CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

"My neighbor across the street was sick for over a week, had two or three bottles of medicine from the doctor. He used them for three or four days without relief, then called in another who treated him for some days and gave him no relief, so discharged him. I went over to see him the next morning. He said his bowels were in a terrible fix, that they had been running off so long that it was almost bloody flux. I asked him if he had tried Chamberlain's Colic, Cholera and Diarrhoea Remedy and he said, 'No.' I went home and brought him my bottle and gave him one dose; told him to take another dose in fifteen or twenty minutes if he did not find relief, but he took no more and was entirely cured." WEEKLY CROP BULLETIN

Portland, July 29, 1901.

The past week has been rainless and seasonable in the matter of warmth and sunshine. The maximum temperatures during the week in western Oregon ranged between 70 and 86 degrees, and the minimum temperatures between 48 and 62 degrees. In eastern Oregon the maximum temperatures ranged between 76 and 92 degrees, and the minimum temperatures between 46 and 66 degrees. All crops have made rapid advancement, but rain is now needed to revive pastures and for late crops, such as corn, gardens and potatoes.

Hay baling is in active progress and a good crop of hay has been secured. The second crop of alfalfa is growing nicely and will soon be ready to cut. Pastures are failing and range stock is beginning to lose flesh. Grain is ripening rapidly and its harvest is well under way. The wheat crop promises good yields in all sections and the quality is above the average. In Umatilla county the damage by the late frost is not as great as previously reported, and it is now expected that an average crop will be secured in that section. Barley is reported to be of excellent quality.

Corn and potatoes are being seriously injured by dry weather, and unless rain comes soon their yields will be materially reduced. Hops continue doing nicely, although many correspondents report lice in the yards and much spraying being done. Sugar beets in Union county and onions in Washington county are making splendid advancement. Italian or Fellenberg prunes promise to make a fair crop. Early apples and peaches are ripe.

COLUMBIA RIVER VALLEY.

Sherman county.—Harvest has begun and crops are turning out better than anticipated, as the frost in the month of June did not do as much damage as previously estimated. Nice cool weather and wheat heading finely; not dry enough to shatter.

Umatilla county.—Harvesting is fairly under way, with favorable weather. Barley is generally thrashed, with good yields and fair quality. While the wheat crop will not be as large as promised earlier in the season, the indications point to an average yield of fair quality. So far as thrashed, farmers report from 20 to 40 bushels per acre.

Wasco county.—The weather during the past week has been dry and warm; nights cool. Haying about completed; crop fine and well cured. Gardens are fair; early vegetables are ripe. Fruit is doing well. The continued dry weather has shortened pasturage.

Gilliam county.—The harvest of spring grain is now well under way. Spring wheat will yield from 12 to 25 bushels, fall wheat from 12 to 22 bushels, and volunteer wheat from 15 to 20 bushels.

PLATEAU REGION.

Malheur county.—First crop alfalfa in stack; yield light, owing to frost. Timothy and wild hay promise fair; not all harvested yet. Weather very warm. Maximum for the week, 107; minimum, 41.

Crook county.—Harvesting of first crop of alfalfa just finished; the best crop ever raised in this county. Grain harvest has begun; will make about three-fourths of a crop. The fruit crop is good. Gardens first class. Raspberries fine. Pasture is drying up some, but is still better than for years.
