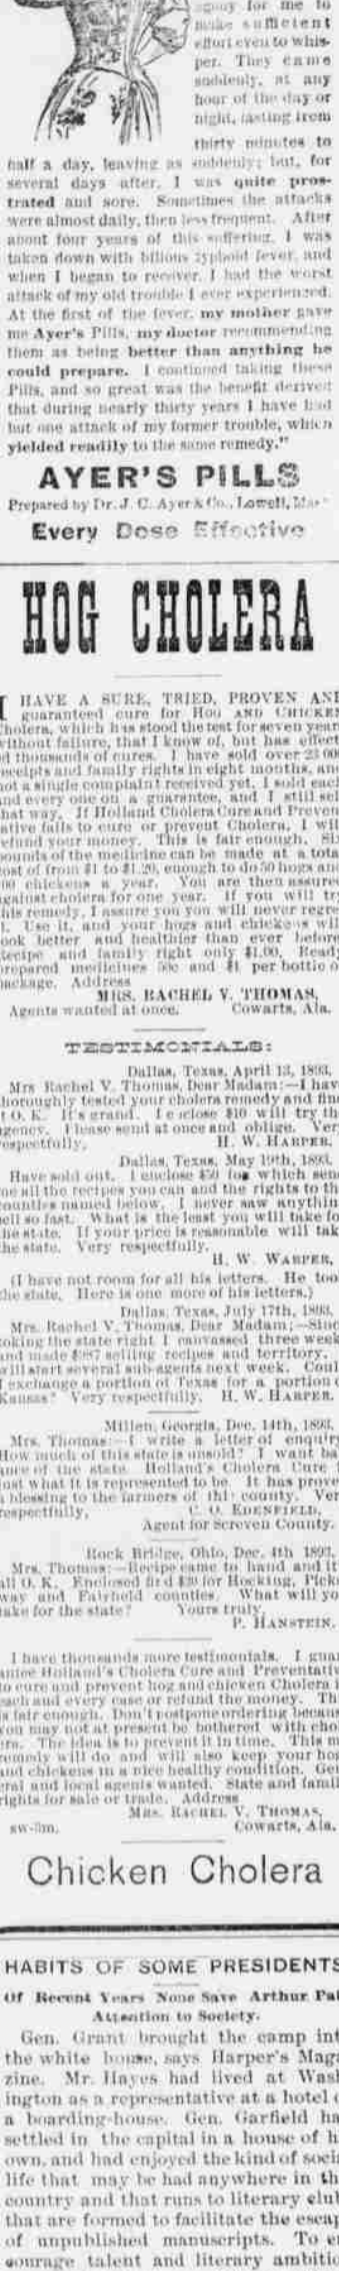

FOR SALE—A thoroughbred registered Hereford bull—Maywood, No. 28,606. This bull was bred in Illinois by Geo. T. Baker, and is just the animal you need to breed wool that will bring a good price. I will sell cheap as I have another of same stock; or will trade for good mink cows.
