## INCREDULOUS ELDERS.

That May Be Dispelled by the

According to a story which comes up om Capt. Hal Tabb Walker, a promient planter of Georgia and a resident of Atlanta, there is much need of onlightenment in the southern portion of the state. It seems that a man living in that section was sent on some mission up to Atlanta during the month of July last. While there he saw and was much interested in the making of arti-

Returning home he told of this to his friends, and for all the fact that he is a good church member and up to that time had been a highly respected citizen of the community, he was at once looked upon with suspicion. The feeling ran so high against him for telling and persisting in telling that men, common mortals, were making ice in the hot month of July, something they declared the Lord could not do, that he NORTHERN Ry. . PACIFIC RY. was threatened with expulsion from the church.

He did his best to defend himself, and at last suggested that a delegation of the most reputable church members go with him to Atlanta, where, he asserted, he would prove his statement to their entire satisfaction. The elders, willing to give him a chance, did select a committee, which with the accused proceeded to Atlanta, and there, of course, they saw that their brother was right and that men, common mortals, did make ice in July.

They all returned home and as quicky as possible a meeting was called to hear the report. When the elders heard the delegation declare, as had the brother before it, that ice was really made in Atlanta in July they arose in their wrath and churched the whole lot of them.

## TREE-CLIMBING RABBITS.

Sheep That Love Snalls and Insectivoro Birds That Feed on Grain. It seems almost a stretch of the im igination to think of rabbits climbing trees. Yet in Australia many rabbits

have somehow acquired the tree-climbing habit, having been forced, on account of the persecutions of dogs and other animals, to drop burrowing and imitate squirrels. An Australian sent on to England re-

cently the two front feet of a rabbit that had been killed on an acacia, three yards from the ground, and he wrote in his letter that this was not at all a remarkable thing, and he had often found them, or at least the traces of their claws, on the bark of trees four, five and six yards high

For a parrot to eat sheep is another remarkable thing, and yet the kea of New Zealand has become a sheep eater. having changed to this article of food

from a purely vegetable diet. The tradition of the island is that at one time these parrots were unable to obtain their usual supply of vegetable food and that in desperation they invaded the "drying rooms" and ate whatever came to hand, finding sheep meat agreeable.

In Iceland almost all the horses are fish eaters, for the reason that grain is President Harrison, scarce there and fish is plentiful. In England sheep are known who delight in snails. The observation of this fact is not new; it dates back one hun-

dred and fifty years. It is well known that a large number of insectivorous birds become grain eaters whenever they find that they cannot procure their ordinary diet of

The Republicans of the United States, esembled by their representatatives in national convention, appealing for popular and historical justification of their claims to the matchless achievements of 30 years of Republican rule, earnestly and confidently address themselves to the awakened intelligence, experience and conscience of their countrymen in

calemitous consequences of full and un- labor employed in American shippards, restricted Democratic control of the government. It has been a record of disaster. In administrative management foreign commerce. it has ruthlessly sacrificed indispensible revenue, entailed an increasing deficit, eked out ordinary current expenses with borrowed money, piled up the public debt by \$262,000,000 in time of peace, forced an adverse balance of trade, kept perpetual menace hanging over the redemption fund, pawned American credit to alien syndicates and reversed all the measures and results of successful Republican rule. In the broad effect of its policy it has precipitated paule, blighted industry and trade with prolonged depression, closed factories, reduced work and wages, halted enterprise and crippled American production while stimuating foreign production for the American market. Every consideration of public safety and individual interest lemands that the government shall be escued from the hands of those who have shown themselves incapable to conduct it without disaster at bome and lishonor abroad, and shall be restored to the party which for 30 years administered it with unequaled success and prosperity; and in this connection we heartily indorse the wisdom, patriotism and success of the administration of
