**Royal Baking** Powder

# Makes The Food More Healthful

Royal Baking Powder possesses peculiar qualities not found in other leavening agents, which arise from the superior fitness, purity

and healthfulness of its ingredients.

Royal Baking Powder leavens the food perfectly by its own inherent power without changing or impairing any of the elements of the flour.

Thus the hot-breads, hot-rolls and muffins, and the delicious hot griddle-cakes raised by the Royal Baking Powder are wholesome and digestible, and may be eaten without distress, even by persons of delicate digestion.

Alum baking powders are low priced, as alum costs but two cents a pound ; but alum is a corrosive poison and it renders the baking powder dangerous to use in food.

It quieted pain and sorrow, Like love overcoming strife; It seemed the harmonious echo From our discordant life.

Will speak in that chord sgain, It may be that only in Heaven I shall bear that grand Amen.
