

Scrofula Swelling

On the Neck and Great Weakness Caused by Impure Blood—Was Constantly Growing Worse.

"When my son was 5 years old he was in very poor health and we could get nothing to relieve him. At the age of 7 years he began to complain of soreness on both sides of his neck and soon lumps began to gather on one side and grew to half the size of an egg. We then became more uneasy and began to doctor him for scrofula. He gradually grew worse, however, until at the age of twelve years we had lost all hope of his recovery. He became so weak he could sit up but a few minutes at a time. My wife saw Hood's Sarsaparilla recommended as a great blood purifier and we sent and got a bottle. We began giving our boy the medicine according to directions and it was not long before we saw he was improving. He continued taking it until he was in very good health. He is now 13 years old and is well. We recommend Hood's Sarsaparilla for all troubles caused by impure blood." S. M. SILVER, Grouse, Oregon. Hood's Sarsaparilla is sold by all druggists. \$1; six for \$5. Get only Hood's.

OREGON APPOINTMENTS.

The Oregon Delegation Agree Upon Four Men for Plums—Other Appointments Later.

After a week's diligent work the Oregon delegation made the following announcements on last Saturday afternoon: For U. S. prosecuting attorney, John H. Hall, of Portland; for U. S. marshal, Zoeth Houser, of Pendleton; for appraiser, Col. O. Summers, of Portland; for register Oregon City land office, T. T. Geer, of Salem. No doubt these suggestions from the delegation will cause President McKinley to give out the necessary "sheepskins."

The endorsement of the various candidates for other Oregon offices, including collector of customs and collector of internal revenue, will occur later. In the matter of collector of internal revenue, Washington will endeavor to have something to say. However, as the delegation is composed of but one man, Senator Wilson, it is not supposed that his opposition to any candidate that may receive the endorsement of the Oregon delegation will defeat the latter's choice. It is known, however, that Mr. Wilson has decided upon a candidate for the place who will not receive the support of the Oregon trio. The matter will have to be handled with gloves to prevent a fight over this office.

It is thought that the delegation have practically agreed upon the aspirants for the two important offices mentioned above, but the Gazette will say that it is not authorized by any member of the delegation to say that this is true. The delegation had a difficult time to settle their differences but the final decisions were made with the best of feeling prevailing.

HE IS THE MAN.

The Sheriff of Washington County Identifies the Murderer of Ledrick.

The East Oregonian correspondent had an interview with the man arrested by Sheriff Matlock on suspicion of being Gus Machline, wanted for the murder of J. D. Ledrick, in Washington county, during December, 1894.

He claimed that his name is H. A. Brown, of German descent, the same story that he recited to Sheriff Matlock when arrested.

W. D. Bradford, sheriff of Washington county, arrived from Hillsboro on Saturday morning and identified the prisoner as the man wanted. He admitted that his name was Washline, but denied knowing anything about the murder. Bradford and the authorities of Washington county have positive evidence against Washline and he will doubtless hang for his terrible crime.

A RICH FIND.

A Big Quartz Discovery in the Blue Mountains Twenty Miles From Heppner.

Some years ago indications of gold quartz were discovered on Willow creek, above the Hamilton sawmill. Subsequent development of what appeared to be one of the best claims failed to show up any one worth mentioning and the mining excitement died out.

Recently Thos. Leforgie, of Montana, a brother of the Leforgies, of Heppner, an experienced prospector, discovered gold quartz croppings east and south of the old prospect. The ledge is fully 75 feet in width and can be traced for miles. Leforgie says it is the largest ledge he has seen in all his travels and prospecting. Development work will be begun at once and it looks Heppner will become a mining town of importance.

A Good School.

In connection with the visit of Miss G. Holmes, president of the Holmes English Business College, of Portland, last week, the Gazette is reminded of the excellence of the institution by the presence of former students in our midst. Mr. E. L. Freeland, the well-known stenographer and book-keeper, and Mr. Arthur Minor, the manager of the mercantile firm of Minor & Co., both attended Miss Holmes' school and there acquired most of their business education. Mr. H. H. Harrington, also of this place, was a student last season and did good work. The Gazette believes that any student who has ever attended Holmes Business College will testify to the merits of this school.

Grant Co. News: Time is said to prove all things, and heretofore, before we had telephonic communication with the world, we could prove all things by the time, for no two time pieces in Canyon City told the hour alike. Now we can keep better hours, for Postmaster Hagwood occasionally gets the correct hour from Heppner.

The Southern Pacific railroad company has decided to sell tickets from all stations on its lines in Oregon, at one fare for the round trip. In view of the fact that our people have been favored with abundant crops, it is confidently expected that the state fair at Salem will have a better attendance than ever before, and in order to give all an opportunity to visit this great institution of which the people of the entire state have reason to be proud, this popular line of railroads has reduced the fare so as to enable all to see one of the grandest displays ever exhibited at Salem. The Fair opens Sept. 30th and closes Oct. 8th.

Buy your goods at home. Remember that Abe Lincoln said that when one bought goods away from home the foreigner got the money and we got the goods. But when the goods were bought at home we had both money and goods. This is good doctrine. We are willing to abide by it. When the printing drummer comes to town, remember it and call up phone No. 3.

Navigating the Air. Among the novel ideas in aerial navigation is the coupling together of a number of balloons in what might be called a tandem form. In the foremost is a machine which is supposed to be the propelling. These balloons are umbrella-shaped, and contain hydrogen gas. The car is suspended a long distance below the balloon proper, and is connected with it by a frame of aluminum. The relative position of car and balloon would not be unlike a very long handled umbrella fully spread, the car being attached to the lower end of the handle. The motive power is an engine operated by liquid fuel. The experiments with this form of navigation are being conducted at Montgomery, Ala., by men who are fully abreast with the best scientific ideas of the day.—N. Y. Ledger.

A Sensitive Spot. It is a mistake to suppose that the tip of the tongue is the most sensitive part of the body. Those engaged in polishing billiard balls, or other substances that require a very high degree of smoothness, invariably use the cheek bone as their touchstone for detecting any roughness.—Chicago Tribune.

Sure to Be. "I see that they caught the fellow who broke out of jail last week," said the borderer who was looking over his paper. "Of course," said the cheerful idiot. "A fellow who breaks out is sure to be spotted."—Indianapolis Journal.
