Mr. Mitchell intends to keep about four men steady which he thinks will be enough to take care of present needs. A portion of the Willow creek road has not yet been worked since the high water and this road will soon be given attention. Mr. Mitchell is working hard and is giving good service.

Quite a serious accident occurred on the Willow creek road opposite the upper end of the Price Florence place, last Sunday evening.

A party consisting of J. T. Mitchell, M. L. Cantwell, Mrs. Frances Cantwell and baby, Mrs. M. E. Cantwell and Mrs. J. W. Cowins, were driving along the road when the team became frightened at a cow and jumped from the grade, overturning the vehicle with the occupants under it. It was a general mix up and considerable trouble was experienced in getting out of the wreck.

Lee Cantwell received a severe gash on the head, Mrs. Frances Cantwell was badly bruised. Mrs. J. W. Cowins received the greatest injury, two ribs being broken, besides several bad bruises. Mrs. M. E. Cantwell was also badly bruised.

**WILLOW CREEK COAL MINES.**  
**Operations Going on With Renewed Activity.**

Operations at the Willow creek coal mines are going ahead with renewed activity. The coal bunkers with a capacity of 45 tons have been completed and are constructed with a view to quick loading of wagons, this being the only method of transportation at present.

Steel track for coal cars in tunnel No. 5, has been put in and the first actual mining for commercial purposes will be commenced right away. For the present, it is the intention of the company to mine only for the supply of the local demand, owing to inadequate transportation facilities. It will be necessary to freight everything by wagon and team. Heppner's coal supply will soon be coming from the Willow creek basin. The people here are anxious to use this

coal on account of the quality making it desirable. The coal being very hard, is clean and for domestic use will be a leading product.
