THE regular semi-weekly row between the followers of Representative Bailey, of Texas, and those of Representative McMillin, of Tenn., the rival would-be democratic leaders, has become a feature of the short meetings of the house of representatives at Washington, which draws full galleries and which has crowded Jerry Simpson's little populist circus to the wall. In this rivalry a Washington paper, which poses as Bryan's mouth-piece, has sought to convey the impression in its daily diatribes against Bailey that McMillan was the personal representative of Mr. Bryan. One of these editorials was denounced on the floor of the house as "an infamous very many preparations made from its and malicious lie" by Mr. Bailey, who added by way of emphasis: "I denounce every man who has helped to circulate it as an infamous and malicious liar." The editorial in question said in effect that the leadership of Mr. Bailey was the leadership of Mr. Reed.

THE SUGAR INDUSTRY. reciprocity relations with Hawaii is now being discussed by newspapers and business men of the Pacific coast. It appears that most of the republican sentiment is against the renewal of those re- bold-up at Salem. They have no standlations with the island republic. ing as republicans, though presuming The Gazette is free to confess that at present it is a contest between lows: Claus Spreckels, in Hawaii, and numerous other millionaire gentlemen on this side. If Hawaii can ship sugar to the United States having failed to organize after sitting beyond the prescribed limit, and the term of Hon. J. H. Mitchell having sublessen the profits of our sugar sequently expired on the 4th of March, manufacturers. In the mere con1897, the governor of the state has appointed Hon. H. W. Corbett, of Portland, There may be some test between large money interests to fill the vacancy. There may be some the people have no particular concern, but there is another and more important feature to be taken and wish in the matter as we underinto considertion. The beet sugar is dead. THE ELDER TREE. Some of the Traditions and Superstitions

Attached to It. The traditions attached to this tree are very numerous and widespread, from the days of Pliny downward, says Notes and Queries. The fancy or belief that Judas hung himself upon an elder tree, which will be found in Gerarde nd many old herbalists and poets, Ben Johnson among them, of course, gave he name to the purplish-brown fungus which grows on its bark under the title of "Judas' car," which Coles refers to as Jewes Eare, called in Latin Fungus ambicunus and Auricula judae." The dant appears to have had in England the old cognomen of pipe tree or bour tree, and in Scotland bore tree, no doubt rom the facility with which pipes or tubes for musical or other purposes have always been made by pushing out the pith from the younger branches. Weseem to get the name from the Dutch holder with the German hoblunder, sureau with the French, in Holland vlierboom, Italian sambuco, Russian

ousing, and Spanish sauco The spiced wine so almost universally de from the berries in country dustricts, and the medicinal virtues atbark, shoots, leaves and roots by country folk from time immemorial, and a proportion of which are found in the pharmacopoeia, have doubtless made it popular plant, and gathered around many of the superstitions, tales, and even enhanced the virtues it is said to cossess. At all events, in nearly every ounty in England Its, probes can be beard, and wondrous takes in connection with it will be found to exist.

THAT MOODY LETTER.

The matter of the renewal of Devotees of Simon and Corbett Write Not long ago Vice President Hobart received the following letter from the "Moody contingent" in Wasco county. This gang aided in bringing out Northup last year and were prominent in the to represent that party in their respective localities. The letter reads as fol-

There has just been founded at Calcutta an institution for the education of monkeys, says an exchange.

A young monkey is taken and be-

fore him is placed a set of blocks on which are painted in capitals the letters of the alphabet. These blocks are. in fact, exactly similar to those which country in the world, and they are used in precisely the same way as if the monkey were a young specimen of the human race. There is one professor for each monkey, and the monkey is taught by means of the blocks to spell certain words. If the word is "fruit," for example, the monkey, after having as to spell the word quickly and without error, receives a bit of fruit as his reward. The same exercise is repeated with other words; and it is hoped that in time the simians will learn how to read and spell and understand English, if they cannot speak it. An effort these beasts so that they may become fairly efficient domestic servants. The school is so young as yet, however, that matter of speculation. Its "professors" are enthusiastic about their novel work and seem to think that a new field of usefulness will be opened up for these chattering little beasts.

SWIFT PIGEONS.

More Than a Mile Made a Minute in a

Aided by a southerly wind and a perfeetly clear sky, the first test of the pigeons which are to represent the first Thicago Homing club in the National federation races this year was a most notable success, says the Chicago Chronicle. The trial was remarkable in more than one feature. Two hundred and eighty-one birds, the largest number which the club has ever liberated from one racing station, made the trip, and of that number every bird was reposing peacefully in its loft by one o'clock in the afternoon. The time made by the first birds to arrive home was the fastest ever made over the course, and represents a speed of more than a mile a The birds were liberated at Monce,

42 miles away from the nearest loft, at 7:30 o'clock, and White Wings, owned by L. Verschueren, stepped back in its loft at \$114%. White Wings was closely ollowed by nearly half the flock, and 50 arrivals were reported between \$: 15 and 117. Innamuch as every bird spent at least as much as five minutes in circling before starting on a line for home, the speed shown is materially more than mile in each 60 seconds.

As an illustration of how little even the best funciers are able to judge of the merits of their own pets, it is interesting to note that White Wings had been considered almost worthless. Only a month ago he was flown from Sixtyfirst street, a distance of eight miles, to his loft, and took 16 days to make the journey. That was his first trial, and he was sent to Monee Saturday quite as much in the hope that he would be lost as for any other reason.
