Shearing is very late in Grant county this season, due to the late season and shortage of shearing crews says a Canyon City paper. The former cause accounts for the many troubles experienced by local sheepmen. The sheep from the bunch grass and sand country along the Columbia are sheared early in the spring, and are on the choice ranges in our mountains before the local sheep have been shorn of their wool. Just as long as the public ranges of Grant county are crowded with sheep from adjoining counties, local sheepmen will continue to have range trouble.

Impaired Digestion. May not be all that is meant by dyspepsia now, but it will be if neglected. The uneasiness after eating, fits of nervous headache, sourness of the stomach, and disagreeable belching may not be very bad now, but they will be if the stomach is suffered to grow weaker. Dyspepsia is such a miserable disease that the tendency to it should be given early attention. This is completely overcome by Hood's Sarsaparilla which strengthens the whole digestive system.
