PATENTS!

NOTICE TO INVENTORS.

There was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of meakind in the factory and workshop, the household and on the farm, as well as in official life, require continual accessions to the appurtenance and impliments of each in order to saye labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who being on the alert, and ready to perceive the existing deficiencies, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skillful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employ ment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who entrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, and general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Conpany is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepare and prosecute applications generally, including me-chanical inventions, design patents, trade-marks, labels, copyrights, interferences. infringements, validity reports, and gives especial attenion to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents.
