FACTORIES FOR DOG FEED.

Place Where Sustenance for Antiseptic Canines is Manufactured Wholesale. One of the two factories in this country for the making of patent food and patent medicine for dogs has been described in the New York News. The founder of this establishment was a Scotchman. He was employed in London kennels, studied the needs of dogs, thought out special treatment for them and finally took out patents on foods and medicines, and in this unique business amassed a fortune. On the ground floor the visitor enters the receiving room of the raw materials. Thousands of pounds of butchers' scraps are brought here in the course of a month. Oatmeal in wholesale quantities and tons of herbs are used. The old-fashioned dog's bone, bonnet, catnip and beef-root, under various scientific names, find a use as food or as medicine. The second floor is occupied by four curious machines, with great cylinder attachments. After the fat and meat have been sorted they are ground separately in these machines and then placed in great wooden tubs where various mixtures are added.

The next process seems so much like the ordinary baker's work that one is quite disposed to taste things, and when the round and square cakes of a tempting brown have been taken from the brick ovens one really envies the aristocratic dog. After cooling, the biscuits are packed in neat pasteboard boxes. According to size these boxes are labeled for pet dogs, for greyhounds and St. Bernards. There are especially prepared dishes for cats. Sufficient food to keep pussy for two days may be had for five cents. But it costs a pretty penny to keep a dog. A large dog must have six or eight cakes besides a quantity of meat. The meat costs probably about ten cents and the cakes are four cents apiece. The most interesting department is that of the patent machines, at the top of the building. The mixtures of herbs and chemicals are boiled in great kettles and the liquid is brought up to this floor to be put in bottles of various sizes and labeled "cure for mange," "balm for sprains" and "very good for vent baldness." A New York hermit is accused of "annoying his neighbors," and a court will decide whether he is guilty of this unheralded offense.

A curious and very objectionable crank is one who has developed in Birmingham, England. He goes about with a long steel hat pin and stabs all fashionably dressed ladies whom he encounters.

ROMANCES of the war of 1812 are told by a colored hermit, aged ninety-four, who dwells in a hut in the woods near Taunton, Mass. He never tells the same story twice, and is as earnest as if he believes his own stories.

THE "whirling fever" has entered a family of seven persons in Lawrence, Kan. Father and mother and five children are supplied with bicycles and are out almost every evening in a group, riding around town on their wheels.

WELL WORTH A GLANCE.

WILLIAM PENN'S will is in the possession of Frank T. Sabin, of Philadelphia.

SPARKLING champagne was first made by Petrus Perignon, a monk, who died in 1715.

WARD PRENTISS, aged ten, son of Dr. Prentiss, of Jamaica, N. Y., lost the sight of an eye through a shot from an air gun, aimed at him by a little comrade.

A toy snake, four feet long was displayed before Miss Mamie Lynch, aged sixteen, in Bridgeport, Conn., by a comrade, and so terrified the girl that she has become insane.

WHAT seemed to be a lively fall of snow in very large flakes over a limited area in the tenement district of New York on a recent bright and breezy morning resolved itself on close inspection into flecks of foam from the suds in a wash tub, flung to the winds by some small persons on a fire escape.

PAPER MAKING IN THIS COUNTRY

The United States Now at the Head of the List in Point of Production.
Though the number of paper factories in the United States has decreased 20 per cent, during the last 15 years, the product of American factories during the same period has increased 40 per cent, and the present capacity of the paper mills of the United States is 300,000 tons a year. More than \$100,000,000 is invested in the paper factories of the country, which number 700, and the total number of employes in them is larger than our standing army.

For many years, during the time that rag paper or straw paper was the standard, Great Britain stood at the head of the world's producers, and manufactured not only sufficient for the home demand, which is very extensive, but also had a surplus left over for export to other countries, whereas the American product of paper was insufficient even for home requirements. With, however, the discovery of the utility of wood pulp for paper making and the process whereby the cost of paper has been reduced from 12 1/2 to 2 1/2 cents a pound, the United States have been steadily pushing ahead and are now not only in advance of Great Britain, but are increasing their lead rapidly. Germany follows Great Britain closely, and may soon overtake it in paper making.

The raw material, including wood pulp, rags, burling, wool fiber, and cotton waste which enter into the composition of paper, represent a total annual investment in all the countries which have authentic figures of paper manufacture of \$100,000,000, and the chemicals used for dyeing or coloring papers, particularly high grade note paper, involve a further expenditure of \$50,000,000. The ingredients which enter into the composition of paper of various kinds, in addition to those already given, are dyes and straws, and the rags used are divided, according to their serviceableness, into linen rags, which yield 50 per cent, of paper from the amount of material used, woolen rags which yield 60 per cent., and cotton rags which, by improved process, yield 65 per cent.

New York and Massachusetts stand at the head of the states in respect to the amount of paper manufactured. With the cheapening of the cost of paper not only have new uses been found for it (they have railway tracks made of paper in Germany), and paper pencils are no longer a novelty in New York), but the demand for paper has increased enormously. This is particularly noticeable in newspapers, the size of which, in many cases, has been increased to correspond to the reduction in price. Moreover, cheaper paper has become enormously the business of the publication of books and magazines, by which a volume that a few years ago cost one dollar, is now sold for 15 or 20 cents, has had one odd result, as is shown in the general decline of private libraries, for, with the cheapening of books, the incentive for collecting them seems to have departed, except in the case of rare books, or those valued on account of the beauty of the binding or illustrations.—N. Y. Sun.

A Beautiful Present

In order to further introduce ELASTIC STARCH (Flat Iron Brand), the manufacturers, J. C. Hubinger Bros. Co., of Keokuk, Iowa, have decided to GIVE AWAY a beautiful present with each package of starch sold. These presents are in the form of

Beautiful Pastel Pictures

They are 13x19 inches in size, and are entitled as follows:
Lilacs and Pansies.
Pansies and Marguerites.
Wild American Poppies.
Lilacs and Iris.

These rare pictures, four in number, by the renowned pastel artist, R. LeRoy, of New York, have been chosen from the very choicest subjects in his studio and are now offered for the first time to the public. The pictures are accurately reproduced in all the colors used in the originals, and are pronounced by competent critics, works of art. Pastel pictures are the correct thing for the home, nothing surpassing them in beauty, richness of color and artistic merit. One of these pictures will be given away with each package of purchased of your grocer. It is the best laundry starch on the market, and is sold for 10 cents a package. Ask your grocer for this starch and get a beautiful picture.
ALL GROCERS KEEP ELASTIC STARCH. ACCEPT NO SUBSTITUTE

THE WONDERS OF SCIENCE FOR YOU!

LUNG TROUBLES AND CONSUMPTION CAN BE CURED.
An Eminent New York Chemist and Scientist Makes a Free Offer to Our Readers.
The distinguished chemist, T. A. Slocum, of New York City, demonstrating his discovery of a reliable cure for Consumption (Pulmonary Tuberculosis), bronchial, lung and chest troubles, stubborn coughs, asthmal affections, general decline and weakness, loss of flesh, and all conditions of wasting away, will send THREE FREE BOTTLES (all different) of his New Discoveries to any afflicted reader of this paper writing for them.
His "New Scientific Treatment" has cured thousands permanently by its timely use, and he considers it a simple professional duty to suffering humanity to donate a trial of his infallible cure.
Science daily develops new wonders, and this great chemist, patiently experimenting for years, has produced results as beneficial to humanity as can be claimed by any modern genius. His assertion that lung troubles and consumption are curable in any climate is proven by "heartfelt letters of gratitude," filed in his American and European laboratories in thousands of those cured in all parts of the world.
The dread Consumption, interrupted, means speedy and certain death. Simply write to T. A. Slocum, M. C., 98 Pine street, New York, giving post-office and express address, and the free medicine will be promptly sent direct from his laboratory.
Sufferers should take instant advantage of his generous proposition.
Please tell the Doctor that you saw this in the Gazette, published at Heppner, Oregon. July 9-7-1 yr.
