The Heppner Gazette

Issued Thursday Morning.

Warnock & Michell.

Entered at the Postoffice at Heppner Oregon, as second-class matter.

THURSDAY, ... February 27, 1902

Now is the time to register; it is not much trouble.

Senator Simon will soon arrive in Portland to take charge of his political interests. He has a big job on his hands.

Germany is highly pleased over the reception given to Prince Henry in this country. The Prince's visit will bind ties of friendship that will not soon be forgotten.

The Moody-Simon machine is now working under forced draught. The people are tired of political trickery and selfishness. The machine cannot hold together much longer.

The disgusting spectacle of a rough and tumble fight in the senate of the United States between Senators Tillman and McLaurin of South Carolina, is a disgrace to the nation. Both men should be expelled from the senate and disgraced, if such a thing could be possible. Such ruffianism should not be tolerated.

Enterprising citizens of Baker City have subscribed $600 to be expended in getting out a descriptive folder advertising that city and tributary country. The O. R. & N. Co. will distribute the advertising matter free of charge. The railroad company will place the advertising where it will do the most good.

Will Umatilla county Republicans nominate a Simon legislative ticket or any member thereof? They should not. Will they be a party to returning Joe Simon to the United States senate for six years and placing him in a position of power for so long a time? The Tribune believes that the sentiment of Umatilla county is almost unanimously against Simonism.—Pendleton Tribune.

The second annual illustrated edition of the Shaniko Leader has been received. The Leader certainly deserves much credit for getting out such an edition. It shows remarkable enterprise. It is devoted to the interests of Wasco, Sherman and Crook counties in able and comprehensive articles. It has many half-tone illustrations and the work is something of which Shaniko people should feel proud.

GROWTH OF THE NAVY OF THE UNITED STATES.

Like the advancement and progress of everything American which excites the wonder of the world, the American navy is rapidly getting into the front ranks. Modern construction of the navy of the United States began only 18 years ago in the building of a few cruisers. As early as 1858, the construction of iron clads was commenced abroad, and at the time of commencement of the United States navy, England, France and Russia had powerful navies. Up to 1883 not a single war vessel of modern type had been constructed by the United States, and as late as 1886, this country was rated as nineteenth in effective force among the nations, or absolutely without rank as a naval power.

Such countries as Turkey, Greece, Brazil, Chili and Portugal ranked ahead of the United States. Since that time the demand for a powerful navy has asserted itself with wonderful effect. Since the war with Spain, our naval development has been great, not only in the number of vessels built or in course of construction, but the vast improvement of the fighting force of the new vessels as well. Since the Spanish-American war of 1898, the number of fighting vessels commissioned, completed or now under course of construction, reaches a total of 85 ships, that is 85 ships that actually carry guns.

In the construction of the vessels since the war with Spain, great advancement has been made. The new ships are vastly superior to those which won the victories of Santiago and Manila Bay. Gun for gun, the weapon of today delivers a blow which is in some cases nearly 100 per cent greater than that delivered by the same piece in 1898; while the armor with which the latest of our ships will be protected has from 20 to 25 per cent more power to resist penetration than the best armor carried by our vessels in the war. There is to be considered furthermore the great advantage conferred by the substitution of smokeless for the old smoke producing powder.

Improved mounts, perfect balancing of the guns, and telescopic sights, will enable the gunner to keep his piece, except in a heavy seaway, continually upon the object.

The economy of weight in motive power, and the even greater saving of weight accomplished by better methods of armor plate making, have enabled the naval constructor to allot a larger share of the total displacement to motive power, with the result that speeds have gone up from the 15 knots of the Indiana to the 18 and 19 knots of the Maine and Virginia classes.

Today, the United States takes the fourth position in rank, being only outclassed by England, France and Russia.

IONE HAPPENINGS

IONE, Feb. 25, 1902.

D. H. Grabill will erect a fine dwelling in Ione this summer.

Mrs. W. J. Blake and Mrs. John Blake and children are visiting in Idaho.

Miss Lee Woolery and Mrs. Brierly are sojourning in Portland this week.

A new dwelling is being erected for Frank Akers, a two story modern cottage.

Sidewalks for several blocks on both sides of Second street will be laid right away.

A large building will be erected shortly by the Baptists for the purpose of church services.

Billy Reed has purchased the old Frank Akers house and will improve it by putting on rustic and paint.

Two large rooms will be added to the school house as soon after school closes as is possible to get the work done.

Crop prospects were reported never better than at present by parties coming to Ione from all parts of Morrow county last week.

New dwellings are in evidence in all parts of town. Billy Corson is erecting a neat two story cottage on Second street near Cherry.

Horse thieves visited the vicinity of Ione recently and helped themselves to horses belonging to Mrs. Josephine Currin and Rube Sperry, and also took a watch and a suit of clothing from the Currin residence. Trace of the thieves has been secured and constables are now in pursuit of them.

J. A. Woolery will build a new bank building this spring, and so the town grows. A fine new hall building will be erected this spring and the lower part used for store and the upper rooms for lodges and other societies and for shows and amusements. It will be fitted up in elegant style and be a credit to the town.

To the Ladies of Heppner and Vicinity.

After familiarizing myself with the styles of Spring Millinery at Portland, for three weeks, learning the latest mode of trimming, I will select one of the finest lines of Spring Millinery and ask for a liberal patronage from the ladies of Heppner and vicinity. Opening day about March 20. L. E. Cohn, residence. 70-73

Marion county has recently purchased a new steel rockcrusher, to be used in breaking rock for the county roads.

During the last 12 months 100 cases have been docketed in the supreme court at Salem. During the preceding 12 months 110 cases were docketed, and in the same period preceding that, 116 cases were docketed. This shows a gradual decrease in the number of cases appealed to the supreme court.

Portland led all other ports in the United States in wheat shipments for the month of January. The Oregon metropolis not only stood at the head of the list, but she shipped nearly one-fourth of all the wheat shipped from the United States last month, and the shipments from this city were greater than those of New York, Philadelphia, Boston, Baltimore and Galveston combined.

S. L. Milner of Milner, one of the largest sheep owners in eastern Montana, recently shipped 7,500 head to the South Omaha market. The sheep comprise 5,500 lambs and 2,000 old ewes, which he has been feeding in the valley west of Billings for the past three months. The lambs are probably the first to go direct from Billings to the market after being fed on grain. They have been given one half of a pound of grain per day and Mr. Milner says the result is most satisfactory. They weigh close to 75 pounds.

Tonight the "salters" at the Pendleton Scouring Mill will be laid off and the scouring mill will close down in about 10 days. This is because the wool clip has run out and there will be nothing to do in the line of scouring until the spring clip begins to come in, which will be in April says Saturday's East Oregonian. The mill has had a longer and most successful run since it started up about the first of February last year, than ever before in its history. It has been running steadily with a day and a night shift, for more than a year, and to count 10 hours a day's work, the mill has put in 18 months running in that time, handling a total of 4,500,000 pounds of wool. This is an enormous run and is by far the most wool handled in one season during the nine years the mill has been in operation.

FASTEST BOAT IN THE WORLD

The submarine boat recently built for the Russian government is supposed to be the fastest in the world. It is claimed that it will cross the Atlantic ocean in two and one-half days. The secret of its extraordinary speed lies in its peculiar construction. The secret of the marvelous success of Hostetter's Stomach Bitters lies in the scientific compounding and extraction of the curative properties of certain roots and herbs. It is a family medicine and can be relied on in cases of belching, flatulency, sick headache, dizziness, indigestion and dyspepsia. It is also an excellent appetizer and nerve strengthener, and as a preventive of malaria, fever and ague it is unequalled. Give it a trial, and you will feel its beneficial effects from the start.

The following interesting history of a box of Oregon apples is furnished by Rev. J. J. Walter, who has just returned from a four weeks' trip in Southern Oregon. The box was packed by Miss Delah Williams, September 10, 1901. Into it she placed the following note: "Medford, Ore., Sept. 10, 1901.—This box of apples was packed by Miss Delah Williams, of Central Point, Oregon. Will the person purchasing this box please write me, stating the price paid for the box and condition of the apples, and where purchased?" The original letter was returned to Miss Williams, and she received it on the 5th of this month, stating that the apples were purchased in Dawson City, January 17, 1902; condition first class and cost $8. The writer also enclosed a dollar bill to the young lady.—Oregonian.

A mass meeting was held in La Grande to discuss the best means of suppressing gambling in that city. A large number of representative men and women was present, and strong resolutions against gambling and in favor of enforcing the laws were adopted. A meeting to nominate candidates was ordered called next week.

The GAZETTE and Weekly Oregonian one year for $2.25.

HEPPNER CHURCHES.

Episcopal church—Rev. W. E. Potwine.

The GAZETTE has made arrangements to club with the Weekly Inter Ocean of Chicago. The regular subscription price of the Inter Ocean is $1.00 per year and the regular price of the GAZETTE is $1.50. By special arrangement, both papers will be furnished one year for $1.60. The old, reliable Inter Ocean is too well known to need much recommendation. It will be a valuable addition to the reading matter for the winter. Besides giving all the news, it has many special features, making it one of the most desirable weeklies in the United States. This special, liberal offer is limited and will be withdrawn in a short time.
