This arbitrary ruling is in the nature of a mild form of highway robbery when business transactions and financially viewed from the standpoint of the paview it is merely a legitimate method of adding to his professional income.

This rule, which happily has been adopted by only a small percentage of reputable physicians in the city, has many obnoxious features, while it has seems to freeze. few good points to recommend it to Price favor.

One of the many objections made to it is the fact that it works a hardship upon the poorer class of patients, who comprise by far the largest proportion On last Suuday the funeral of Lewis of the clientele of the medical profession. A large number of the patients who call upon the members of the medical profession are suffering from only a slight indisposition, which, while it whose incomes are exceedingly small may be chronic, is, at the same time, not of a serious pature, and one which a prescription calling for a simple remedy will either cure entirely or temporarily relieve the sufferer. In such cases, where relief is obtained through the prescription given by the physician, the patient, upon a return of a similar attack, would naturally desire to have the efficacious remedy refilled by the druggist without calling upon the physician again. With this rule adopted by the physicians, however, he would be unable to obtain the remedy a second time before obtaining a prescription from the physician, and paying another fee, unless the druggist saw fit to disregard

the request made by the physician. It will be seen from this statement of facts that the real motive for the action taken by these physicians in asking druggists not to refill one of their prescriptions or to give a duplicate to a customer lies in the fact that it will add materially to their incomes. The physicians themselves, however, deny that they are actuated by such a mercenary motive, and claim that their purpose is to prevent the possibility of any of their patients coming to harm by reason of having a prescription refilled which may contain some powerful poison Very often, they say, they write prescriptions which contain a poisonous ingredient which if taken oftener than prescribed would seriously endanger the lives of their patients. It is to prevent any such contingencies that they have taken these precautions.

Without the cooperation of the druggists, however, these orders of the physicians not to refill any of their prescripabout town express themselves in favor of obeying the instructions of physicians in this regard, by far the majority of them admit that they disregard them on every occasion, except in those instances in which they know that the prescriptions asked for by their customers contain a dangerous poison. The druggists generally argue that a prescription which one of their customers has paid a physician to secure belongs to the customer, and that if he wishes to secure a duplicate or to have it refilled he has a perfect right to do so. Many of the druggists my that even if the physicians gave them orders to refuse a duplicate prescription they would ignore it.—St. Louis Republic.

A Curious Business. There are not many persons who would stay up one night in a week in the open air the whole year round for the purpose of earning a few pence. It is a living which is followed by a few men and precarious. In many parts of London markets are held on Sundays, and very animated are the scenes to be witnessed. It is a very difficult task to obtain a "pitch" in which one cap buy a barrow or stall, and many stailkeepers, who are anxious that their "pitches" should not be occupied by newcomers, hire a man to keep an allnight watch. The several "pitches" are temporarily occupied by lengths of armed posse clattering at their heels, boards, old boxes, barrels, etc., till the the man threw up his hands in token of morning brings the arrival of the barrows and stalls. In this way a man can rest content that he will have no difficulty in securing his "pitch" in the morning, after a night of slumber. The winter is dreaded by these night watchmen, but precautions are taken that they may be made comfortable. A huge fire is lighted, and the men, with a plentiful supply of tobacco and a small bottle of spirits each, are able to defy the inclement weather. All these things are provided by the people whose "pitches" have been secured.— St. Louis Republic.
