LOVE LIGHTENS LABOR. Advantages Country People Have Over

The countryman has, if he be wise enough to perceive it, good reason to the least squares is one in almost con-For the latter, says Black and town. White, unless he be exceeding well off, there are few pleasures easily obtainable in the intervals of toil. Food and sleep are excellent in their way, but they are necessities, and they are usually taken under such circumstances as to have nothing of the character of luxuries. The countryman is luckier than this. It may be that his toil is tiring and that his wage is a small one. but he labors in such a way that he always gets the fullest enjoyment out of his rest, and when he pauses to take his midday meal it is under conditions that would make a perfect holiday for the city, and to whose charm even the man accustomed to them cannot grow callous. He lies at ease among the sheaves that he has cut, and the sun. whose ardent rays made his toil the heavier, now adds to his delight. Moreover, he eats with the pleasantest of waiters to see to his comfort; it may be his wife who brings his dinner, or perhaps it is some buxom girl from the farm who is not yet his, though she will some day be, as she knows within herself, and he is not afraid to believe. Verily, his toil is hard in itself, but be must be a singularly discontented person if he do not find it light amid these We would rather people would talk surroundings and under these pleasant

conditions. VOLAPUK HAS A RIVAL. Esperanto Is the Name of This New Uni-

versal Language. Esperanto is not the name of a new of a comic song, but it is the name of owers in Europe, the United States, and even in some parts of Africa.

Among those most proficient in the language is a Frenchman, bearing the aristocratic name of D'Eyssautier. He says that Esperanto is by no means a new language, nor even a recent discovery. This international language has been in existence nearly ten years, and there are at least 10,000 adherents

in different parts of the world. The author or originator of Esperanto is a Russian gentleman, Dr. Zamenhof, of Warsaw. He says that one may learn its grammar in an hour, and all its vocabulary of words in a few days. The official organ of the language, the Esperantisto, is utterly opposed to the Volapuk organ, for it has literary

The fact is, Esperanto hopes to dethrone Volapuk altogether. Verses may be written in it, and translations of the Iliad and Hamlet have been pub-

Like all artificial universal languages, the roots of Esperanto are derived from the best known of modern tongues-English, French and German -these offering the least difficulty to students. An Odd English Village.

Buckland-on-the-Moor, a secluded village of Devonshire, England, has no public house, parson, policemen or penpers. The squire owns all the land. The ferms are small, but profitable. The farm laborers live in the squire's When they fall sick squire pays their wages as usual, and when they are too old to work any piore they are continued on the pay list, and potter about, doing want they please.

RESTORATION OF OIL WELLS. An Electric Heater Designed to Cause the

Renewed Flow. The general theory concerning the exhaustion of so many oil wells is that the oil, in passing through the stone has clogged the porous stones with paraffine in such quantities that the further flow is stopped and the well ceases to produce. In many cases, says the Age of Steel, the supply in the carth has not given out, but only ceases to flow when the exit is stopped. The stone through which the oil passes is of a very porous nature, and, as the liquid is in a crude state, the thick matter become as dregs, settling in the rock near the edges of the bottom of the well. Tor pedoes have been used to shatter the stone at the bottom of the well, thu breaking up the clogged matter, but this method is expensive. A new method consists in lowering a peculiarly-cor structed electric heater into the well The machine, which is eight feet long and resembles an iron cartridge, placed in the bottom of the we'l and the current regulated so that the heater receives just enough to produce an enornous heat without melting the metal. By this peculiar construction of the carbon-packed chambers the intense heat is radiated about into the rock in all directions. Thus the paraffine and other refuse are softened and melted up so that they run, and when the well is started a fresh flow takes place, just as strong as it did when the well was

Blessing the Fish.

Thousands of spectators witnessed the unique spectacle of the annual blessing of the fisheries, which took place at Folkestone, England, recently. A procession, consisting of surpliced choirs and clergy, with cross and banners, left had lived all his life on a small farm St. Peter's church, and after it had made near Batavia, stopped at the hotel the a detour of the fishing quarter of the other evening, says the Buffalo Express. town chanting the litany a position was He said he wanted a room for one night. taken up overlooking the sea. The He was sent up to the third floor, vicar of the parish gave an appropriate address, and prayers were offered askdidn't come back till midnight. > MATHEMATICS AND ASTRONOMY Two Sciences That Are Closely Related

and Necessary to Each Other. Probably in none of the sciences, applied or pure, is a knowledge of higher mathematics so essential as astronomy. Certainly none involves so much mathematical labor. The method of count himself a luckier person alto- stant use by those engaged in astrolabor often entailed by this process is enough to make the head of an ordinary citizen swim even to think of. One of the most extensive least square solutions ever made, says the Pittsburgh Dispatch, has recently been published by Prof. Schur, of Goettingen. The heliometric triangulations of the stars in the cluster Praesepe (the Beehive) gave rise to a series of 74 normal equations, involving 74 unknown quantities. The solution of this set of quantities was effected by Prof. Schur in ten weeks by means of the usual Gaussian method of elimination. Prof. Schur comes to the conclusion that no other method by successive approximations is to be compared to the Gaussian method, even though it might seem to promise a saving of labor in advance. Prof. Schur mentions as the longest least square solution he has been able to find in astronomical literature a geodetic adjustment made by Baeyer, in which a set of normal equations with 68 unknowns was successfully solved by the famous computer, Dase, in three months.

Rainilatarivony's Wealth.

Rainilairivony, the late Malagassy exprime minister, had feathered his nest well. He left 50,000 head of cattle, 2,000 slaves, 20,000 ounces of gold dust, \$1,-000,000 in the Bank of England, \$75,000 worth of goods in his own house, a palace, and other buildings at Antananarivo, the land on which the French resident general is built for which France pays \$2,400 a year, three inland liquor or of a new appetizer, nor that farms, real estate at Tamatave, and half the profits of a gold mine consession an artificial language, which is fast made to an English company. He is gaining adherents in France, and that believed to have left besides treasures parts of Madagascar.

> THE KAISER AND THE TRAMP. William Gives a Vagabond Some Mone and Good Advice.

An ancedote of the kaiser and the

tramp has just appeared in Berlin papers, says the Pall Mall Gazette. Kaiser William was, it seems, lately staying at the Jagdschloss Hubertstock, near the Angermunde, and was one day shooting in that neighborhood. A tramp descried him from afar, and, not unterstutzung or financial propping up and also wished to be directed as to the road to Angermunde. The kaiser complied with both requests, conversed with him at length as to his personal and professional views of life, and dismissed him with a wish for a pleasant end to his day's journey. The pleasant end was in the police station, for one of the kaiser's servants, who seemed to be of the Scotchman's opinion that it was "an awfu' like business for puir fouk tae lulk at a king," imagined that the emperor had been insulted and tele-graphed far and wide for the arrest of the pilgrim, with accompaniment of bonds, fetters, handcuffs, and so on. The wanderer was run to earth at Angermunde, when he learned several things that he did not know before-inter-alla, that he had been speaking with the kniser and was guilty of high treason, anarchism and the like Need-less to say, he was speedily released by an impetuous telegram from the em-peror, who ordered that he should be fed, comforted and have a free ticket to Cuxhaven, "where he told me he wanted

QUEER SETTLEMENT. Hornets and Birds Become Friends and the

lords.

Former Guard the Latter's Nests. On the broad, brown salt meadows that skirt the Housatonic river, just above its mouth, is a vast colony of marsh wrens, relates the St. Paul Dispatch. In the acres of tangled tules and cat-tails the nests, which are as large as one's head, are so compactly constructed and so thoroughly thatched as to be entirely weather-tight. As a rule the thrifty little chattering wrens prefer not to occupy a last year's nest, so there are every season hundreds of empty ones. They are not allowed to remain vacant long, for there are too many creatures seeking just such snug quarters. One specimen of field or meadow mice take possession of a great many of them. Big spiders, too, love to nest in the abandoned basket-like abodes and live for many seasons in them. The most desirable tenants of all are the big black and white hornets. By far the greater number of the old nests are inhabited by these fiery fellows, and, odd to relate, they are the best of friends with the land

As if by agreement with the wrens, they keep a perpetual guard over the new nests, as well as those where they live. Let a dog, an unconscious rail or snipe-shooter, a bird-egging boy or any creature whatever approach the nests without warning, a cohort of winged warriors will fall on the intruder, and flight is the only safe course. The wrens seem full conscious of the value of such sentinels, for they take care to build their nests always very near to the old. The birds are themselves entirely defenseless, and, their nests being easily located on account of size and the noise made by the wrens, they have been in some localities entirely wiped out by egg collectors. The boys have learned to give this colony a wide

OF POLITICAL IMPORTANCE. Rapid Increase of Population in Germany

The rapid increase of population in Germany, due, it is believed, to the increase of manufactures, is becoming of political importance, says the Spectator. According to the corrected return of the census, taken on December 2, 1895, the empire now contains 52,244,-503 inhabitants, while France contains only 39,000,000. The Germans, moreover, add at least 5,000,000 to their number every ten years, while the French may be said not to increase at all. As both countries train every available man, the German army must always be greater than the French, and in another generation will be greater by more than a third. Again, it is doubtful whether Germany, which is naturally a far poorer country than France, can long sustain its population, which must, therefore, either emigrate If you want Heppner property don't in increasing numbers or burst out in

some direction into lands less overfull. It is believed to be a clear perception of these facts which makes some have a fine proposition to offer one. ruling men in Germany so eager for a dependency into which Germans might swarm. They would not swarm even if they got one. The idea of the German emigrant is to escape officialdom, not to replace himself under it in a country beyond the seas. King Sumbert and His Soldiers

self, of Queen Margherita, and of the princes of the royal family of Italy, has given to the government for the families of the dead and wounded soldiers in Africa the sum of 4,000,000 francs. This sum is to be distributed without distinction between the Italian and the native soldiers, who fought side by side against the Abyssinians. King Humbert has also expressed his intention of furnishing, if necessary, another sum of 1,000,000 francs, in his name and that of the queen, to be divided among the wounded.
