The Owl Club was a secret organization for the promotion of high-born devil-try. Gentlemen, that club was deadtough. I use the term dead-tough advisedly, because I want you to are good now, and the price is 44 to 47c. understand that its 'jinks' business was a system of cruelty to suckers. The club got tougher as it got older, and its mission was to make night hideous.

"One part of the initiation was fairly fiendish. They shot the candidate with a cannon. He was stripped almost naked and placed in front of the young cannon, the fore of which you could easily run your arm into. The field piece was oaded in the presence of the victim. He was given a chance to see that real powder and leaden ball were put in. When the charge was ready for the fuse the victim was blindfolded. Before the word 'fire!' was given the leaden ball was removed and a bag of water was placed in its stead. The charge of powder was estimated to throw the skin bag of water nearly the length of the hall, striking the victim on the breast, where it would burst with a pop and douche the candidate with cold water.

How We Use Up Our Forests.

It is estimated that it takes twenty-two acres of spruce land to furnish enough wood pulp paper to run a large metro-politan deily just two days. The writer who makes this statement deplores the time when, at this rate, our forests will entirely disappear, and paper be very scarce and expensive. Meantime, the art of printing continues, because there are many truths the world should know; among others, that Hostetter's Stomach Bitters is a cure for diseases of the stombeen the standard remedy of the American people for 50 years. The Saving of Money by the use

Baking Powder is considerable. Royal is economical, because it possesses more leavening power and goes further.

Royal saves also because it always makes fine, light, sweet food; never wastes good flour; butter and eggs.

More important still is the saving in health. Royal Baking Powder adds antidyspeptic qualities to the food.

There is no baking powder so economical in practical use, no matter how little others may cost, as the Royal

Imitation baking powders almost invariably contain alum. Alum makes the food unwholesome.
