BREVITIES

THE HALL OF FAME.

William R. Taylor, governor of Wisconsin from 1874 to 1876, has been admitted to the Old People's home, near Madison.

Local Curzon, former viceroy of India, has declined all offers to stand as a parliamentary candidate for the city of London.

King Edward is turning his attention to beautifying Windsor park, which since the death of the prince consort in 1861 has been sadly neglected.

Kubelk is accident insured for \$100,000; Paderewski holds a policy for \$50,000; Lillian Nordica has the same amount, and Anna Held holds \$103,000 worth.

Sir Alfred Charles Harmsworth, proprietor of the London Daily Mail and other English newspapers; Sir Michael Hicks-Beach, former chancellor of the exchequer, and Baron Tredgar have been made viscounts.

Phillip Brushart of Burlington, Mich., is nearly 101 years old, but is astonishingly spry. On his last birthday he turned a handspring for some friends and proposes to duplicate the feat on the next similar occasion.

Aoki, the first Japanese ambassador to Washington, will probably bring with him to this country his wife, who is a German lady. He was educated in Germany and was sent to that country

USEFULNESS OF SHARKS.

A Word of Praise For the Scavengers of the Ocean.

The shark is undoubtedly a "dog with a bad name." He is called opprobriously the "tiger of the seas" or the "sailor's foe" or any other scurrilous name which happens to be handy. Much mud is thrown at him, and as he seldom finds a defender most of it sticks. Hard lines this! Because in reality this blue water bogey is a humble and useful public servant, who performs uncomplainingly the duties connected with the sanitation of the seas.

The shark is the common scavenger and general undertaker of the ocean. He is not and, for reasons connected with his very moderate speed limit, never can be primarily a fish of prey. Open any captured shark and you will find clear proof that this is so. A few tangled bits of rope yarn, a battered corned beef tin, a corked bottle containing an insulting message to the finder (thrown overboard by some nautical wag) or a sailor's cap which has been lost in a gale, all tend to show that the shark is a fish of businesslike habits, with a keen eye to any chance windfalls which may come in his way. But the more digestible contents of his stomach, consisting mainly of carrion of every kind, all give the clearest of factory evidence that the original owners of them were not alive—in fact, were very much dead—when this marine sanitary inspector came along and, condemning them as unpalatable, removed them into his own internal refuse bin.

A large accumulation of carefully collected evidence on this point proves conclusively that there are, as a matter of fact, only two articles of his ordinary menu which the shark is able to capture alive—namely, an occasional unwary sea fowl which he may happen to surprise asleep on the surface of the water, and the ugly, octopuslike squid, whose limited powers of locomotion give a chance to our hungry four knuck prowl.

The shark, then, so far from being the gore dyed pirate which the novelist paints him, is a mere hardworking, commonplace drudge, and as such deserves, if not kindness, at any rate, toleration.—Pearson's Magazine.

Why Don't Home-seekers Come To Morrow County?

Morrow county produces more wealth per capita than any other county in the state of Oregon. It is the only county in the state which is 75 miles in length by 3 miles in width, large enough for a state, but with not enough population for a good sized county village. Only 5000 people in the county.

Every year we grow about 1,000,000 bushels of wheat. This is worth about \$700,000.

We have about 225,000 head of sheep worth about \$562,000, after shearing while the wool is on them. Then there are horses and cattle worth at least a million more.

These are the main items in the wealth producers.

It don't take much figuring when you look at these figures to come to the conclusion that Morrow county people make some money. We have the soil, the climate and the goods to make good.

Morrow county's climate is pleasant and healthful.

Morrow county people are prosperous. Morrow county people have money. Here in the town of Heppner we have two banks. The First National in published statements shows deposits running from half a million dollars up. Both banks have a big business. Heppner can show the largest bank deposits of any town of its size in the Northwest, and it should be remembered that Lexington, nine miles away, and Ione, 18 miles from Heppner both have banks doing a good business. This looks like Morrow county people have money.

But look here, almost half the population of Morrow county reside in the towns. This leaves only between 3,000 and 4,000 people in a territory 75 miles in length by 3 miles in width. Don't you think there is room for more people.

Ten or twelve years ago land in Morrow county went begging at from \$100 to \$250 for a quarter section.

Five years ago this land had looked up to \$6.00 and \$7.00 per acre. Today this land is worth \$15 per acre with a few of the choicest lots some times bringing \$20 per acre. Now the old timers are wondering why they did not take advantage of this cheap land. They could have made a barrel of money.

Over in the adjoining county of Umatilla wheat lands today are worth from \$50 to \$75 an acre. On the other side of us is Sherman county with wheat lands selling from \$25 up. Here we are between with just as good land at \$15 per acre. Our lands are sure to go up in price. In a few years the people here will be again wondering why they did not buy some of this \$15 land. The proposition is the same now as it was a few years ago, but it takes more money. Last year and year before a number of good farmers bought wheat lands and paid for it with the first crop.

Come to Morrow county and investigate this land business. Following are a few samples of what we have for sale:

No 1—320 acres, 13 miles south of Ione, 220 acres in cultivation and is in crop. One third of crop delivered in Ione goes with place. All fenced with 2 wires. Price \$4,500. \$2,500 cash, balance in 2 years, 8 per cent.

No 2—800 acres, 12 miles south of Ione, 500 acres in cultivation 285 acres in grain, will summer fallow balance. Good well water, fair buildings and one mile from school. Price including crop and summer fallow, \$12,500. \$3,000 cash, \$2,000 after harvest, balance in one half crop payments at 8 per cent.

No 3—640 acres, 9 miles south of Ione, 450 acres in cultivation, 100 more can be plowed, 155 acres in wheat. Fair buildings, and all fenced with 2 wires. Price including crop, \$10,500. \$3,500 cash, small payment after harvest, balance to suit purchaser.

No 4—430 acres, 1 1/2 miles from Lexington, all in cultivation but 5 acres, running water, all fenced. Price per acre \$20.00. One half cash, balance on easy terms.

Vulcan, the god of ancient blacksmiths and metal workers, was lame in consequence of a pretty hard fall he had in his early days. Jupiter and Juno had a row, and Vulcan sided with his mother against the old gentleman, who promptly kicked him out of heaven. He fell for a whole day and lighted on the island of Lemnos, broke his leg and received as severe a shaking up as though he had tumbled down an elevator shaft. Esculaputs set his leg, but having only just received a diploma did a poor job, and for a long time Vulcan went on a crutch.
