BAD BLOOD, BAD COMPLEXION.

The skin is the seat of an almost endless variety of diseases. They are known by various names, but are all due to the same cause, acid and other poisons in the blood that irritate and interfere with the proper action of the skin.

To have a smooth, soft skin, free from all eruptions, the blood must be kept pure and healthy. The many preparations of arsenic and potash and the large number of face powders and lotions generally used in this class of diseases cover up for a short time, but cannot remove permanently the ugly blotches and the red, disfiguring pimples.

Eternal vigilance is the price of a beautiful complexion when such remedies are relied on.

Mrs. H. T. Shobe, 2704 Lucas Avenue, St. Louis, Mo., says: "My daughter was afflicted for years with a disfiguring eruption on her face, which resisted all treatment. She was taken to two celebrated health springs, but received no benefit. Many medicines were prescribed, but without result, until we decided to try S. S. S., and by the time the first bottle was finished the eruption began to disappear. A dozen bottles cured her completely and left her skin perfectly smooth. She is now seventeen years old, and not a sign of the embarrassing disease has ever returned."

S. S. S. is a positive, unfailing cure for the worst forms of skin troubles. It is the greatest of all blood purifiers, and the only one guaranteed purely vegetable.

Bad blood makes bad complexions.

SSS purifies and invigorates the old and makes new, rich blood that nourishes the body and keeps the skin active and healthy and in proper condition to perform its part towards carrying off the impurities from the body.

If you have Eczema, Tetter, Acne, Salt Rheum, Psoriasis, or your skin is rough and pimply, send for our book on Blood and Skin Diseases and write our physicians about your case. No charge whatever for this service.

They're unrivalled to regulate stomach, liver kidneys and bowels. Perfect satisfaction guaranteed by Slocum Drug Co. Only 50 cents.

"My father and sister both died of consumption," writes J. T. Weatherwax, of Wyandotte, Mich., "and I was saved from the same frightful fate only by Dr. King's New Discovery. "It is with a good deal of pleasure and satisfaction that I recommend Chamberlain's Colic, Cholera and Diarrhoea Remedy," says Druggist A. W. Sawtelle of Hartford Conn. "A lady customer, seeing the remedy exposed for sale on my show case, said to me: 'I really believe that medicine saved my life the past summer while at the shore,' and she [illegible] over its merits that I at once made up my mind to recommend it in the future. WEEKLY CROP BULLETIN.

PORTLAND, May 27, 1901.

The week has been showery and moderately cool until Saturday, when it became unseasonably warm and thunderstorms were prevalent in Southern Oregon and the upper portion of the Willamette valley. The maximum temperatures during the week in Western Oregon ranged between 56 and 87 degrees, and the minimum temperatures between 41 and 60 degrees. In Eastern Oregon the maximum temperatures ranged between 56 and 84 degrees, and the minimum temperatures between 32 and 62 degrees. A destructive hailstorm passed over Springfield, in Lane county, Oregon, Saturday afternoon and completely ruined all fall grain, fruit and gardens within its track. The extent of this storm has not yet been determined, but the losses, while not affecting the state as a whole, will be severely felt by many individuals.

Reports regarding fall wheat are not as favorable as heretofore. The hessian fly has made its appearance in portions of Washington county, and the bottom-land fields are turning yellow in Marion and Linn counties, while the aphis, cutworms and other pests have done some slight damage at widely scattered places throughout the Willamette valley. In Eastern Oregon the wheat continues in a promising condition. Corn is making a slow growth and needs warmer weather. Hops, grass and pasturage are growing fast and stock is fat and sleek. Alfalfa and clover will be ready to cut in about two weeks.

A BIG BATTLESHIP.

According to dispatches, the Navy department is considering plans for the construction of the most formidable battleship afloat. According to the plans, this monster ship will be 450 feet long, of 16,000 tons displacement, and have a speed of 21 knots. It will mount four 12-inch guns, 16 8-inch guns, and 32 3-inch. This powerful warship will be over 1000 tons heavier than any battleship ever constructed abroad, and its battery will not be equalled by any fighting ship ever built, while its speed will equal that of most of the swift cruisers.

The comparative effectiveness of battleships and armored cruisers is still a mooted question, although some of our lately built armored cruisers are really formidable battleships in everything but classification. Some naval authorities are disposed to doubt the advisability of constructing great battleships, which cost an immense sum of money and have never been fairly tried as fighting machines. But as other naval powers put their chief reliance upon battleships, and they may be as effective as theory estimates, the United States must provide itself with a sufficient number of these ships to be ready for emergencies. This being the case, it will minister to our national pride and add to our standing abroad to have the greatest warship of the class in the world.

The Colorado state board of live stock commissioners has adopted quarantine regulations as follows: Sheep shipped or driven into the state from Washington, Oregon, Montana, Wyoming, California, Nevada, Utah, Texas, Arizona, New Mexico, Oklahoma and the republic of Mexico shall be inspected before entering the state and it must be shown that they have been free from disease and have not been in contact with diseased sheep within sixty days before entering Colorado. The inspection fee for sheep shall be one cent per head, the rate formerly charged. Sheep from the above districts may enter Colorado without inspection, provided they are to be sent through by rail without unloading, except at quarantine pens. All cars and pens must be disinfected.—American Wool and Cotton Reporter.
