EDITOR GAZETTE:- In your last issue of September 30th there appears over the signature of A. M. In a very carefully worded introductory to his unication Mr. Gunn tries to convey the been unjustly discriminated against in the his teaching. assessment of their property, to the tune of about 50 per cent. This without qualifications, would if shown to be correct, be good grounds for complaint, but when he adds that qualitying clause, that the earning power of property must be taken as a basis for the value of the same for purposes of inxation, the average 15 year-old school boy could not help hut discover the fallacy of his argument.

Last year finding that the real property of Heppner was very unequally assessed the entire assessment of the town was reviewed by what we considered a competent board, and upon each lot, in each block in the town, a valuation was placed, which was considered equitable to all concerned, and with a view of doing car property owner justice. How well this board succeeded in its work may be inferred from the fact that these valuations were used last year and the present year, and no one, with the past month: single exception of Mr. Gunn, has appeared and asked that they be changed. Mr. Gunn, when | Roy Jo approached this year by the assessor, refused to Alva Jones accept these valuations and prepared a biank dimut Jones this binself, listing his property at about one-third Alth Kitk.
