POSSIBILITIES OF THE POSTAL SYSTEM.

Cheap Mail Facilities One of the Chief Factors in Our Prosperity and Progress.

"Common is the commonplace." The most valuable of civil benefits is such a commonplace matter that we scarcely give it a thought. It would take a winter on a whaler nipped in an ice floe to make us truly appreciable of the worth of the postal service. What a wonderful thing it is! Wonderful in its organization, with its vast machinery for the collection and distribution of letters, its railway mail cars, its route riders, the unfailing order and precision of its methods. Wonderful it is too in its results. It knits together families widely

separated. It carries across the sea some tender lover's message or perhaps a little flower picked from the daisied grave of an English churchyard. Every hour of every day the mail bag is packed with words which waken love and laughter, and words which deepen the furrow in the cheek and dim the failing sight with bitter tears.

But with all this there is going on through the mail service a dissemination of human knowledge, a reaching out of human help which is one of the crowning blessings of our century. The correspondence schools led by Chautauqua, are sending to every village and hamlet the broader knowledge which is so eagerly craved by many who are shut in to the homely duties of a humble life. Without the mail system this plan of education would be impracticable.

Every mail, too, carries from the great centers, the advice of great physicians, which it would be impossible for the distant public to obtain were it not for the mails. Few people realize how many thousand people depend on the mail service for medical treatment. Not long ago when some postal affairs were being discussed in connection with the erection of the new postoffice building in Buffalo, N. Y., some light was thrown on this subject by the statement that the mail by Dr. R. V. Pierce amounted daily to something over 1,500 pieces. Of course this is not a common case, because Dr. Pierce's relation as chief consulting physician to Buffalo's famous institution, The Invalids Hotel and Surgical Institute, makes his advice and that of his staff of nearly a score of skilled and experienced specialists much sought after, especially by women, to the treatment and cure of whose special diseases Dr. Pierce has devoted over thirty years of almost constant labor. But though this example is out of the ordinary, it may serve as an evidence of the amazing benefits reaped by the public from the mail service. It puts every outlying hamlet in touch with the most advanced medical specialism of the day. It gives at a cost of a two-cent stamp, the skill and experience that it has taken years to acquire. Literally at the cost of a two-cent stamp, since Dr. Pierce invites sick women to consult him by letter without charge. And this would seem to be one of the most remarkable services rendered by the postal system, perhaps the supreme service of all. For while it is a splendid thing to be able to shop in New York while living in Kansas, and a grand thing to be able to command the learning of great professors while working in the Michigan woods, it is a still grander thing that by means of this cheaply supplied service, men like Dr. Pierce, who have the disposition to be helpful, are enabled to place their skill and knowledge at the disposal of those who are being dragged down by disease without the possibility of help from those about them. When one contemplates the vast and far reaching benefits of the mail service, so briefly touched upon in this article, it makes the familiar gray uniform of the postman the most glorious of all uniforms, for it is worn by the soldiers of the army of peace. It makes one feel like taking his hat off to the on-rushing mail train, and cheering the work and wisdom of Uncle Sam.

PEOPLE OF THE GLOBE

Interesting Information Furnished by the Last Census.

Gains in Population in the Various Countries Accurately Ascertained—Changes for Better and for Worse.

There are now in the world 1,512,333,000 people. The total is that of the latest census figures in civilized countries and of accepted estimates for countries where there are no census statistics.

Twenty-five years ago the estimates for half explored regions were uniformly too high. They are now based on information, and are more reliable. In the meantime, more care has been taken in the collection of population statistics in Europe and America, and comparisons are possible to show the actual changes for better or worse, says the Chicago Inter Ocean.

Austria-Hungary reports a population of 46,900,835 in 1891, against a population of 41,245,000 in 1891, a gain of 5,655,835. Belgium, with its dense population, has 675,211 more people than ten years ago, or a total of 6,744,532. Denmark shows a gain in ten years of 262,106, Switzerland of 396,063. In the same ten years Bolivia, on the western continent, has gained 60,000 in population and Brazil 2,167,000, while Uruguay has increased from 438,245 to 900,000.

Among the great powers of the world France has increased in population in ten years from 38,342,948 to 38,641,333; Germany from 49,428,470 to 56,345,014; Great Britain from 38,104,975 to 41,454,219; the United States from 62,819,289 to 76,304,799.

The Russian empire has on its 8,660,395 square miles of territory a population of 128,932,173; the whole British empire has an area of 11,553,528 square miles and a population of 390,000,000; Germany and colonies or dependencies have an area of 1,237,393 square miles and a population of 71,032,014; France and dependencies an area of 4,571,848 square miles and a population of 94,781,183; Japan and Formosa 161,198 square miles and a population of 46,455,297; the United States, including Porto Rico, the Philippines and Guam, has an area of 3,725,310 square miles and a population of 85,267,019.

The Netherlands and colonies have an area of 776,400 square miles and a population of 34,000,000. Included in the French colonies are 1,684,000 square miles of the Sahara region. The Chinese empire is given an area of 4,234,910 square miles and a population of 390,680,000, and the Turkish empire an area of 1,115,046 square miles and a population of 24,931,000, or, including tributary states, Egypt and the Soudan, an area of 2,516,000 square miles and a population of 49,231,000.

Mexico has increased in population in six years from 12,491,573 to 13,570,545; Italy in 20 years from 28,459,628 to 32,449,754; Australia in ten years from 3,183,237 to 3,777,221; Canada from 4,833,239 to 5,338,883.

The noticeable increase in Canada has been in British Columbia, Manitoba and the territories, where the ratio of increase is about the same as in Alaska. Mexico shows about the same ratio of increase as Argentina, not so large as that of Brazil, but larger than that of Australia.

CITING A PRECEDENT.

The Effective Rebuke of a Good-Natured Southern Colonel Administered to Mischievous Students.

If there is one thing a mischief-maker dreads more than another, it is a laugh at his expense, but the heartier the laugh the more the world in general enjoys itself. A capital opportunity recently fell in the way of a southern gentleman, and it is pleasant to know that he made the most of it, says Youth's Companion.

He is a southern "colonel" of the old type living in a college town, and it is the privilege of a number of students to board at his house. Now by some law of nature, the student appetite for food is keenest about midnight, and in consequence the colonel's larder suffered nightly. Hams shrunk and jams declined, while Friday's baking no longer supplied cookies for the week. The housekeeper was in despair, and the colonel grew thoughtful.

Finally, one Sunday morning, as the colonel, his family and boarders gathered around the breakfast-table, the ravages of the night before showed forth past hiding. The ham was a bone, and there was no golden sirup for the cakes. The colonel's face wore its most genial smile.

"Boys," said he, "I can't help thinking sometimes of a story of John Randolph. He had a dog he loved as much as the dog loved mischief, and watch Fido as he would, he couldn't stop the little creature's ravages.

"One morning Fido entered the library about two minutes before his master, leaped into a chair, dragged down a book that lay open in it, and had just time to munch a chapter or two and leave his marks on the cover when his master appeared. Randolph stood in the doorway, surveying the scene like a philosopher, while the dog slunk off to wait for his whipping under the sofa. But Randolph only looked at him; then picking up the book, he took a pen and wrote on the fly-leaf: 'Done by Fido when he was a pup.'"

The colonel gave a little guffaw, while his family shouted with laughter. The students grew very red and then laughed, too. After that the pantry was quite safe.

Unaccountable Punishment.

Turquoises from Sinai.

The finest turquoises in the world come at present from the Mount Sinai peninsula. Formerly the mines of Persia supplied them in abundance, but now these mines are becoming exhausted, and concessions have recently been obtained from the Egyptian government for working the ancient Sinai mines, which, as hieroglyphics carved on the rocks show, were originally opened by the Egyptians.

Great quanities of snow in the mountains in Southern Oregon insures plenty of water for mining and irrigating purposes.

When a woman is nervous her imagination gives fantastic and terrifying shapes to the most familiar objects. By day she starts in fear at every sudden or unfamiliar sound. By night the furniture of her room takes on affrighting forms of ghost or goblin. You can't reason with the nerves. Neither logic nor love can quiet them. They must be nourished and then the outcry of the nerves will cease as naturally as a hungry child ceases to cry when fed.

For nervous women there is no better tonic and nervine than Dr. Pierce's Favorite Prescription. It cures the diseases which produce nervousness in women, irregularity, debilitating drains, inflammation, ulceration and female weakness. It tranquilizes the nerves, encourages the appetite, and induces refreshing sleep.

"When I began taking your medicine I was not able to stand on my feet ten minutes at a time," writes Mrs. Hattie Borradaile, of 113 Spring Street, Nashville, Tenn. "Had falling of uterus, and kidney and liver disease and was so weak and nervous I could not keep still. Would take nervous spells and almost die at times. I had several different doctors attending but they could not do me any good. The last one I had said I would never get up again. Told him that I was taking your 'Favorite Prescription' and 'Golden Medical Discovery' and he said, 'Might just as well take that much water each day.' But I thought I would give the medicine a fair trial. Before I had finished the first two bottles I was able to get outside the house and walk around the yard. I kept on taking the medicines and they cured me."

ARE YOU DEAF? ANY HEAD NOISES?

ALL CASES OF
DEAFNESS OR HARD HEARING ARE NOW CURABLE
by our new invention. Only those born deaf are incurable.

HEAD NOISES CEASE IMMEDIATELY.

F. A. WERMAN, OF BALTIMORE, SAYS:

BALTIMORE, Md., March 30, 1901.

Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

About five years ago my right ear began to sing, and this kept on getting worse, until I lost my hearing in this ear entirely.

I underwent a treatment for catarrh, for three months, without any success, consulted a number of physicians, among others, the most eminent ear specialist of this city, who told me that only an operation could help me, and even that only temporarily, that the head noises would then cease, but the hearing in the affected ear would be lost forever.

I then saw your advertisement accidentally in a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the diseased ear has been entirely restored. I thank you heartily and beg to remain Very truly yours,

F. A. WERMAN, 730 S. Broadway, Baltimore, Md.
