Summer Cushions. Japanese chijimi cloth not only makes beautiful cushion covers, but endures the hardest usage and launders to look as well as new. Formerly it came only in a rich, warm blue and white, but it is nowshown in soft grays, heliotropes and pinks. Madagescar grass cloth is another fabric in every way desirable for cushions, especially for plazza use. Java cottons are an exquisite novelty. The designs, colors and combinations are, of course, oriental; they come in squares one yard wide, bordered all around, and make charming cushion covers. Persian prints and Japanese crapes come in a narrow range of soft colors, none among them so dainty as the clear blue and white. - Chicago

Something New in the Stars. It would hardly occur to anyone except an astronomer to search among the stars for a new chemical element. Yet the much-talked-of helium was detected in stars before it had been found on the earth, and in the corons of the sun there appears a gas which has not been identified with any terrestrial substance. Lately it was discovered that a few others, exhibit strange spectral lines, which were at first supposed to belong to yet another new element. But more recently reason has been found for thinking that the strange lines are due to hydrogen in some extraordinary condition, only attained in those particular stars .- Youth's Com-

OLD BUTTONS.

A Curious Shop Found in a London Side

In one of the by streets of a crowded thoroughfare in the north of London there is an old gentleman who carries on a very curious trade. His shop is a carlor, and on the window pane is a soard which says: "Buttons sold inside; any button matched-from a 1/d. to 2d." Inside this room are thousand of buttons in little heaps-pearl, glass, bone, jet, shell, brass, cloth, silk and norn buttons-in fact, every variety of putton made.

'You see, sir," he said, "it is often the case that women only buy enough buttons for their dress, and when they ose one it is often difficult to get it natched at the draper's. Those who know me come along here, and I can avariably do it from my stock. I have zot my regular customers, for most tradespeople about here who know me send their customers to me when they are unable to suit them, and they sel-Iom go away without finding the very hing they are after. Where do I get them from? Many come from rag shops, where on the rags sold are often but-

"I make a round of the various marine stores and bargain for them at so much a pound. Another way I obtain them is visiting the dressmakers, who often have buttons left over, and their tady customers seldom ask for them.

Paper Underclothing.

Paper underclothing is much used in Japan. The garments are cut out of large sheets of finely-crisped Japanese paper, the pieces sewed together and the buttonholes strengthened with calico or linen. The fabric is strong even when wet, flexible and extremely light. A fact to be considered is that every Jap takes a hot bath at least once a day. His paper clothes are so cheap that new ones can be afforded frequently.

Stamping Spoons

Spoons are stamped by a piece of machinery which takes the sheet of silter and in one stroke cuts out the spoon
