SIMMONS REGULATOR

GOOD FOR EVERYBODY

Almost everybody takes some laxative medicine to cleanse the system and keep the blood pure. Those who take SIMMONS LIVER REGULATOR (liquid or powder) get all the benefits of a mild and pleasant laxative and tonic that purifies the blood and strengthens the whole system. And more than this: SIMMONS LIVER REGU-LATOR regulates the Liver, keeps it active and healthy, and when the Liver is in good condition you find yourself free from Malaria, Biliousness, Indigestion, Sick-Headache and Constipation, and rid of that worn out and debilitated feeling. These are all caused by a sluggish Liver. Good digestion and freedom from stomach troubles will only be had when the liver is properly at work. If troubled with any of these complaints, try SIMMONS LIVER REGULATOR. The King of Liver Medi-cines, and Better than Pills.

CHEE FOO, CHINA.

The Oriental Watering Place Where the Recent Treaty Was Signed. Chee-Foo, where the treaty of peace was signed between China and Japan, and which also goes by the name of Yen-Tai, is one of the best known ports in the northeastern part of China. It is situated at the head of one of the bays of the Gulf of Petchili and is in the neighborhood of two of the most prominent places in the recent Chino-Japanese war. It was here that the peace of 1876 between England and China was signed; by which three new ports of entry were opened to foreign commerce. The signing of the treaty on the 8th of last May between the two inimical brothers of the far orient has given Chee-Foo a new historical importance. From June 8, 1850, until the Chino-European war, France had occupied Chee-Foo without any interference

from foreign powers. It is thickly populated, having one hundred and twenty thousand inhabitants, according to the consular reionable watering place like Trouville and Brighton. It is very attractive, with its villas with vine-enshrouded verandas clustering on the hillsides which overlook Semaphore Point or dotting the plain. Beside the signaltower a pretty pagoda rears its head. crowned by its cap with upturned wings. America and Russia send petroleum oil to Chee-Foo, England cottons and metals. The great article of

export is raw silk In the quarter facing the sea, in a small hotel, bearing the European name of Beach hotel, the peace treaty between the Chinese and Japanese plenipotentiaries was signed.

To Manufacture Glass Pipe. A new method of manufacturing glass pipe has been discovered which promhas hitherto been found impossible to while running into the mold, and the struction, takes place. structure of the tube was not homogeneous. The new method consists of using a mold with a movable piston. The piston is just enough smaller than the outer shell of the mold to allow for the thickness of the tube to be made. The piston is placed the bottom of the mold and as the molten glass is

WHAT IS ELECTRICITY?

the Various Theories on the Mysterious Current. Well, what is it? It is scarcely possible to say. There are theories-many of them. It is evidently something of which we cannot take a part; we canto analysis; nor can we pour a little of it into a bottle for future study and

contemplation. It is like the wind, its effects can be measured; its force. ports of 1891. In summer it is a fash- strength and quantity can now be calculated to a very nice degree. Still, to liken it to the wind, it is a stupendous power, a mighty typhoon, blowing, asit were, without moving, two ways at once along all parts of its path; giving off a halo of magnetism at right angles to that path everywhere.

One of the nicest theories, perhaps, is the one that considers electricity a "condition" of atoms, brought about by chemical action, as in a battery cell, or by what might be called a severe irritation of the magnetic halo, as in a dynamo, and by other means, such as heat and friction.

What this condition is is beyond us; it may be a violent rotation, or it may be an equally violent vibration of atoms; probably the arc light-would prove it to be a vibration. But as no man has seen an atom at any time, not ses to revolutionize that industry. It even with the most powerful microscope, it is impossible to say. Friction mold large glass tubes of any great in some form or other is present, as length because the glass would cool heat is produced before burning, or de-

> No Chance of Being Caught-Judge Andrews, of Georgia, used to tell an amusing story of the way in which he was once "taken down" by one of his audience during a political address. He was a candidate for governor of his state and was explaining to the crowd of people that had assembled to hear him how his friends had pressed him to be a candidate and that the office was seeking him; he was not seeking the office. "In fact," he exclaimed, "the office of governor has been following me for the last ten years!" At this point a tall countrynan at the rear of the audience rose. 'But here's yer consolation, judge," he shouted. "You're gainin' on it all the voked at the time of its utterance.

Y., who had for a number of years been everything else then bought one bottle to swallow all sorts of indigestible sub-stances. IN A REAL GRAVE.

Booth's Experience on a Stage in a Moun

tain Side Town. "I once produced Yorick's skull from a real grave," remarked a Chicago theater man recently. "It was years ago, in Virginia City, Nev., when that was a not cut a piece of it off and subject it great mining camp and a stock company was maintained at Piper's opera house on B street. The theater was built-the whole town was on the steep side of Mount Davidson. A street was thirty or forty feet higher than B street, so they had to blast out rock to make a level for the theater. The stage rested square on rock. We got along very well until Booth came there and 'Hamlet' was to be produced. Of course, we could not get along without a grave, so a section of the stage was sawed out and some workmen with crowbars and

picks dug down about three feet. "Booth knew nothing about this until the grave digger's scene was on. I was the first grave digger, and as Hamlet approached I lifted my pick and began digging for keeps. You know we usually lift the pick aloft and 'do business' of digging, letting the pick fall lightly on a box of earth, which is on the trap platform where we stand. But I pitched in and picked like a good fellow and when Booth heard the steel ring out from my hard the honest rock he was the most surprised-looking Hamlet I ever say. He got between the grave and the footlights, facing up-stage, and looked

down into my real grave with a puzzled smile, and whispered: " 'We're going in for Shakespearean realism,' I whispered back, throwing out a shovelful of rock I had loosened. "Boot went on with the scene all

A DUG'S QUEER TRICK.

Evidence of Reasoning Power Shown in His Actions.

A dog and horse owned by Col. W. J. rick of that city, afford the neighbors considerable amusement. The animals are companions and full of intelligence. gave him a dose of Chamberlain's Colic, legged nightgowns it became apparent | tie all sorts of knots, and unless the overpowering temptations in the way pays no attention to his barking or in the hard times perhaps will shrink sharp nippings, but keeps trespassing on the colonel's lawn or that of neighbors without discrimination. After trying by all manner of stratagems to get the horse back into the stable where he belongs, the dog will give up and have enough left over to clothe a the job in disgust, rush into the house, and by barking or dragging at the dress of some of the lady members of the family, entire them to the window or yard, and as plainly as if he told in words abow that the horse is in mischief. This performance has been repeated a dozen times during the summer and in no case has the dog begged outside assistance until he had tried by every effort of his own to persuade his

companion to return to the stable.

An English literary man who was on the verge of bringing out a book at the Pitt press ordered his proofs to be sent to him at a house where he was engaged to dipe out, intending to look them over in the half hour after dinner. The printer's boy, however, was late in bringing them, and the gentlemen had already rejoined the ladies in the drawing-room, when the company was electrified by hearing the sonorous voice of the butler announcing: "The devil from the Pitt has come for Mr.

Two Lives Saved.

Mrs. Phoebs Thomas, of Junction City, Ill., was told by her doctors she had constimption and that there was no hope time! It'll never catch you!" This for her but two bottles of Dr. King's cheering prophecy proved to be quite correct, in spite of the mirth it pro-Eggers, 130 Florida St., San Francisco, suffered from a dreadful cold, approach-In 1892 a woman died at Albany, N. ing consumption, iried without result consessed with an uncontrollable desire of Dr. King's New Discovery and in two

> Messey Strack by Lightning. Fragments of a two-dollar treasury note were presented at the subtreasury

the Baltimore San. "This was struck by lightning," he anid, as he exhibited the two pieces of the note. The note had apparently been trurned lengthwise through the middle, leaving the top and bottom margins. The burned portion that was missing was from a half to opened a half inches wide. The adgree of the remaining parts were charred. The man said his house in ning, that the note was in a suphoard at
