Oppose Grazing Law.

Salem, Or., Jan. 22 -The house com mittee on agriculture met today and decided to make an adverse report on Burleigh's one mile limit sheep grazing bill. The subject has become a live some in many parts of Eastern Oregon and a formidable movement has de celoned against the unrestricted use of the ranges. The small stockmen think wheir interests are jeopardized, and some of the cattlemen are of the common that anything detrimental to the allege and wool industry must be sensicial to them.

The session of the committee today was attended by all the representatives menty-first and twenty-eighth exepresentative districts, by A. M. Kelway. Representative Phelps and A Mc * areer, and by R. F. Hvnd, ex-secretary of the Oregon Wool Growers' Association. All were opposed to the Burleigh measure, which provides "that it shall he unlawful for any persons owning and having charge of any sheep, to herd the Banie, or permit them to be herded on the lands or possessory claims of other persons, or to herd the same or permit them to graze upon unappropriated saids within one mile of the dwelling house of the owner or orners of such lands or possessory claims, or within such lif mile of the boundary lines of such lands or possessory claims."

The measure further provides that sheep, cattle or horses cannot run at large in a county in which the owner does not reside, unless a permit shall be obtained; and the tax thereon shall be 20 cents each for sheep and \$1 per head for horses and cattle.

The sheepmen appear to agree that It is proper to impose a reasonable tax on sheep owned in one county and feeding in another, and a measure carrying out that policy will, it is said, be presented by them.

The Secret of Long Life.

Consists in keeping all the main organs of the body in healthy, regular action, very easily be, and no doubt are, comand in quickly destroying deadly disease germs. Electric Bitters regulate Stommab, Liver and Kidneys, purify the blood and give a splendid appetite. They work sonders in curing Kidney Troubles, Fe--male Complaints, Nervous Diseases, the sanitation of these public con-Constipution, Dyspepsia, and Malaria. Vigorous health and strength always tollaw their use. Only 50c, guaranteed by to prevent undue overcrowding of Bloeum Drug Co.

Oscar Deatly, of Soap Creek, Or., has taken three champion evote killing hounds into Polk county, where the varmints are sery numerous, for the purpose of making a systematic scalp hunt.

a severe cold. She complained of pains different wints. Investigation has in her chest and had a bad cough. I gave her Chamberlain's Cough Remedy according to directions and in two days whe was well and able to go to school. I mave used this remedy in my family for the past seven years and have never knows it to fail," says Jomes Prendergest, merchant, Annato Bay, Jamaica, West I dis Islands. The pains in the rinest indicated an approaching attack of pneumonia, which in this instance was audoubtedly warded off by Champerialo's Cough Remedy. It counteracts any tendency of a cold toward pneumon. Briquettes Made of Peat and the Dust a. Sold by Slocum Drug Co.

DISTRIBUTE DISEASE

Street Cars as Disseminaters of Infectious Maladies.

Vitiated Air and Expectorations Render These Conveyances Fruitful Sources of Contagion-Need of Stringent Rules.

In the larger cities of this country the street car is as potent a factor in the dissemination of communicable diseases as many of those usually entalogued in the standard works of hygiene. In these larger centers of popuation the condition is one of an excolive number of masengers crowded into a limited number of cars. In some cities this continues throughout the entire day, and in all of them during rear platforms literally packed with at all. all classes of our variegated popula-

o their comfort.

gated through the medium of these says the New York Sun. ears, which become infected by the and the bacillus influenzae.

son contract, and the broatline of vitiated air frequently laden with root, branch and seed. contagious exhalations and with dest from dried soutum, are most favorable to the distribution of contarious diseases. Of course, it is only problematical as to the number of smallpox cases which were infected through these conditions during the and move away in search of others. recent epidemic, but it is certain that street-car contact of all classes, almost completely destroyed. Other transmissible diseases can municated 'n the same way.

The solution of this or blem is not easy. Str. of railway componies are not inclined to relieve the present situation without commution. Health officers, however, have authority over vevances. This authority in most municipalities gives sufficient nower cars when such prevention would be for the protection of public health. When necessary, as in times of a general epidemic, such authority should be exercised. Under all circumstances regular disinfection of street cars should be practiced in an efficient manner. In this way the cars can be made biologically clean, and the health of the community better protected. There is just as much occasion for this procedure as there is for the disinfection of Pullman Some time ago my daughter caught cars, now energetically practiced at developed the fact that there is but one city in the country, Philadelphia, where any pretense is made of disinfection of street cars. The Union Traction company of that city Chinfects its cars with carbolic acid. This possibly answers for the killing of bacterial life on the floors and walls of the cars, but does no good for the contaminated places where dust has settled, and which nothing but a gaseous agent would reach.

CHEAP FUEL IN GERMANY.

and Waste of Coal Mines, Generally Ised.

Among the several branches of German industry which deserve the their economy, their recovery or utilization of some raw material which exists unused in this country, or beedge to technical processes, may be reckoned the manufacture of brithe dust and waste of coal mines.

Briquettes form the principal domestic fuel of Berlin and other cities and districts in Germany; they are used for locomotive and other steam firing, and are employed for heating in various processes of manufacture. For all these uses they have three tangible advantages: They are clean and convenient to handle; they light easily and quickly, and burn with a clear, intense flame; they make practically no smoke, and are, withal, the cheapest form of fuel for most pur-

Like most other important German industries, the beignette manufacture is controll d by a syndicate which includes among its members thirty one firms and companies, or i more than nine-tenths of all the producers in the country, and regulates the output and prices for each year. From the official report of the syndicate for 1901, which has recently appeared, it is learned that the total output during last year was 1,566,385 Transvaal mines. The total last year tons, to which is to be added the product of makers outside the syndicate, consumed at works, small retail sales, etc., making a grand total of 1,643,416 tons.

The average selling price in large quantities was \$3.16 a ton.

CARP OUSTING WILD DUCK.

Useless Themselves, They Have Destroyed the Wild Rice Fields in Ontario, Canada,

The singular complaint comes from various parts of northern Ontario that fish are responsible for the disappear- producers in 1902 were Russia, with he morning and evening hours. Dur- ance of certain kinds of game. In loing the period of congests traffic, the calities which were formerly noted for cars are crowded to the limit, every the excellent duck shooting which they seat being counied, and the villes and offered the birds are now not to be had

The ducks, geese and other aquatic tion, says the Interstate Medical Jour- birds were formerly in the babit of frequenting the large fields of wild rice The ventilation of these cars is in- in the lakes and streams of parts of ferior, both an account of inattention Ontario, but now these fields have been to this important matter on the part in many instances, destroyed by the of the builders of this class of rolling German carp, which has found its way stock, and also because the passengers | into these waters. The vegetarian diet differ so widely as to the proper tem- of this detestable fish not only ruins perature and circulation necessary the flavor of its own flesh, but exhausts the food supply of some of the most Tuberculasis is undoubtedly propa- desirable forms of feathered game,

The Ontario inspector of fishpromisenous expectoration indulged eries, who has been in northin by consumptives, notwithstarding ern Ontario for the last few notices of warning. Harnum, of Cleve- weeks, reports that the German land, recently examined 25 specimens carp has not only become dangerof sputum found in street cars (15 ons to other fish, as has been frequentfrom the interiors and ten from the ly claimed, but that in Cook's bay, Lake rear platforms); the tuber de bacillus Simcoe, where there were formerly was present in three instances. Other hundreds of acres of wild rice, not a specimens showed the preumococcus spear of that plant is to be seen to-day. The same is true of the Holland river. These conditions, the person-to-per- where there were at one time 1,500 acres of rice. The carp have eaten it

The almost incredible part of it is that the fish have entirely destroyed the fields in one year. The aquatic birds which visit the locality, finding that all their usual feeding ground have disappeared, cut short their visit The local sportsmen complain, too, but few better opportunities of in- that the carp have attacked the beds fection are offered than through the of wild celery, and that they, too, are

It remains to be seen what the efaquatic vegetation will be upon the game fishes of the locality. The fishry overseer of the district declares that it is a question whether the spawn of the muskallenge can be protected and developed without the rice beds. He does not accuse the carp of eating the eggs of the other fish, but states that they keep the water continually disturbed, and that to their presence in these waters must be attributed the decrease in the number of muskallonge frequenting them for spawning purposes.

Estimates of gold production in 1902 indicate an aggregate output of \$306. 700,000, or slightly more than in 1899, the year that the Boer War practically stopped the enormous production of the was only \$562,650,000 to which the United States contributed \$78,666,000, as against \$87,710,000 contributed to this year's total, and the Transvaal \$5,000, 000, against \$35,000,000 this year. The United Sates still holds first place; Australia again is in second place with \$81,000,000, and the Tranvaal comes third instead of seventh. Probably at the end of this year the Tran-vaal will be restored to the lead, with the United States second. The only other notable \$29,000,000, and Canada, with \$19,000,-

Representative Reed, of Multnomab, has introduced a bill making it a misdemeanor to steal a ride on any car, engine or other vehicle of transportation belonging to a railroad company.

Is the worst kind of poverty. However rich a woman may be, if her health is "poor" she is poor indeed. She has no appetite for food and the choicest dishes cannot tempt her. She turns and tosses through a restless night on a couch which might woo an empress to slumber. She has no strength for household cares, no delight in social pleasure. She sits "perked up in a glistering grief wearing a golden sorrow." She is a wife and mother. But she has no happiness in either relation. She knows her husband's life is set in tune and time to the minor music of her own misery. If her child laughs or cries her nerves quiver with pain.

Ask such a woman if she would like to be well; to be her husband's comrade, her child's playmate. Could there be but one answer?

Such a woman can get well if she will, All her symptoms indicate a diseased condition of the delicate womanly organism. Cure that condition and the woman will be lifted up to the full enjoyment of health. In ninety-eight cases out of every hun-

dred Dr. Pierce's Favorite Prescription will cure womanly diseases, will restore the womanly health. It has cured tens of thousands of women many of whom had been given up by physicians and friends. It is essentially a medicine for woman's ills. It dries enfeebling drains. It heals inflammation and ulceration. It cures female weakness and bearing down pains. It tranquilizes the nerves, restores the appetite and gives refreshing

"Favorite Prescription" differs from almost all other medicines put up for woman's use in that it contains no alcohol and is entirely free from opium, cocaine and all other narcotics. It is in the truest sense of the term a temperance medicine.

A Constant Sufferer.

"I had been a constant sufferer from uterine disease for five years, "writes J. A. Steoris, of Yankee Dam, Clay Co., West Virginia, "and for six
me as previous to taking your medicine I was
nearly of my room. Could not walk or stand,
the was such pain and drawing in left side
aring down weight in region of uterus,
anical with soreness. I suffered constantly with headache, pain in back, shoulders, arms and chest; had palpitation, nervous prostra-tion, emistication, dizzness, ringing in ears; could not sleep, and treathing was so difficult at times I could not lie down. Words fail to de-serve my suferings when I wrote to you for in a short time I received a kind letter on this up me I would be greatly benefacel, is not entirely cured, by the use of Dr. Pierre's Pavorite Prescription. When I had taken one bottle of the Prescription, together with Dr. Pierre's Pleasant Fellers and the local treatment which you advised, I could wilk (with the supa cane, the drawing and pain in side and down cought were not so had, and when ad taken three bottles of the medicine the were regulated I was not so nervous d sleep with and the pain in side and bear over his transhed. I have taken six but and four vists of 'Pellets, is better at this time than it has

grateful thanks for your kind advice and with best wishes."

Sheriff's Sale for Delinquent Taxes.

NOTICE IS HEREBY GIVEN THAT BY VIRthe of a warrant issued out of the County count of the state of Oreion, for the County of Morrow, wherein and whereby I was commanded to collect the demograph taxes charged on the tax roll for the year 1901, as by law directed, and to make levy upon and s in the several parcens or real property, upon which such taxes are respectively levied, or so much thereof as sharr satisfy the amount of taxes so charged, together with interest thereon at the rate of 12 per cent per annum from the 7th day of April, 1902, 10 per cent penalty and according costs; which said warrant is attached to the iax roll for the year 1901.
