IN THE COUNTY COURT OF MORROW COUNTY, State of Oregon.  
In the matter of the estate of William Browning, deceased.  
Notice is hereby given that the undersigned, administrator of the estate of William Browning, deceased, has filed her final account of said estate in the above entitled matter in the court house in Heppner, Morrow County, Oregon, and all persons interested in said estate may file objections to said account on or before said time.

**STOCK AND WOOL NOTES.**  
The Market is Quiet During the Lambing Season.  
The sheep and wool market in Heppner continues to be quiet, and indications are that there will not be much doing for some time, until the lambing season is over, however, sheepmen expect buyers to come in before the season arrives to take the sheep to the mountains, which will be from the middle to the latter part of May.  
Lambing and shearing is now occupying the attention of sheepmen in Morrow county.  
Very few sheep sales are reported.  
A small number of yearling wethers have been sold for \$1.55 per head.  
Mixed lots of yearling have been bringing \$1.85.  
Following wool sales are reported:  
M. S. Corrigal of Butter creek, 70,000 pounds at 8 1/2 cents per pound.  
Herb Bartholomew, 70,000 pounds at 9 cents.  
James and John Carty, 40,000 pounds at 8 cents.  
John and Frank Kilkenny, 40,000 pounds at 7 1/2 cents.  
Doherty and McDavid, 60,000 pounds at 8 1/2 cents.  
Sales of a few smaller lots are reported.  
This wool was all purchased by E. H. Clark for the Pendleton Scouring Mills. Antelope Herald: A large number of horses are being broken here and put in condition for delivery to the buyers for cavalry service, the last week of this month. They bring from \$30 to \$40 per head.  
Condon Times: Reports from many sheep camps in Gilliam county are to the effect that lambing has been a success and flockmasters are adding a large increase to their flocks—some of them nearly 100 per cent. This is good news, as the weather has been extremely cold lately and grass has been rather short. The next thing owners of sheep have to contend with is marketing the wool and the prevalence of scab in so many bands will be inclined to lower the price of that product where it had to be dipped for the disease. Sheepmen in Gilliam county will see to it that scab is kept out of their bands in future.

U. S. Department of Agriculture climate and crop bulletin of the weather Bureau, Oregon section, for the week ending, Monday, April 22, 1902.  
GENERAL SUMMARY.  
Good rains have fallen during the past week in all portions of the state. Rather more rain than is needed has occurred in the western section, but in the eastern section it was welcomed. Notwithstanding the rains there has been considerable sunshine, and up to the last two days of the week the weather was mild and very favorable for advancing the growth of vegetation. On Saturday it turned cooler, and frost was reported.  
The wet weather has retarded spring seeding of oats and wheat in the Willamette valley and to a lesser extent in southern Oregon, but this work is now fairly well advanced and with the advent of a few warm, dry days it will be quickly finished. In eastern Oregon seeding is practically finished and the farmers are busily engaged in plowing. The rains have done great good in the sections of Umatilla county where the wheat was winter-killed, and the reseeded areas are now looking much better than they did a couple of weeks ago. Fall wheat has stood well and is in a healthy and thrifty condition in all sections of the state, except that its color is bad in some poorly drained localities in the Willamette valley. In eastern Oregon the bulk of the wheat crop this year is fall sown, excluding the Grande Ronde valley and about half of Umatilla county, which is spring seeded on summer-fallowed land.  
Grass has made a splendid growth during the week and consequently stock has improved very much, and the flow of milk in the dairy sections has proportionately increased. Clover, alfalfa and timothy although somewhat backward are looking fine.
