TRICKS OF A HYPNOTIST.

A Professional Subject Fools Number of Physicians.

He Goes Through All the Catalogue of Manifestations and Laughs at the Ef-forts of the Mesmerisers-In. sensibility to Pain.

Mr. Ernest Hart, editor of the Lon don Medical Journal, reveals many of the tricks of professional hypnotists in an article in the Century, entitled "The Eternal Gullible." After quoting literally from the confession made to him CURES CANCER, by a hypnotic subject, L., Mr. Hart continues: Being curious to study the technic of

so exceptionally gifted an artist as "L.," I accepted his offer, to use his own elegant language: "To give a show at my house." I invited several medical acquaintances interested in hypnotism, including Dr. J. Milne Bramwell, Dr. Hack Tuke, Dr. Outterson Wood, Surgeon Colonel J. B. Hamilton, Mr. Wingfield and others, to be present on the occasion. L. brought two other subjects with him, one of these was introduced by him as his cousin, but there was so strong a family likeness between the three that they might easily have passed for brothers. There are few people who, as Sydney Smith said of Francis Horner, "have the ten St. Paul Kansas City of the set of the fault of these commandments written on their faces." ingenious youths that their physiognomy is not exactly, to put it delicately, such as would generally be accepted as a guarantee of good faith. They went through all their ordinary "platform" business, simulating the hypnotic sleep, perfoming various antics "under control," and in particular "going through catalepsy," to use my friend's

Not the least interesting part of the 'show" was the preliminary hypnotization of L. by the demonstrator of physiology already referred to, whose eyes had not yet been opened to the fact that he had been imposed upon. When he commanded L. to "sleep," the latter obediently did so, with all the usual appearances of profound hypnotization, muscular relaxation, facial congestion, upturned eyeballs, not moving when touched, apparent insensibility, stertor, insensibility to sound, light, and external stimuli. The performance was splendid and complete. Mr. - enjoyed a moment's triumph. But L. instantly woke up again with a leer as soon as the operator announced that he was "under influence." Mr. - made several further attempts to

hypnotize his former subject, each time with the same result. The situation was comic, yet had in it an element of pathos; the operator was so earnest a believer that the shock of his awakening was almost painful to witness. L.'s performance was not destitute of

merit, but to the critical judgment it left a good deal to be desired. He overdid his part, the congestion of his face being exaggerated to a degree almost suggestive of impending apoplexy, while his snoring somewhat overstepped the modesty of nature. These points were dwelt on by more than one of the gentlemen present, but I am not altogether free from a suspicion that in some of the cases at least the observation was of an ex-post-facto na-

One of L.'s companions seemed to me any illusion there might have been by unexpectedly gripping him behind the were well calculated to tickle the groundlings in a music hall, but could hardly have deceived any serious oblifted in one piece like an Egyptian mummy. He lay with his head on the back of one chair, and his heels on another, and allowed a fairly heavy man to sit on his stomach; it seemed to me, however, that he was here within a "straw" or two of the limits of his endurance. The "blister trick," spoken of by Truth as having deceived some medical men, was done by rapidly biting and sucking the skin of the wrist. L did manage with some difficulty to raise a slight swelling, but the marks

of the teeth were plainly visible. One point in L.'s exhibition which was undoubtedly genuine was his remarkable and stoical endurance of pain. He stood before us smiling and tropics. open-eyed while he ran long needles into the fleshy parts of his arms and legs without flinching, and he allowed one of the gentlemen present to pinch his skin in different parts with strong crenated pincers in a manner which bruised it, and which to most people allowed no sign of suffering or discomsaid that this merely shows that in L. that of the average man. At any rate, his performance in this respect was so remarkable that some of the gentlemen supposed "post-hypnotic suggestion," and his comrades hypnotized one another, and thus made themselves insensible to pain.

BABY-SAVING MACHINE.

A Cradle in a Miniature Hot Room That Has Had Wonderfut Besults. There is now being exhibited in Lyons, France, a queer machine that has been adopted by the government in the Public Maternity hospital in that city. It is an apparatus for saving the life of young babies, and the success it

has attained there recommends it strongly here. Over two bundred and fifty thousand bables, aged less than one year each,

less susceptible, and the irregularity of temperature for these little beings while their organs are in process of formation or strengthening is the principal cause of the loss sustained by the thousands of families in this country. The machine is merely a large box nade from galvanized zine and standing on iron legs. The construction provides for perfect ventilation and absolute purity of air. There are no angles or interstices inside where poionous germs might find lodgment, and a thermometer in suspended inside the A company has been formed in New class front, so the actual temperature Zealand to establish a whale station is regular and always high, generally on the Kermadec islands, in the Pacific one handred and twenty degrees, or ocean, northwest of New Zealand. a sign green for very young babies, and

CURES SCROFULA. BLOOD POISON.

ECZEMA, TETTER.

BLOOD

so graduated down, as the infant be comes older and stronger. The required degree is obtained automatically, and the heated air is created by gas petroleum or electricity.

The babies lie or sit in a cradle, sus pended like a hammock inside the machine, and the most scrupulous attention is given the cradle and its surroundings, so it is as neat as anything can be. Dr. Lion, the inventor, says the oldest child treated by this apparatus was six and one-half months, and had been brought up from birth in this way. The doctor claims the child was nearly dead when born, and had it not been for this treatment it would not have survived at all.

The appearance of the babies is said to be exceedingly interesting and charming. They look so perfectly fresh and rosy and seem to enjoy thoroughly the warm climate in which they find themselves.

Dr. Lion claims that during the three years he has been perfecting this machine he has saved three hundred babies that would otherwise have died, and this is eighty per cent. of the entire number brought to him. He believes that had these infants been left to the ordinary treatment, not one would have survived.

INSECTS IN MEXICO.

A Town Where Deadly Ants Terrify the People. In Guerrero the tarantula is some

times found there as big as a man's two fists. Scorpions are of all sizes, but the ope which does the most harm by its bite is a smallish gray creature. The larger ones bite so hard that the blood flows freely, and the infected poison flows off. There is a little snake called the corallilo, which is particularly fond of getting indoors and nesting in one's boots. Its bite is fatal. Boots should always be inspected for corallilos before they are put on-in Guerrero. If a scorpion creeps on the face or hands, the person so visited should carefully refrain from making any movement; he should allow the horrible insect to crawl just where it will. If it is not disturbed, in all likelihood it will do no harm; if it is attacked it is quite sure to

The worst terror to the people of Guerrero, says the Boston Herald, is neither snakes nor scorpions, but the red ants. Before these insects the people flee in terror from their houses te the hypnotic sleep better | They leave nothing behind if they can than he did, but L. at once dispelled | help it. An Indian woman rushed out of her cabin with her children on the coming of the auts being announced. knee. Some exhibitions of "post-hyp- In her terror she left her baby behind notic suggestion" given by the two the house swinging in a hammock. It was hoped that it would escape, but when the ants had departed the mother found that the insects had crept down server. The "catalepsy business" had the cords of the hammock, and had more artistic merit. So rigid did L. left of the unfortunate child nothing make his muscles that he could be but its bones. On some of the Guerrero sugar estates great, lazy-looking snakes are kept in the storerooms to keep rats and mice away from the sugar loaves. These snakes are repulsive in appearance, but harmless to human beings. Not all the places in Mexico, however, which have an agreeable climate are cursed with insects and reptilian pests. Such places as Cuernavaca, in the state of Morelos, are too high above the hot plains to suffer from venomous insects, and yet so much below the cold tableland that the climate is a perpetual summer. Cuernavaca unites many of the advantages of the temperate zone with all that is delightful and alluring in the

AN ATTRACTIVE HAT.

A Forgetful Preacher Did Not Remove the Wrapping Paper. A distinguished preacher of some

what arbitrary manners was engaged to preach in Belgravia, and purchased would have caused intense pain. L. a new hat for the occasion, says Pearson's Weekly. He was met outside his fort to appear; he did not set his teeth | residence by a young man who was to or wince; his pulse was not quickened, guide him to the church. His guide, and the pupil of his eye did not dilate after what the parson thought a rude as physiologists tell us it does when stare and smile, said: "I beg your par-pain passes a certain limit. It may be don, sir, but your hat..."

"Oh, yes! never mind the hat, but the limit of endurance was beyond the mind your own business," the parson normal standard, or, in other words, interrupted curtly; and the young man that his sensitiveness was less than was silenced. The people they met stared and smiled too.

"Strange how many people notice when one has got a new hat," thought present were fain to explain it by a the parson. The church was reached and the worshipers approaching natutheory apparently being that L. rally turned to observe the noted preacher.

The vicar met him at the vestry door to welcome him, but, hesitating, said: Pardon me, canon, but pray, why do you wear your hat so?" The tile was doffed and the outside

found to be still covered with white paper which the absent-minded divine had not removed.

Suckien's Arnica Salve. The best salve in the world for cuts,

Bruises, Sores, Ulcers, Balt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblams, Corns, and all skin eruptions die annually in the United States, says the New York Press.

The mortal enemy of babyhood is cold. To that all children are more or less susceptible, and the irregularity of T. W. Ayers, Jr.

Probably not many women know where the powder puffs with which alabaster brows and blushing checks are produced come from. There is a place in Chicago where some nimble fingered girls are engaged all the year round in making them. The material is the soft, fluffy down from orgueta or young swans, and it comes largely from the islands of the Baltic sea.

Is one of the very best wheels ever made is an indisputable fact. It stands in the ront rank with all high grade machines, and if you buy one you will make no mistake. Ridea RAMBLER BICYCLE if you want to be happy, for should your wheel be unctured, it can be mended by you in five minutes, as it is equipped with the world enowned G. & J. clincher tires with wood rims or copper-plated steel rims.
