### Oh, How Thankful

**Pain Was Maddening and Hope Had Been Abandoned—Wonderful Results of Purifying the Blood.**

"A very severe pain came in my left knee, which grew worse and worse, and finally a sore broke out above the knee. It discharged a great deal and the pain from my thigh down was maddening. Large, hard, purple spots appeared on my leg. I suffered in this way for years, and gave up all hope of ever being cured. My wife was reading of a case like mine cured by Hood's Sarsaparilla, and she advised me to try it. I began taking it and when I had used a few bottles I found relief from my suffering. Oh, how thankful I am for this relief! I am stronger than I have ever been in my life. I am in the best of health, have a good appetite and am a new man altogether." J. P. MOORS, Lisbon Falls, Maine.

**Hood's Sarsaparilla**  
Is the best—in fact the One True Blood Purifier.  
Hood's Pills cure all liver ills. 25 cents.

Where all people "look pleasant" and get good photographs, whether the subject is homely or pretty. You know the proof of the pudding isn't "chewing the rag," but having photos made. #### FAIR ENTERPRISE.

As a supplement to the Gazette, its readers will doubtless scan the price list of "The Fair", a concern that comes as a development of the world's competition, meeting, as a local business house, the numerous catalogues that have made inroads into the business of local concerns that are justly entitled to the patronage of those whose interests are identified with theirs. In last week's issue we called attention to the reasons why home institutions should have your support. One moment's thought on your part will convince you of our argument. Self interests are dependent on the individual's judgment. You have a future before you. Do not conclude that the present alone is to be looked after. "United we stand, and divided we fall," and it is your duty to keep posted on your local concerns, which are capable and ambitious to accommodate you that your patronage in the future can be depended upon. What you fail to find at "The Fair" other merchants are liable to have. We sincerely request our readers, when in town, to visit "The Fair" and satisfy themselves that this concern is what it represents itself to be.

Mr. Luckman goes back to the old country to remain until next September, and every city and point of attraction will not be overlooked by him. His Morrow county friends wish him the pleasure he anticipates, and expect from him an interesting diary of his journey.

#### HEPPNER'S FLOUR MILL.

The Product of the Heppner Flour Mill Gaining Recognition.

The Commercial Review, in commenting on the flour milling business, predicts that this northwest will be one of the greatest milling centers in the United States. The mills of Oregon and Washington are constantly increasing their capacity, and beyond a doubt the milling venture of Heppner will win its share of recognition, as the United States acquires new territory adjacent to the Pacific Coast it is imperative that every section of the country exert its vigilance and keep their opportunities in view, reaching out for this increasing trade, or the enterprise of distant territory will sweep from us a golden opportunity. Since the mill started up here a few months ago the flour it has produced is of the best quality, and those who have tried it are enthusiastic in pronouncing it such. The management of this local enterprise are business men and appreciate the importance of building up a business on the merits of their output. In the past the downfall of this mill was due to the sagacity of foreign mills, in placing a limited supply of flour in here at a price below that which it cost to produce, imposing an additional tax upon their local field to make good the deficiency, thereby working the destruction of this mill, affecting every business institution within this territory, thereby depreciating all values. With this mill out of the way, then came their opportunity to inflate the price of flour and mill feed, thereby by compelling the farmers to sell their wheat for shipment at a figure that has been very discouraging to them, realizing from it barely the cost of their bran and shorts. Now is the time for not only the merchants to figure the importance of this mill to their interests but it is as important for the farmer to study the same.
