A WOOL MARKET. PENDLETON

This has become an established market for Eastern Oregon, Washington and Idaho wools. Last season three million pounds were received here by rail from Huntington, Baker City, Heppner, Arlington, and from Yakima, Spokane, Lewiston, Walla Walla and

Low freight rates are given on shipments to Pendleton for scouring and packing in transit. Many of the leading buyers make this place headquarters, and all large operators frequently visit Pendleton warehouses. As a market this place is equalled only by The Dailes in quantity of wool which attracts competition, with this advantage:

From no point in the Northwest, Portland included, is wool shipped East at less expense than from Pendleton.

Water competition has not afforded sufficiently low rates upon wool in the grease and dirt, to equal the lower expense incurred by shipping only clean, scoured wool from Pendleton.

Owing to this fact Pendleton buyers are enabled to pay as much or more for wool at this point than is averaged at other places having reputations as "high markets," based upon exceptional sales of fancy lots of light wools. Considering character of wool, and shrinkage, it may safely be claimed that the average sales in Pendleton

Net the Grower more Cash for the same amount of wool than can be obtained in any other Market in

Notions a Specialty, below her on the list.

only means of saving life, but such cases are exceedingly rare. So many deaths occur under these conditions, however, that the public is beginning to realize that the doctors are too hasty in resorting to the knife, and if such a state of affairs continues, there will before long be a general uprising against such measures. It is but reasonable to believe that the majority of operations are unnecessary, but when the fatal mistake is discovered too late, only the doctors ever know of their error, and though a precious life is given up, the public is assured that death would have resulted in spite of the operation, and who is ever the wiser?

MR. WILLIAM WALPOLE.

To submit to an operation, is to volunplanter residing at Walshtown, South Dakota, and is well known all over the state. Under date of January 20th, 1896, he writes; "About three years ago, there came under my left eye a little blotch about the size of a small pea. It grew rapidly, and for the past year, shooting pains ran in every direction. I became alarmed and consulted a good doctor, who pronounced it cancer, and said that it was done." He hopped around in very settive fashion until he succeeded in flamed you have a rumbling sound or flamed you have a rumbling sound or stimust be cut out. This I would not consent to, having little faith in the indiscriminate use of the knife, though I was alarmed at my condition. Reading of the many cures made by S.S.s. I determined to give that medicine a trial, and after I had taken it a few days, the cancer became irritated and began to discharge. This after awhile cased, leaving a small scab, which finally dropped off, and only a healthy looking little scar remained to mark the place where the destroyer had held full sway .Words are inadequate to express my gratitude to the great blood purifier, S. S., and office of president, but he allows them within hoping that it may be the means of leading other sufferers to a cure."

Cancer is not incurable, but the only means of curing it is to rid the blood of the disease. S.S.S. never fails to do this, but it is the only remedy to be relied upon. It is guaranteed purely vegetable, and cures Cancer, Scrofula, Eczema, Catarrh, Rheumatism and any other disease of the blood. Other blood diseases of the bl

the committee was too much for the opposition. The Yaquina contract was retained and the bill left the senate committee with an increase over the amount carried by the house bill of over two million dollars. How much, if any, Oregon will lase by smendments in the senate or will have to give away in the conference committee is a matter only time can decide, but her chances in these particulars are at least as good if not better than those of her sister states.

The use of the surgeon's knife is becoming so general, resulting fatally in such a large number of cases, as to occasion general alarm. The press almost daily announces the death of some unfortunate whose system could not withstand the shock of an operation, and whose life was cruelly sacrificed to the keen blade of the surgeon.

Of course, in some instances an operation is necessary, and is the only means of saving life, but such cases are exceedingly rare. So many deaths are exceedingly rare. So many deaths are exceedingly rare. So many deaths of his matters. Sen. Dolph used to over-The folly of resorting to the knife in awe his brethren on the committee, The folly of resorting to the knife in cases of cancer, is demonstrated every time it is undertaken. The disease is in the blood and the cancer or sore is but the outward manifestation of a terrible condition of the entire circulation. To cut out this sore, therefore, does not in any way effect the disease, and it can easily be seen that the only correct treatment is to get at the seat of the disease, and purify the blood; the sore will then heal up naturally. S.S.S. is the most powerful blood remedy made, and is the only cure for cancer. respect it would be difficult to flud a platforms, as proclaimed on the stump cessor. Sen. McBride accomplishes his ends through the use of diplomacy and discriminating tact. Judging by the work already accomplished by him his his methods appear to be as successint party, but having an abiding confidence and kept him free from the antagonism, friction and disagreeable incident that comprise the rank and file of the repubalways accompany the use of forcewhither it be mental, physical or any other kind of force.

I have said that Sen. McBride never follow its example. eft his seat while the committee on tarily endanger one's life, without the slightest hope of being benefitted.
