FINDING HIS BRIDE.

Quaint Custom That Prevalls in Por-

The custom of throwing obstacles in the pathway of the bridegroom, as a relude to the marriage ceremony, is of very ancient origin, says the Youth's ompanion. Mythology has its tales of uitors whose courage and skill were tested before they were allowed to take their brides; in certain remote districts, even in civilized lands, some form of such usages still exists. Says the author of "The Swins Republic:"

In one part of the Canton of Ticino, . ery quaint marriage ceremony pre-The bridegroom dresses in 'Sunday best," and, accompanied by as nany friends and reintives as he can nuster for the fete, goes to elaim his bride.

Finding the door locked, he demands dmittance: the inmutes ask him his business, and in reply he solicits the hand of his chosen malden.

If his answer be deemed satisfactory, he is successively introduced to a number of matrons and maids, some perhaps deformed, and others old and agly. Then he is presented to some large dells, all of which he rejects with scorn, unid general merriment, The hewildered briderroom, whose imsetnosity and temper are now sorely tried, is then informed that his ladylove is absent, and invited in to see for himself.

He rushes into the house, and warehes from room to room, until he ands her in her bridal dress, ready to go to church. Then are his troubles ver, and his state as a benedict as-

In April last, Mr. Henry M. Stanley wrote to the peace association a letter in which he attributed the increase of trade in 1892 at African ports under German administration to the growing practice among German merchants of importing into Africa small arms and ammunition. These materials of war,

which was under the command of Freiherr von Stetten, proceeded from the Cameroons coast up the river Sannaga to Balinga, whence it traveled to the thickly populated district of Tikar and reached Ngaudere and Yola. Treaties were concluded with the native tribes in the districts passed English boy while at the adolescent through. This reappearance on the coast, the Kreuz Zeitung pointed out, was peculiar in view of the statement made by merabers of the expedition called a cheerful stole; m. THE CAMEROONS.

A Country That Is Giving Germany Much Trouble.

An African Territory About Which the English Government Is Vitally Concerned-The Dispute About Its Boundaries.

"Battle in the Cameroons," says a recent cable. What and where are the Cameroons? This from the New York

Herald will elucidate a little: The Cameroons is a territory on the Bight of Biafra, West Africa, one hundred and fifty thousand square miles in extent, and with an estimated population of two millions. It has a coast line of one hundred and twenty miles between the Campo river and the Rio del Rey, is bounded on the northeast by a treaty line running northeast to the east of Yola, on the upper Benue, and on the south by a line running inland, due east from the mouth of the Campo river, to about the meridian of longitude fifteen degrees east, which may be regarded as the eastern or inland limit of the so-called "pro

In 1892 there were one hundred and sixty-six whites, of whom one hundred and nine were German and thirty-one English. It became a German protectorate in 1884, and is placed under an imperial governor, assisted by a chancellor, two secretaries and a local council of three representative merchants. The country is fertile, and numerous valuable African vegetable principal native settlements. The im-

England and Germany had a long dispute about the boundaries of the Cameroons, which was settled in May last. The third section of the agree ment reads: "The German colonial administration engages not to allow any trade settlements to exist or be erceted on the right bank of the Ric del Pey Creek or waterway. In like manner the administration of the Oil rivers protectorate engages not to allow any trade settlements to exist or to be creeted on the western bank of the Bakassy peninsula from the first creek below Arabon's village to the sea and eastward from this bank to

intended to enable the British and German administrations to cope with the wide pread sunsering, which was especially detrimental to the Cameroons. There had been no question of altering the frontier laid down by the provisional agreement of 1899, which, in consequence of disagreement between the two governments, left the Rio del Rey out of count and settled the frontier as a straight line running from the upper end of the waterway to the rapids of the Cross river. But this indefinite "upper end" has now been fixed as above set forth. Much satisfaction was expressed in Berlin at the pledge given by the English government not to allow trade settlements on the Balcassy peninsula, which otherwise would have afforded an excellent base for contraband operations.

Dr. Heylin, in his "Life of King Charles," records that during the reign of Cheen Elizabeth "there was one who wrote the ten commandments, the creed, the Pater Noster, the queen's name and the prayer of our Lord within the compass of a penny, and gave her majesty a pair of spectacles of such an artificial making that by the help thereof she did plainly and distinctly discern every letter," says the London Bookworm. A somewhat similar feat was that "rare piece of work brought to pass by Peter Bales, an Englishman, who also exhibited before her majesty the entire Bible written in a book containing as many leaves as a full-sized edition, but fitting into a walnut."

In St. John's college, Oxford, is pre-served a portrait of Charles I., in which the engraver's lines, as they seem to be, are really microscopic writing, the face alone containing all the book of Psalms, with the creeds and several the mountainside.
