College Basketball Rules. The president of the Intercollegiate Basketball association has appointed a committee which is to meet at the University of Pennsylvania May 26 and 27 to revise the rules of the game.

In conjunction with the rules committee meeting there will be a general convention of representatives from all of the colleges in the country possessing basketball teams for the purpose of organization.

This meeting will also be held at the University of Pennsylvania and will occur at the same time as the intercollegiate championship track and field games. Among the changes in the rules which will be agitated are the following:

Lengthening of the game by calling for twenty-five minute halves instead of the present two twenty-minute periods.

Change in the size of the playing courts, raising the minimum size from 2,400 square feet to 3,000.

Elimination of the rules which give the referee power of awarding a point when a player is fouled while shooting for goal.

Changes in the method of scoring from foul, which will be brought about in one of two ways—viz., either lengthening the foul thrower's restraining mark from fifteen to twenty feet or else altering the ratio of the value of the field and foul goals, making field goals count three points and foul goals as one.

Incongruous.

A clerical correspondent of one of the London church papers relates that a certain prelate had great difficulty in suppressing his laughter at the consecration of a church the other day owing to the device on one of the school banners which were carried in the procession before the service.

Morrow county produces more wealth per capita than any other county in the state of Oregon. On territory within county lines is 75 miles in length by 3 miles in width, large enough for a state, but with not enough population for a good sized country village.

Every year we grow about 1,000,000 bushels of wheat. This is worth about \$700,000. We have about 235,000 head of sheep worth about \$562,000, after shearing while the wool from these sheep will sell for \$360,000.

These are the main items in the wealth producers. It don't take much figuring when you look at these figures to come to the conclusion that Morrow county people make some money.

Morrow county's climate is pleasant and healthful. Morrow county people have money. Here in the town of Heppner we have two banks. The First National in published statements shows deposits running from half a million dollars up.

But look here, almost half the population of Morrow county reside in the towns. This leaves only between 3,000 and 4,000 people in a territory 75 miles in length by 35 miles in width.

Ten or twelve years ago land in Morrow county went begging at from \$100 to \$250 for a quarter section.

Five years ago this land had looked up to \$600 and \$700 per acre. Today this land is worth \$15 per acre with a few of the choicest lots some times bringing \$20 per acre.

Over in the adjoining county of Umatilla wheat lands today are worth from \$50 to \$75 an acre. On the other side of us is Sherman county with wheat lands selling from \$25 up. Here we are between with just as good land at \$15 per acre.

Jupiter and Juno had a row, and Vulcan sided with his mother against the old gentleman, who promptly kicked him out of heaven. He fell for a whole day and lighted on the island of Lemnos, broke his leg and received as severe a shaking up as though he had tumbled down an elevator shaft. Esculapides set his leg, but having only just received a diploma did a poor job, and for a long time Vulcan went on a crutch.
