[Continued from last issue.] Thriving on Assassination.

We are told that the standard dollar is not primary money. It is not a promise to pay, it is a legal tender for all debts, and it does not have to be redeemed in anything on the face of the earth. If any man can give a bet-ter definition of primary money than this, I would like to see it.

Our Excellent Financial Showing. The argument is made that we owe so mu foreign debt that the interest is confiscating us. The ablest financiers on this continent who have made the subject a study place our foreign debt at \$2,000,000,000, which as they es-timate at a \$2,7ate of interest amounts to an annual interest account of \$50,000,000. Our globe trotters are spending annually \$47,000,-000 abroad. Most of them are ignorant of the beauty and grandeur of their own country, which far surpasses anything they see abroad. They ought to give up this foolish fad and spend their millions getting acquainted with this country for a few years. If we are actu-ally insolvent and cannot pay we ought to make a general assignment for the benefit of all our creditors. This is the way an honest man does when he fails in business. He does

not hide out his property and offer 50 cents on the dollar. Instead of being insolvent we are better able to pay than any people on the face of the earth. Our national debt is in round numbers \$915.962,000. It has been reduced to one-third its former amount. In 1865. it was \$2,845,907,000. The debt of Great Britain
