McClure's Magazine

For 1897

SEVEN GREAT SERIALS

A New Life of Grant by HAMILTON GARLAND. The first authoritative and adequate Life of Grant ever published. (Begins in December).

Rudyard Kipling's first American serial, "Captains Courageous." (Begins in November).

Robert Louis Stevenson's "St. Ives." The only novel of Stevenson's still unpublished. (Begins in May).

Charles A. Dana, "Recollections of War Time." Mr. Dana was for three of the most critical years of the Civil War practically a member of Lincoln's Cabinet, and is probably better fitted than any other man living to give an authoritative history of this period from his recollections and correspondence.

Portraits of Great Americans. Many of them unpublished. In connection with this series of portraits it is intended to publish special biographical studies under the general title of MAKERS OF THE UNION from Washington to Lincoln.

Pictures of Palestine. Specially taken under the editor's direction.

Stories of Adventure. A serial by CONAN DOYLE, in which he will use his extraordinary talent for mystery and ingenuity which have, in the "Sherlock Holmes" stories, given him a place beside Poe and Gaboriau.

IAN MACGAREN. All the fiction that he will write during the coming year, with the exception of two contributions to another publication which were engaged from him long ago, will appear in McClure's Magazine.

JOEL CHANDLER HARRIS. A series of new animal stories in the same field as the "Brer Rabbit" and the "Little Mr. Thimblefinger" stories.

RUDYARD KIPLING. Besides "Captains Courageous," Kipling will contribute to McClure's all the short stories he will write during the coming year.

OCTAVE TRUDET is preparing for the Magazine a series of short stories in which the same characters will appear, although each will be complete in itself.

Anthony Hope Bret Harte Robert Barr Frank R. Stockton Stanley Weyman Clark Russell

These are only a small fraction of the great and important features of McClure's Magazine for 1897. The subscription price of which is only

One Dollar a Year

The S. S. McClure Co., New York.

The new volume begins with November. Subscriptions should start with this number.

For \$5.00

AN UNPARALLELED OFFER

To be educated one must read the best literature. The best literature is expensive.

Leslie's Illustrated Weekly, Published at 100 Fifth Avenue, New York, is full of the best things. Its illustrations are superb; its stories charming; and its literary departments are edited with consummate skill.

Such a paper is a great popular educator. It should be in every home.

The subscription price of Leslie's is \$4 per annum. We make the unparalleled offer of a copy of

Leslie's Illustrated Weekly and our Semi-Weekly one year for only \$5.00.

No such offer was ever made before. No such offer will ever be made again. These two papers make a most acceptable Christmas or birthday gift, and will be constant reminders of the giver's kindness.

Remit by postal order or check to the

GAZETTE, Heppner, Oregon.

HOW LAKE TAHOE WAS FORMED.

The Results of Volcanic Eruption in an Age Long Gone By.

Maj. J. W. Powell, director of the United States geological survey, thus describes the origin of Lake Tahoe: "In geographical times not long ago, as speaks the scientist, but very long ago, as speaks the chronicler of human follies, there was a deep valley on the eastern slope of the Sierra Nevada at the headwaters of the Truckee river. About this valley towered granite mountains. But earthquakes came, and rents were opened in the rocks, and from the fissures poured monstrous streams of lava. One of these fissures crossed the lower end of the valley, and through it poured floods of molten rocks. Stream after stream issued, to cool in solid sheets and blocks, until a wall was built across the valley two or three thousand feet in height, and above it was a deep lava flow or six hundred square miles in area. The storms that fell on the granite and volcanic mountains melted in rivers to fill the basin, and Lake Tahoe was created. When filled at last its waters overflowed the rim of lava, and the Truckee river now springs from the Tahoe fountain. Its deep waters are dark with probability, like the clouds of a stormy sky, but about its shores a few shallow bays are found, and emerald shallows like fountains of beauty, encircle the deeper and more sombre lake. Back from the waters forest-clad slopes rise toward the heavens, and above are seen naked crags and domes of granite."

Beginning with the fifty fifth volume, the paper will assume the regular magazine size, which will add greatly to its convenience and attractiveness. The Outlook is published every Saturday-Sunday two issues a year. The first issue in each month is an Illustrated Magazine Number, containing about twice as many pages as the ordinary issues, together with a large number of pictures.

The price of the Outlook is three dollars a year in advance, or less than a cent a day.

Send for a specimen copy and illustrated prospectus to The Outlook, 13 Astor Place, New York City.
