#### \$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

#### GOLDEN GATE CITY LEADS.

San Francisco Shows the Largest Percentage of Suicides—Chicago Ranks Third.

The number of people who voluntarily shuffled off this mortal coil in American and other cities during last year has been investigated by some delver in statistics and the following figures indicate the results: San Francisco leads with the largest ratio, 39.1 per 100,000 of population. Next comes another Pacific coast city, Los Angeles, with a ratio of 29.8. The reader has naturally been looking for Chicago, and that city does, in fact, come next with a ratio of 24.0, followed by the neighboring city of Milwaukee, whose ratio is 22.2. New Orleans was the scene of the self-destruction of 21.8 persons per 100,000 of population, and Cincinnati followed close with 21.2. New Haven is next with 20.9, and then comes the borough of Manhattan with 20.0, though greater New York as a whole is well down the list with a ratio of only 13.6. This is less than Rochester, Indianapolis, Philadelphia, Pittsburg, Baltimore, Boston, Detroit, Omaha and Louisville, besides all of those specifically enumerated above. As to the foreign cities, Paris leads the list with a ratio of 42, followed by Berlin 36, Vienna 28 and London 23. There were more suicides in Saxony than in any other country, 31.1 per 100,000. In Denmark the ratio was 25.8, in Austria 21.2, in France 15.7, in the German empire 14.3, and Sweden, Norway, Belgium, Great Britain, Italy, the United States and Spain followed in the order given.

The table referring to American cities is somewhat difficult to explain. Why the city of the golden gate, and California, with its glorious climate, its sunshine, its fruit and its flowers, should show the greatest number of suicides seems a mystery, unless the presence of a large Chinese population explains it. The high suicide rate of Chicago is, perhaps, accounted for by the rush and struggle of that great city and the large foreign element it contains—a foreign element, moreover, which comes mainly from those countries where suicide is most frequent. The same is perhaps true of Milwaukee and of Cincinnati. The high rate at New Orleans may possibly be attributed to its relation to France and the ideas and traditions brought here from Paris, the suicide capital of the world. But New York city casts a cloud over some of these explanations. Here are the large foreign populations, the stress and strain of living and working, the poverty, the excitement. Yet Philadelphia, the sleeping city of the humorous parographers, has a higher ratio of suicides than greater New York. And how is it to be explained that New Haven leads all the other New England cities in the number of suicides? St. Paul and Minneapolis lie side by side, but in Minneapolis the ratio is 11.4 and in St. Paul it is but 6.5. It seems that the conclusions must be that there is no method in suicide madness and that the effort to reduce it to rule is doomed to failure.

#### FASHION'S LATE MANDATES.

What Milady Must Wear If She Would Appear in the Newest Styles.

Shirt waists of fancy velvets, velveteens and corduroys are fashionable. Some are made simply, the only trimming being fancy buttons; others are finished with passementeries, lace and moire silk in bands or pipings, says a fashion authority. These have showy buttons, too.

Robes are tempting in light-weight cloths, silks and stenciled cloth. Some are beautifully embroidered all over or at the bottom of the skirt and front of waist and sleeves. Two-toned cloths are revived for these, and make up prettily when trimmed with some rich passementerie or velvet.

The newest tea gowns are in empire fashion, with accordion plaited skirts beautifully trimmed with lace medallions and insertions. They are finished

with handsome collars of lace or embroidery, lace frills edging the collars. Sleeves are elbow length, finished with several lace ruffles. Light colors prevail for tea gowns and white is much favored.

The fancy for fruit as a decoration has extended to embroideries on dinner and reception gowns. An illustrative gown of black point d'esprit made over white satin was trimmed with embroidery in the form of cherries and their leaves, and had cherry red belt and shoulder straps. Another of pearl gray satin and tulle was embroidered with green grapes. Black grapes were put on a delicate cream lace gown.

On sheer gowns are put hand-work embroidery and lace and winter gowns repeat those of summer in these trimmings. Cord braiding is put on the thinnest gauzes with good results and the silver lace that has been employed so much is combined with white lace. Tiny blossoms are set on dainty fabrics in large rings and scarfs of lace, tulle or satin are threaded through them. Scarfs are also drawn through cloth cut in lattices or circles for trimming cloth or wool gowns.

Flat trimming is standard for fall and winter hats. These are a trifle larger than those worn during sum-

mer, and feathers, breasts, wings and quills are the trimmings. Beaver hats will be fashionable and various tinted velvets are submitted. Hats of silk plush so far are in delicate shades. Black, green, reds, browns and blues are well represented. Blue and green combinations will be numerous and some new fancies in these shades are stunning. Coque feathers are revived in many pretty colorings. Birds are wonderfully tinted, as are breasts. Quills are in black and green combinations. The rolled brim sailor in all shades of felt and beaver will be fashionable for general wear.

Hardly a new skirt is lined—among the handsome ones, that is. All have instead the drop skirt of taffeta. This skirt of taffeta is cut like the outer skirt, exactly and finished with a plaiting or a ruffle with a plaiting along the edge. We say the handsome ones advisedly. When the outside is not of good, firm cloth a lining is necessary to help keep it in shape, and when the lining is of some cheap cotton stuff the wearer certainly would not want it hanging loose. It has one thing to recommend it especially. When it is worn out it may be cast aside. In the case of a worn-out lining made in a skirt one must have the whole thing taken apart to reline it, and this is about as much trouble as making a new skirt. With the drop skirt there's only to buy another. It is to be hoped our stores will keep them ready made.
