Poor Richard Says: 

"The worst wheel of the cart makes the most noise."
We have often heard it said in defence of poor printing that it attracts attention. Attracting attention is only a part of its mission. Printing that will do you good should attract favorable attention.
There are some things which are better overlooked. The kind of commercial printing which a great many merchants are willing to use belong to this class.
You want your printing to attract attention not by its defects but through its merits.
It should be so good, so perfectly suited to its purpose that it will attract attention only through the clean, clear and satisfactory way in which it delivers its message.
This applies just as much to the printing you put upon the head of your letters, statements and things of that kind as it does to the printing used in a pamphlet, booklet, folder, circular or card.
Whatever is printed is printed to be read.
The best printing is none too good for your purpose if your business depends upon the opinion of other people.
If you wish to practice what this sermon preaches, let us see you at our office.

It is said that "livestock with good pedigrees do more to keep the boys on the farm than anything else that can be named." Where good stock is a part of all-round good farming it is just right in the sense that it is placed where it can succeed; otherwise it can lead to no satisfactory result and must be a worry all the way from the start to the point of complete failure. No matter what the kind of stock, the most profit is in keeping it well, always suiting the kind of stock to the prevailing conditions.
