The Heppner Gazette

## AN interesting hetter.

Giver His obsertations
R. F. Hynd, who is en route to his o home in Scotland, is furnshing the Giahis observations en route. The followng is his first, deating mainly wit
our own country, but giving ns his ear lier experiences on a big Cunarder R. M. S. Campania, Mid Atlantic, Editor Gazette: July 20, 1904. deck of the Campania, surrounded by a mixed company of all ages and nation alities-some quietly reading in the deck pool," while the mains around in groups discussing all manner $f$ subjecte-I begin the letter I prom sed you, giving a short sketch of ou trip across continent and ocean. Hav the principal incidents will be recorded
We crossed the Snake river at Hunt ington about midnight, and before we
were calied for breakfast had passed the Weiser and Payette valleys, the only farming section of any note along the dithe in Idaho. Aside from a set limpse one gets of the Snake ccasiona tom as the train passes along, nothing can be seen west of Pocatello except a evel conntry covered with sagebrush with the higher range of mountains to the north and east. At Pocatello-sarely fitten minutes, while the Salt Lake and Butte baygage was being transferred nd at 1 o'clock again started eastwari Diamondville coal fields we passed he Uaion Pacific system, and a fev Cumberland mine, from which Hep or some time. Why the O . R. and N mint when so mach coal is said to in is a dillicult problem to soive. Some
tay we may see the light:
hair cars were cut out and the "O man eleepers, bagzage, express a
miles an hour for the Missouri river
ag the right we croseed the back g were speeding along over the prad res of eastern Wyoming. For severa hours we passed over a splendid grazing conntry, supporting at this season Scattering windmills furniehes water for the cattle, prain crops are raised in this section, all stoc

hegits and for over four hu dred mile we passed through as fine a farming sec tion as one could wish to ree. The
greater part of the way we followed the lazy Platte river, and as far as the eye could reach in all directions stretche the vast cornfield Imm nes crops of
hay and some early barley were being hay and some early barley were being harvested, in some cares it stood nearly a high as a harse's back, and the beauti fil dark green color of the leaven, wit the sol in eplendid condition, gave promise of the largest crop that ha
beengrown for years. The numerou swall towns along the railrad, the com fortable, and in many rases, handsom
farmhouses, the beantiful and well kep' roads indicate a very prope ons perple, and I feel it would be
difficuit to anchor settlers from this secdifficult to anchor selters from this sec-
'ion on our Morrow county hills 0 weather and blizzards in winter, thei and hot nights in *a mer, with cinch bugs, potato bugs an beak the monotony. The lightning ro agent has done a profitable business i
this section, for many of the houses ar provided with three, and in some case Perhaps they are needed. We reached Omata at 8 p.m., and road, most of our fe low travelers, a amon them E Y. Judd, of Pendleton, going by rossed the bridge over the Missour ahead of the Northwestern train, and a we pulled into Chicago the followin Northwestern train held up by a gate eeper where the two tracks crossed been signalled first and got the right o ay-a close race over 500 miles track.
At the
At the depot we were met by my ais and her husband and accompanied even miles their home in the suburbs, hrough a Polish settlement, one of the largest in the city, where every name o the business houses eaded with "isky," and where hundreds of dirty urchins i he street reminded one of the slums Europe. Bad President Roosevelt vis riting his "race suicide" article h rould have discovered that if the Amer can people are neglecting their dut ang the line of reproduction the for eigners are supplying the deficiency Many similar foreign settlements exie here every line of business is repre ented and where the nationalities liv nd trade exclusively amorg them-
The weatber was hot and sultry, and then out riding in the afternoon, durios thunder storm and downpour of rain, ng out was struck by lightning, bunsuch a shower of fattings and cansis smoke that the passengers stampeded
$\qquad$ current. It was over in a miante and aboard to escape the drenching rain pushed us to our destunation. Next morning the weatier was cool and
plessant, with a breeze biowing from stay of three days in Clricako. We vist the Board of Trale, where the balls nnd
bears were howling in the vatious pits; the Masonce Temple, where from the
pon men in the street no lerzer than Hies; and Lincoln Park, with its wild animals and miles of frontate on the little street Arabs to visit such a park,
