of responsibility weigh more heavily, search for monazite is now being proslooked as if they were almost tired even ecuted in the Piedmont section of of life, and why should they not, since North and South Carolina is something the constitution, which has been for so remarkable. Men, women and chillong a time the bond of the union, has dren talk about it, dream about it, been so grossly set aside as to deny the search for it, and would perhaps eat it right of one of her citizens to a fair and impartial trial prior to robbing him of his liberty, and the burden of taxation bas, by a decision of the supreme court, been squarely thrown upon the shoulders of the laboring man, whom we used to think was the nerve and backbone of every society. But perhaps Washington, Jefferson, Clay, Webster, Lincoln to millions of dollars annually. and a host of others were all wrong

In like manner gold miners year while our school books only taught a after year in their search for gold along the streams of this Piedmont section have been finding in their pans a heavy yellowish sand which they cast aside as worthless. This has all lation of vast wealth. But if such was been completely reversed in the last the case, then our government lived a twenty months, and nowadays a prospector will cast aside fair specimens of gold while prosecuting his search for monazite. To obtain monazite from the hundred little streams that are found in the monazite belt the prospector sets out provided with shovel and pan. With his shovel he scoops out a hole in the bed of the stream or near by it. He heart begins to swell with emotions and goes through the alluvial deposit until he strikes a whitish sand and gravel. Of this he takes a panful and washes it beware how you vote lest you bring out, carefully examining quality and interior quantity. After prospecting in several feasible. different places, he is able to decide whether the "branch," as these small what we may expect if we allow the worth working. If it promises well a

Common, unskilled laborers are employed to do the work. "Strippers" day; the crushing power of the banking are the hands who clear away the top soil, removing all timber growing stealthy strides of slavery following upon and gravel. The gravel gang comes our tracks. Since the money power is next. They carefully lift out all of the second washing, and the material left

day labor now. The sand is about as current as gold dust, six cents a pound being the average price. It is estimated that a group of well-managed hands will make twice their daily wages. Letters of inquiry come from all countries seeking information about monazite, and, judging by the number and character of these received by the geological survey from varjous European countries, the industry and the amount of money brought into this Piedmont section for monazite this year will hardly amount the number seeking a better and more to less than one hundred thousand doiprosperous clime. But this is not the lars. Monazite has been found in small quantities in Russia, Norway, Bohemia, and in gold washings in Brazil and in the mica veins at Quebec, but nowhere has it been found in such

brave and the land of the free. So st enormous quantities as in this belt. occurs to us that it would have been much better for Mr. Hoskins to have given a brief account of the mountain in this country. The value of sand decelebration. Telling of the pleasant shade and the cool and refreshing mountain water, that it was his Godgiven privilege to er joy. And to Lave informed the public that the same patriot ism and loyalty to our flag and country existed up there as in the fairest city of tus, our native land. Think how much

The finding of monazite is the best thing that has ever occurred for the poorer people of the section in which it is found. Hundreds of day laborers are now feeding their families with the money made in this industry.

The United States has been making exhaustive trials of a gun 50 per cent. that they steal it. Over 409 cotton known as cummenrite. The air guns of the Vesuvius were designed for discharging emmenrite shells, but they did not prove satisfactory. Recently emmenrite has been successfully fired from a high-power gun with a velocity of over two thousand feet.

The North our moyet; South

For the past forty or fifty years the geographers and astronomers have suspected that on account of a "tilting" in the earth's axis, the latitude of all places on the earth's surface is gradually changing. A few years ago (1892) the astronomers decided to make a "test case" of the matter, and now report that the theory is correct. For example, they have proven that Berlin was templer, 1001, than it was in Murch of the many year. If Penry and Welliam will only be patient the pole will come
