Farm For Sale.

The C. A. Rhea Farm on Willow Creek, 1 mile below Ione, may now be bought for $20 an acre, easy terms, one-third cash. Has 240 acres, mostly rich bottom land, and good improvements. Several tracts may now be cut off and sold at 50 dollars an acre. Address C. A. Rhea, Ione, Ogn.

Asthma Cure Free!

Asthmalene Brings Instant Relief and Permanent Cure in all Cases.

SENT ABSOLUTELY FREE ON RECEIPT OF POSTAL.

There is nothing like Asthmalene. It brings instant relief, even in the worst cases. It cures when all else fails.

The Rev. C. F. Wells, of Villa Ridge, Ill., says: "Your trial bottle of Asthmalene received in good condition. I cannot tell you how thankful I feel for the good derived from it. I was a slave, chained with putrid sore throat and asthma for ten years. I despaired of ever being cured. I saw your advertisement for the cure of this dreadful and tormenting disease, asthma, and thought you had overspoken yourselves, but resolved to give it a trial. To my astonishment, the trial acted like a charm. Send me a full-size bottle."

We want to send to every sufferer a trial treatment of Asthmalene, similar to the one that cured Mr. Wells. We'll send it by mail Postpaid, Absolutely Free of Charge, to any sufferer who will write for it, even on a postal. Never mind, though you are despairing, however bad your case, Asthmalene will relieve and cure. The worse your case, the more glad we are to send it. Do not delay, write at once, addressing DR. TAFT BROS.' MEDICINE CO., 79 East 130th St., N. Y. City. Sold by all Druggists.

SCURVY APPEARS AT NOME

Great Scarcity of Fresh Vegetables at Camp.

A NEW RAILROAD PLANNED

Possibilities That One or More Lines Will be Built During the Coming Year or Two.

SEATTLE, Feb. 3.—The first mails to arrive from Nome, St. Michael, Council City, Rampart and other points in Northwestern Alaska were brought down from the North on the steamship Dirigo, which arrived this morning. Mail came on the Dirigo from Nome as late as November 15, from Council City as late as November 7, from St. Michael as late as November 21, from Rampart as late as December 17, from Eagle as late as January 26, and from Dawson as late as January 13.

Nothing but first class mail was received from points below Dawson, as the mail contracts do not provide for the handling of other than letter mail via that route. It is apparent from the time required for the carriers to make the trip that they must have had a very severe time of it. Two months and two days were required to make the trip from Nome to Dawson. The contract time for the carrying of the mail is 60 days for the trip, and it is probable that this time will be made without serious difficulty after the winter weather is settled and the trail is in better condition.

Scurvy is prevailing in and about Nome to an alarming degree. There were but few potatoes left in the district, and a great lack of all kinds of fresh vegetables was apparent. Many of the poor prospectors who were unable to get out in the fall are "hibernating" in their cabins, and it is among this class that the most pronounced cases of scurvy were found.

The poor of Nome were proving a heavy tax on the charity of the camp. Destitution was general. There had been no advices from the outside since navigation closed. The winter was mild, and an early break-up was looked for. Travel over the country was greatly impeded by the mild weather. In many places the tundra had been too soft to bear up travelers, and communication with outlying camps was cut off.

KICK A DOG

Kick a dog and he bites you. He bites you and you kick him. The more you kick the more he bites and the more he bites the more you kick. Each makes the other worse.

A thin body makes thin blood. Thin blood makes a thin body. Each makes the other worse. If there is going to be a change the help must come from outside.

Scott's Emulsion is the right help. It breaks up such a combination. First it sets the stomach right. Then it enriches the blood. That strengthens the body and it begins to grow new flesh.

A strong body makes rich blood and rich blood makes a strong body. Each makes the other better. This is the way Scott's Emulsion puts the thin body on its feet. Now it can get along by itself. No need of medicine.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle. Send for free sample.

NEW ROAD PLANNED.

Imagination of Pendleton Correspondent Somewhat Swelled.

Pendleton, Or., Feb. 3.—A correspondent to the Oregonian says: It is positively known that the officials of the O. R. & N. Co. and the W. & C. R. R. R. Co. have carefully examined the various routes leading from this point into the interior, to the south, and that there are possibilities that one or more lines may be built during the coming year or two. Surveys have been made, and matters of tonnage have been estimated. One of the officials in question stated to your correspondent, a few days ago, that he himself had gone over the ground, and was impressed with the feasibility of building south from here. He finds an immense tonnage in timber waiting to be developed when a road shall go in, timber as good as any standing on the north coast, and practically inexhaustible. Also there are industries that would contribute to the tonnage of a road, dairying, mining, livestock and some agriculture. This relates to outgoing tonnage, which be believed would be sufficiently heavy to warrant building the road. As to ingoing tonnage, the country tapped by a road such as is proposed buys heavily per capita, more per capita than, perhaps, any other section of the state. Stockmen consume more provisions than any other class, excepting miners, who demand very much to the man in foodstuffs.

Not more than 60 miles from Pendleton begins the mineral belt, where are numerous deposits of gold, silver and copper, waiting for transportation before being developed. It was asserted by the railway official referred to that it has been positively demonstrated that many mines in the Susanville district would be paying properties so soon as the ore could be taken to the smelters at a less cost for freighting than must now be paid. Now they must haul to Whitney, after the long wagon haul, paying, in addition, the rail charges. These are too much, taken together, to warrant operation of the Susanville quartz properties, hence they remain dormant.

It is thought that there is a strong possibility that a branch line may be sent into the interior from Heppner, in the event that the Heppner Coal Company proves that it has a deposit of merchantable coal fit for use by railroads and manufacturers. The company has, according to reliable reports, found better indications as it has gone deeper into the ground. This road, if built, would exhaust the railroad building possibilities for this section, and, so it is thought here, preclude the running of a line from Pendleton.

A. Johnson, near Nyssa, has sold 2240 tons of alfalfa hay from a 320 acre meadow. This hay was all produced this season and was the second year from planting, the entire tract, with the exception, having been sown last year. The farmers in the vicinity of Ontario and Arcadia universally report that they have been able this season to make their land clear them 10 per cent on $100 per acre, says the correspondent of the Boise Statesman. This is the standard aimed at by the majority of farmers. The price of land is rapidly increasing, and places that were offered last season for $40 per acre are now held at $50 or $60. Raw land that could have been picked up last year for $15 to $20 is now selling for $20 to $30. Real estate men here state that their main difficulty is in securing land to sell.

The second annual district convention of the Knights of Pythias was held at The Dalles Saturday, with about 200 Knights from different sections of the state in attendance. This number of visitors, in addition to the local lodge, swelled the meeting to the largest gathering of Pythians ever held in that city.

IT GIRDLES THE GLOBE.

The fame of Bucklen's Arnica Salve, as the best in the world, extends round the earth. It's the one perfect healer of Cuts, Corns, Burns, Bruises, Sores, Scalds, Boils, Ulcers, Felons, Aches, Pains and all Skin Eruptions. Only infallible Pile cure. 25c a box at Slocum's drug store.

BIG GUN FIRED IN ARMORY.

In Indoor Practice Shells Made of Rubber and Air Used Instead of Powder.

At the review of the Thirteenth regiment, heavy artillery, in the Sumner Avenue armory, Brooklyn, one night lately, a big eight-inch disappearing coast gun was fired for the first time in public. Brig. Gen. Wallace F. Randolph, chief of artillery, U. S. A., who is stationed at Washington, superintended the firing, says a New York exchange. A target eight feet square was erected in the center of the drill hall 300 feet from the gun. The gun was elevated and sighted, and then the first shell, which on this occasion was made of rubber, was fired by compressed air, instead of powder. The shell struck the top of the target. The second shell landed near the bottom of the target, and the third went over the mark, landing at the feet of the spectators, who were seated on the side of the armory directly opposite the gun. Another shot was fired, and this time the shell struck the target almost in the center, eliciting much applause. The artillery men then worked the gun so that it disappeared several times.

SPONGE FISHERS IN LUCK.

Constant Demand for the Fungi Gives Many of Them Profitable Employment.

The sponge fisheries along the coast of Florida have been pushed to the utmost limit, until the annual sales amount to $600,000, says a recent report. The product sells as high as $2.50 a pound, which makes the business most profitable. There are 60 schooners in the trade and the business is the staple of many of the towns along the coast of the state. The fishermen have brought the business to a high state of perfection, and they are able to make large catches in season. The sponge fishing is done in deep water, the best specimens of the large bath sponges being obtained from 50 feet below the surface. They are located with a water glass and then picked with a long pole carrying on its end a blade like the letter S, which cuts the sponge loose with a twist, and then it is brought to the surface, if there is luck; and, if not, and it gets away, it is lost forever. The men become very expert in the business and they will carry it on during high winds, losing very few of the sponges.

An Extinct Volcano in New York.

A Harvard professor has discovered what he considers the remains of an extinct volcano at Schuylerville, N. Y., a small country place already famous in American history.

Immigrants to Cuba.

The Havana Post estimates that 60,000 immigrants, mostly American and Spanish farm workers, have landed in Cuba in the last three years. The number also includes about 1,000 Chinese.

Chimney of Paper.

A paper chimney 50 feet high and fireproof is one of the curiosities of Breslau, Germany.

Luck of a Grocery Clerk.

A Geneva (N. Y.) grocery clerk has inherited $1,500,000. No Geneva woman can hope now to be admitted to the best circles, says the Chicago Times-Herald, unless she is able to boast that he used to weigh out sugar for her.

SHEEP NOTES.

A trainload of sheep and fat cattle were shipped recently from Bozeman, Montana, to Seattle, Washington. The sheep were purchased by the Carstens Brothers of Seattle, for the purpose of canning for the Alaska trade. The sheep were fat wethers and were fattened for the market by local farmers. The sheep averaged about 120 pounds. Nearly all the farmers sold the wethers at the rate of $3 75 per cwt., though some of them sold at about $4.50 per head. The cattle were purchased by the same firm from Joseph Kopp, who is stated to have realized about $50 per head. There are still left in the valley about 4,000 head of lambs and two small bunches of ewes, which are being fattened, and will probably be shipped East within the next week or two. This is practically the first time the farmers of this valley have experimented in sheep feeding, but the indications are that this method of fertilizing the farm by means of the sheep, as well as a better plan to dispose of the immense quantities of hay which are now being raised nearly all over the country, will become quite popular. The ranchers feel now that they have a ready market in the West, as the buyers who have been in this vicinity the past few weeks would have bought 20,000 head of fat wethers if they could have procured them. Cattle are also in great demand and are good property to the rancher, as they can be turned off at any time after Christmas. It is probable that at least 20,000 head of sheep and cattle will be fattened for the market in this vicinity next winter.

Rea Brothers of Big Timber, recently shipped another bunch of sheep which have been fed on alfalfa for the past 50 days by James Vestal and Robert Neumayer. The sheep were of mixed ages—wethers and ewes—and showed an average increase of 11 pounds a head. The three-year-olds showed 15 pounds increase.

ROYAL
Baking Powder
Most healthful leavener in the world.
Goes farther.
ROYAL BAKING POWDER CO., NEW YORK.

Miss Lillian Martin, Graduate of Training School for Nurses, Brantford, Can., now of Milwaukee, Wis., Testifies that the Hospital Doctors Rely Upon Lydia E. Pinkham's Vegetable Compound to Cure Severe Cases of Woman's Ills. She says:

"DEAR MRS. PINKHAM:—While we are taught in the training schools throughout the country to look down upon patent medicines, and while the doctors in the hospitals speak slightingly of them to patients, I have found that they really know different. I have frequently known physicians to give Lydia E. Pinkham's Vegetable Compound to women suffering with the most serious complaints, ovarian troubles, falling of the womb, leucorrhoea, and other troubles. They would as a rule put the Compound in regular medicine bottles and label it 'Tonic,' or other names, but I knew it was your Compound, and have seen them fill it in prescription bottles. I have never seen anything but happy results from its use; inflammation and ulceration has been relieved and cured in a few weeks, especially where your Sanative Wash has been applied also. I feel it but due to you to give proper credit for Lydia E. Pinkham's Vegetable Compound; I have great faith in it and often recommend it to others."—MISS LILLIAN MARTIN, 884 27th Ave., Milwaukee Wis.

$5000 FORFEIT IF THE ABOVE LETTER IS NOT GENUINE.

If you are sick, write Mrs. Pinkham, Lynn, Mass., for advice.
