HOW SHE KEEPS BEAUTIFUL.

The Mystery Solved.

Like the flowers that bloom in the spring the young girl just budding into womanhood is an inspiring sight and she is usually beautiful if she is perfectly healthy. She stays beautiful just so long as her health and constitution remain good. Let her be nervous, have backache, sleepless nights, and how soon does it take for wrinkles, crow's feet and dark circles to appear in the face? Her cheeks were rosy until she began to suffer from woman's weaknesses and the constantly recurring pains and drains brought her quickly from the beautiful age to the premature middle age. It was not meant for women to suffer so—it is due to our unnatural, but civilized methods of living, and to the fact that so many neglect those small ills which soon lead up to larger ones. Nothing so drags a woman down as those constantly recurring periods when she suffers more and more from a chronic condition that can be easily cured. No woman should take an alcoholic compound for that will disturb digestion, and the food is quickly compacted and becomes hard and tough in contact with alcohol, rendering the food indigestible. She must go to Nature for a cure. The native Indians of early times were far from wrong when they called a marvelously effective medicinal plant "Squaw root"—what the physicians of our day called *Canophyllum* or *Blue Cohosh*. This and *Black Cohosh*, *Golden Seal*, *Lady's Slipper*, and *Unicorn* root, are important ingredients of a wonderfully successful remedy in modern times, namely, Dr. Pierce's Favorite Prescription. Having made a specialty of the diseases of women in the early sixties Dr. Pierce soon found that a glyceric extract of these roots with *Hydrastis* or *Golden Seal* and *Lady's Slipper* root, combined in just the right proportions, made the very best tonic and cure for the distressing complaints of women. Where women suffered from backache, weakness, nervousness and lack of sleep, it was usually due to functional trouble, therefore this prescription directed at the cause cured 98 per cent. of such cases. That is why Dr. Pierce soon put it up in a form easily to be procured all over the United States. Aching from head to foot—that is the condition that afflicts some women at stated periods—backache, dizziness, and pains almost unbearable. An honest and a safe remedy which no woman can afford to lose the opportunity of trying for the cure of these distressing complaints which weaken a woman's vitality is Dr. Pierce's Favorite Prescription. Dr. Pierce not only assures you that his "Favorite Prescription" is honestly made, but he lets you know just what it contains.

The best of medical authorities recommend and extol the virtues of the above ingredients in "Favorite Prescription." Thus F. Ellingwood, M. D., Professor of Materia Medica, Bennett Medical College, Chicago, says of *Golden Seal*: "It is an important remedy in disorders of the womb. In all catarrhal conditions." Of *Lady's Slipper* root he says: "Exercises special influence upon nervous conditions depending upon disorders of the female organs; relieves pain, etc." Prof. John King in the *AMERICAN DISPENSARY*, says of *Black Cohosh* root: "This is a very active, powerful and useful remedy." "Plays a very important part in diseases of women; in the painful conditions incident to womanhood. In dysmenorrhea it is surpassed by no other drug, being of greatest utility in irritative and congestive conditions." "Its action is slow, but its effects are permanent." "For headache, whether congestive or from neuralgia or dysmenorrhea it is promptly curative." Dr. John Effe, of Saugatuck, Conn., Editor of the *Department of Therapeutics* in *THE ELECTRIC REVIEW* says of *Unicorn* root, *Helonias*, *Hydrastis*, one of the chief ingredients of Dr. Pierce's Favorite Prescription: "A remedy which invariably acts as a uterine (womb) invigorator and always favors a condition which makes for normal activity of the entire reproductive system, cannot fail to be of great usefulness and of the utmost importance to the general practice of medicine." In *Helonias* we have a medication which more fully answers the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent."

ODD SHOE FACTS.

Greek shoes were peculiar in reaching to the middle of the legs. The present fashion of shoes was introduced into England in 1633. In the ninth and tenth centuries the greatest princes of Europe wore wooden shoes. Shoes among the Jews were made of leather, linen, rush or wood; soldiers' shoes were sometimes made of brass or iron. In the reign of Richard II. shoes were of such absurd length as to require to be supported by being tied to the knees with chains, sometimes of gold or silver. In the reign of William Rufus of England in the eleventh century a great "dude," Robert the Horned, used shoes with sharp points stuffed with tow and twisted like rams' horns. The Romans made use of two kinds of shoes—the *solen*, or sandal, which covered the sole of the foot and was worn at home, and the *calceus*, which covered the whole foot and was worn abroad.

Victory and After.

Many a man in a moment of fine enthusiasm applauds Patrick Henry's "Give me liberty or give me death." It is a proper sentiment to entertain, but not easy to live up to. Most of us feel more like the Pennsylvania Dutchman who told his wife to write an appropriate inscription on his knapsack, which she was packing on the eve of his departure to join Washington's army in the Revolution. The enthusiastic woman, dreaming of her hero coming home a general, at least, wrote in good, round letters, "Victory or Death." In a few moments her husband caught sight of it. "No goot! No goot!" he exclaimed in great excitement. "Take dat off quick! Put on goot words, 'Victory, oder come back again.'"—*Youth's Companion*.

HARRIMAN IS AN OPTIMIST.

Says Now is the Time To Invest in Securities.

New York, Oct. 27.—"This is the time for the man with a little money to invest it in good securities. The opportunity is fleeting and I doubt if it will ever knock at his door again."

So said Edward H. Harriman this evening to a reporter who asked him to express an opinion on the financial situation and the outlook.

"It would be selfish of me," said the financier, "to remain silent at this time, if any word from me would tend to aid in clearing up present conditions and in helping the anxious depositors in the banks and trust companies to see things in the light in which they should be seen. I think the situation is better now than it has been at any moment of the last two weeks.

"The importation of gold is going to relieve the money stringency materially, but I think that the Treasury ought to deposit more gold in the banks in order to facilitate the importation which has been planned. The securities necessary to safeguard Treasury deposits are in existence and upon their presentation the Government should act immediately. While the gold is on the other side and in transit it is impossible for shippers to sell their bills here. Consequently Treasury deposits would fill in and enable the shippers to realize on their good paper credits.

"The demands of the manufacturing and commercial elements are going to shrink shortly, and in my opinion, before the next 60 or 90 days, money will be easier than for years. Those who have been withdrawing their deposits from the banks and trusts will then be as eager to get it back as they have been to take it out.

"Let me tell you again that this is the time for a man with a little money to invest it in good securities. The opportunity is fleeting, and I doubt if it will ever knock at his door again. Good securities have never been so low. The man and woman with savings of a few hundred dollars had such a chance to better themselves of use their mite to the advantage which now exists.

"My reason for saying this is based on the underlying conditions. Everything is sound because of our having had such a surplus of crops, and this year this is true, not so much in quantity, as in value.

"I am an optimistic. The tide of recent disturbances has begun to drop. All that is needed to hasten the descent is more gold, and that to be used principally in the scheme of buying shippers' bills and thus enabling the movement of the idle grain and cotton crop."

The Youth's Companion in 1908.

The Youth's Companion announces among the attractions of its 52 issues in 1908

250 GOOD STORIES
—Serial Stories, Stories of Character, Adventure and Heroism by writers whose fame is now growing, and those now famous who won their first spurs in *The Companion's* columns.

CHECK ON EMIGRATION.

Japanese Proposes to Restrict Number of Laborers.

Tokio, Oct. 27.—A delegate from the Japanese residents of San Francisco interviewed Foreign Minister Hayashi today and fully explained conditions in that city relative to the prejudice existing against Japanese laborers. He requested on behalf of his country that the foreign Office permit the entry of 100 honest emigrants monthly through Seattle and San Francisco.

Minister Hayashi replied that at present it was advisable to limit emigration to 100. He further assured the delegate that everything will be done to protect Japanese in this, and at the same time emphasized the importance of stopping anything calculated to injure the traditional friendship of both countries. The Government would hereafter, he said, supervise the kind of emigrants allowed to go out. When questioned if measures had been taken to secure the right of naturalization of Japanese, Minister Hayashi replied that as a Minister of his Majesty's Government, he will never encourage the alienating of his subjects, but will insist on securing for Japanese rights equal to those granted subjects of other powers.

Minister Hapashi continuing, said that he hoped that after the return of M. Ishih, the Commissioner sent to America to investigate the subjects and the receipt of his report definite steps would be taken to find a solution in an amicable and satisfactory manner.

It has been proven that good first-class, sweet-flavored, full-kernel walnuts can be grown around Hubbard.

On account of the low water in the Rogue, the intake of salmon at the new fishery on lower Rogue, 12 miles below Grants Pass, and at the Illinois river hatchery has practically been a failure.

increase in the amount of cultivated land. Timbered lands of the Weyerhaeuser Company and the Southern Pacific Company to \$12 since 1902.

CLOTHES.

How to Select a Suit or Overcoat and Be Sure to Get the Best.

Everything good we buy nowadays has to have some kind of a stamp or label on it, backed by the reputation and guarantee of the maker. Otherwise one can never know whether the article is what it pretends to be or not.

This is more particularly true of clothes almost anything else. And unless a young man goes to a dealer who handles guaranteed clothes, the product of some manufacturer of high reputation like Ederheimer, Stein & Co., Chicago, he cannot be sure of getting garments with the right style, fit or wearing quality.

The Ederheimer-Stein label is the best known mark of superior clothing. The way this firm makes its goods puts more value in its guarantee than is to be found in most names on clothing. Before the Ederheimer-Stein label goes into a garment, the patterns are carefully selected, goods examined and shrunk, cut by experts and many steps taken to secure perfection in the making, particularly between the lining and outside, which you cannot see, but which is the work that produces permanent good appearance and durability.

So for these reasons it is the safest way to buy clothing by looking for the label of the manufacturer; and it's well to settle on the Ederheimer-Stein label if you want the best.

The Italian government has sent \$20,000 to relieve the earthquake sufferers in southern Italy. The pope has sent money and ordered churches thrown open to care for the destitute.

Crops throughout Scotland have suffered damage within the last fortnight by excessive rains. The loss is estimated at \$15,000,000. America will have to supply the deficiency.

The Brazilian government has approved a project to destroy the coffee crop of 1908 and paying for it in bonds of the nation, to save losses to planters resulting from excessive production.

Paper Company, the Oregon Water Power & Railway Company, and the Oregon & California Railroad Company were assessed five years ago at \$672,222 this year their valuation is given at \$3,437,745, not including the lands of the Portland General Electric Company, which are assessed at \$66,030, or the lands of the Oregon Water Power & Railway Company, assessed at \$63,315, making a total of \$67,420 for the latter corporation, and \$683,380 for the Portland General.

Five years ago the assessed valuation of the property of Clackamas County was \$4,526,000, and the following year everything was doubled, but since that time there has been no increase in farm values, save where there has been an
