HARVESTING NEAR HEPPNER.

W. E. Roysse's Heading Outfit Almost Through Season's Work.

W. E. Roysse, in company with a Gazette representative drove out to J. H. Gemmell's place, 2 1-2 miles southwest of Heppner, Monday, to see the operation of Mr. Roysse's big heading outfit.

Mr. Gemmell's field presented a lively appearance. A big header was in operation with three header boxes, together with the necessary drivers and stackers, cook wagon, water wagon, etc, making a good sized crew all busy at work in getting the standing grain ready for the thrasher.

The field in which the header was working contains 200 acres of wheat and 50 acres of barley. The grain is of very good quality and Mr. Gemmell estimates the yield at 20 bushels per acre.

The land is hill land and in some places is very steep. The season has been a good test to show that the hill lands are among the best in the county for wheat growing.

W. E. Roysse who is one of Morrow county's big and successful farmers has been farming the Heppner hills for several years and he is thoroughly convinced that the high lands around Heppner are not excelled in the county.

Almost any kind of land can be handled with a header, but it takes almost a circus performer to stick the machine at times. Mr. Roysse's header bed wagons are fitted with hind axles nine feet in length, while the front axle is the regulation length. Everything is going smoothly and there have been no accidents.

Mr. Roysse is just finishing a run of 700 acres with his heading outfit, cutting about 25 acres a day for which he gets \$1.25 per acre. Mr. Roysse has 400 acres of wheat of his own which he thinks will yield in the neighborhood of 15 bushels to the acre. He will have about 700 acres of summerfallow for this fall's seeding.

The Gazette man certainly enjoyed a fine dinner at the cook wagon as well as the hospitality of Mr. Roysse's jolly crew.

If you are hunting Vacant Government land, J. T. Williamson, La Grande, Oregon makes maps of any township in the La Grande Land District showing the condition of the township at the date made for \$1 each, as shown by the records of the land office. Land office practice a specialty. June 7-tf.
