rought to its proper level. All articles manufactured by machinery have declined in price, for the reason that with each invention the To the reason that with each invention the cost of producing the article is lessened. Hut man genius has produced more results for cheapening production in the last 60 years than in all the ages of the world before that time. These grand triumphs of man over matter, instead of showing depression from a standard of value, show forth the glory and dignity of the human intellect, and are an unmixed blossing to the whole human family. Could any one outside of a lunatic asylum attribute all these diverse and inconsistent movements of prices to one cause, and that cause acting evenly and uniformly upon all things alike? What Makes Interest Low? Interest has declined since 1872 in my part of the country from 3 per cent per month to 5 and 8 per cent per annum. There is no denying the fact that the goldbugs did that. The south and west have saved more on the decline in wheat and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest in the decline in wheat and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest and cotton. Interest is always low under an honest in the decline in wheat and cotton. Interest is always low under an honest is and exter them." But it is even worse in the case of this mouse. The evil that it did not the safe of the soft is no hand to the safe of the soft and soft is the biography of the demonstization. for the reason that with each invention the cost of producing the article is lessened. Ha-man genius has produced more results for cheapening production in the last 50 years than in all the ages of the world before that time. These grand triumphs of man over mat-ter, instead of showing depression from a standard of value, show forth the glory and dignity of the human intellect, and are an un-mixed blossing to the whole human family. Could any one outside of a lunatic asylum at-tribute all these diverse and inconsistent dged to be the most thorough cure for th, Cold in Head and Hay Fever of all remedies. of interest than they have lost in the decline in wheat and cotton. Interest is always low under an honest standard, among an honest people, where money is plentiful. It is lower in London than in any other spot on the globe in London than in any other spot on the globe because her standard is stable and her com-mercial integrity has been the care of her statesmen and her people for ages past. Eng-land's punctuality in meeting her obligations has made London the clearing house of the world. Tyre was the London of ancient times. Seated on the eastern end of the Mediterra-nean, she reigned queen of commerce for cen-turies. The seater of commercial treatmest turies. The scepter of commercial greatness passed from her when her own children reared Carthage at the other end of that sea. Some Carthage at the other end of that sea. Some 300 years ago England planted colonies in America, and today the United States is Eng-land's only formidable rival for the com-merce of the world. The object lesson of an-cient history is being repeated. If the insati-able mine owners by use of their millions, and the place hunting demagoques by unctuous ap-peals to prejudice, succeed in driving this country from the standard of civilization and commerce, the standard that announces in-territy at home and inspires confidence It stands first among "weekly" papers in size, frequency of publication and treshness, variety and reliability of contents. It is practically a daily at the low price of a weekly; and its vast list of tegrity at home and inspires confidence abroad, to a fint standard and silver basis, then England will have no rival to grapple territory of the Union and foreign countries will youch for the accuracy and with her in the marts of the world.

More Gold and More Credits.

The third proposition is that the supply of gold is insufficient to make it a correct stand-ard and its scarcity will tend to depress prices. The average annual output of gold of the world for the first half of this century, in the world for the first half of this century, in round numbers, was \$15,000,000. From 1851 to 1865, covering the gold boom in California and Australia, the yearly average was \$180,000,000. The output for 1868 was \$155,000,000 and for 1894 The output for 1886 was \$155,000,000 and for 1894 \$181,000,000. The birth rate among gold using countries is not increasing, while the produc-tion of gold is on the increase, as just stated. This answer ought to satisfy even the extreme 16 to 1 people—the "per capita' Populist—es-pecially in view of the fact that improvements in power and machinery are being applied to the production of gold, while the genius of in-vention finds no inducement offered nor field for operation in the population business. My next answer is that the more highly en-lightened the world becomes, and the greater the improvements in business methods, the less necessity there is for the use of actual money of any kind. Steam and electricity money of any kind. Steam and endowing have so knitted civilized people together that they are practically one community. Business men speak to each other around the world as if they were assembled in the same building. Their business is done on a system of credits. without the use of money, except for ultimate settlement. Not is this method confined to business men. It is broadening with the evolution of man from a lower to a higher plane of intelligence. A farmer may now live for a whole year on the fat of the land and never

ENGLAND'S BEST SCOUT.

American Who Killed the The Great Matabele Doctor.

He Is a Fighter from Texas Engaged in South Africa-A Long Ride on Hos-

tile Soll-The Shooting of M'limo.

Wherever you go you find the American, and he is never in the rear ranks. The best scout in the Matabele war is an American, Burnham, a Texan, who wears a Texan sombrero and rides a Texas saddle. He fights for the pleas. ure of fighting. "His education and his natural powers of inductive reasoning," says an English newspaper correspondent, "raise him at once to a high rank among the scouts of this or any other country." Burnham's eyes are the wonder of all beholders. They are small,

roving, blue eyes. Women fall in love with them. Cecil Rhodes says they can

South Africa.

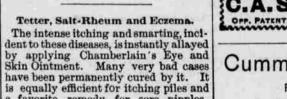

Burnham's greatest feat was the shooting of M'limo under circumstances that would have done credit to Davy Crockett. M'limo was the great witch

Women make the aerostats, or war balloons, used by the British government, and also do some part of the roping of the balloons. They work in sheds built specially for the purpose. There are about 35 women engaged, and all earn good wages. They are mostly the wives and daughters of soldiers, and have all been carefully trained by the superintendent of the balloon department. The making of the balloons requires a very delicate touch, one thin flim of bullock's skin baying to be laid over another with the greatest care. The ends of the ropes have also to be woven into each other with extraordinary deftness.

Isolated Weather Station

Rockall, a desolate granite rock ris ing only 70 feet above the sea, between Iceland and the Hebrides, is to be made an English meteorological station. It lies 250 miles from land, the neurest point to it being the little island of St. Kilda, 150 miles away, and itself nearly 100 miles from the main group of the and the station there would give timely

money has been contracted to that extent. In 1872 our population was 40,506,000 and our per empite of money was 40.70. In 1804, after the country had been suffering with gold standard for 21 years, our population is 68,275,000, and our per capita of money is \$55.44, and we have much better money new than he had then. The adoption of the gold standard as a meas-ure of value did not increase the domand for

A Surfeit of Silver.

Fourth proposition, that the free and unlim-ited coinage of silver at 16 to 1 would create unlimited demand for silver and restore it to indimited demand for sliver and restore it to a par. How the more coinage of sliver can in any way increase its use among the people I am unable to understand. If there was not enough of it for use as money and the govern-ment was limiting the coinage of it and there-by donying the people of the ame of it as money, then there would be force in the prop-cation to increase the coinage of allow. But our condition is exactly the reverse of that. The amount of coined and uncoined sliver in the treasury is \$312,000,000, while the amount in circulation is about \$107,000.

in circulation is about \$107,000,000. To encourage the use of silver by the people the government exchanges coined silver at its mints for gold or logal tender currency and pays the express charges on the silver to any part of the country. This coined silver is all good money. This coined silver is all good money. The dollars are legal tender for all dobts in any amount, and the halves, quar-ters and dimes are exchangeable in sums of \$20 for gold or other legal tenders. Notwith-standing the inducement offered by the gor-ernment to promote the use of silver, it has hitherto been unable to force into circulation more than about one fifth of its stock on hand. more than about one fifth of its stock on hand. Then, why all this clamor for more coinage? If a man had five times as much blood in his body a man had nye times as much blood in his only as his arteries and veins would circulate and four fifths of it was lying idle around his heart, would any one say that such a man needed a free and unlimited infusion of blood? A government can no more induce people to use money they do not want than it can induce M'limo. When they met him Burnham thom to est what they do not like. The true

place of silver is as a change money. It is indis-pensable for that purpose and unsulted to any other, and all the silver tongued orators in the land cannot change this fact. The \$1, \$2.50 and Only \$6.70 a Year. \$3 goldpieces were too small and were unpop-

B goldpieces were too small and were unpopular as change money, and the government stopped the coinage of them. On the other hand, silver is not a debt pay-ing money in any considerable amount, nor the money of commerce, for the reason that it is too bulky and too heavy. When a man gets over 85 or 100 of it, he unloads on the first bank he comes to, and the bank unloads on the treasury. Thus the circulation of it is lim-ited to just what the people will uss. When the people get enough of a thing, they know it, and you cannot argue with them about it. They are guilble on theories, but intensely practical in business. The Weekly Chronicle \$1.50 a Year

"The Great Crime of 1873."

"The Great Crime of 1873." We have heard a great deal about demonsti-inition of silver. Let us see the extent of "the great crime of 1873." In 1853, in order to pre-vent the subsidiary coin from going alread, the silver half dollar was reduced in weight from 2005, to 103 grains, and the quarters, dimes and 3 cent pieces were reduced in the same proportion. These coins were then made a logal tender for only 56 in amount, and the coinage of them for private account was stop-ped, but the government purchased the silver builton and coinad them as they were needed. Bo, no orime was committed in 1973 against the halves, quarters, dimes and half dimes. That crime was committed under Millard Fill-more. In 1879 these coins were made legal ten-

That orime was committed under Millard Füller more. In 1879 these coins were made legal ten-der for sums not exceeding 32. The for the standard silver dollar of 475 in the standard silver dollar of a forth in the standard in the standard silver dollar of a forth in the standard in the standard silver dollar of a forth in the standard silver dollar dollar dollar dollar dollar d

doctor of the Matabele. He started the rebellion, saying that he could turn away the bullets from Uncle Hiram Maxim's patent music box into water if his fellow countryymen would only bring him presents in return for the favor. His throne was in a cave which

was the center of pilgrimages for the natives far and near. Burnham determined to kill him. The British officers laughed at his attempt as a "fool's errand." But he enlisted the assistance of a sturdy young Englishman named Emery Armstrong, and they started for Ginger M'limo's cave. The hills were fairly R Dooley C Cochran swarming with natives, and Burnham gold for use to any great extent. Alcohol is the standard for measuring the strength of all spirituous liquors, yot that fact has never been found to be very straining on alcohol. John Cochran
