**Hard to Reach.**  
The numerous "help" who have "had had good characters but lost them" are no worse off than the domestic mentioned in Illustrated Bits, whose search for employment was hindered by an untoward circumstance. Said the master of the house to an applicant: "Can't you find any work at all?" "Plenty, sir; but everybody wants references from me last employer." "Can't you get them?" "No, sir. He's been dead twenty-eight years."

Teacher—Indeed? Where is it the rest of the time?  
Shaggy-haired Pupil—In it.

Until recently the most convenient way of getting from England to Japan was by way of Vancouver, a journey of twenty-four days. This time has been cut down to seventeen days by way of Russia. It is expected to still further cut this time when the Russian government lays a double track across the country.

**His Platform as Amended.**  
"My platform," shouted the orator, bringing his fist down with a resounding thwack on the desk before him, "is, 'Leave well enough alone!'"  
"Beg pardon," whispered the chairman of the meeting, an eminent Boston citizen, pulling his coat tails tight. "Let it enough alone" is the preferable form."

**Trades that Kill.**  
One of the most dangerous of trades according to the Pilgrim, "is the covering of toy animals with skin, chamol leather being used, for instance, for the elephants, calfskin for the horse and goatskin for the camels. This covering must of course fit without a wrinkle to look natural, so the wooden model is first dipped into glue, then sprinkled with chalk dust; then the skin is put on. The chalk is so fine that it fills the air and is drawn into the throat and lungs. A year of this sort of work often results in death. Another very injurious toy is the rubber balloon. The fumes and solvents used in reducing sheet rubber to the necessary thinness while retaining its strength and the dyeing of the brilliant yellows, greens and purple are most of them poisonous.

## ADVICE TO VICTIMS

Tells Readers How to Promptly Cure Rheumatism at Home.

Directions to Mix a Simple Preparation and the Dose to Take—Overcomes Kidney and Bladder Trouble Promptly.

There is so much Rheumatism everywhere that the following advice by an eminent authority, who writes for readers of a large Eastern daily paper, will be highly appreciated by those who suffer:  
Get from any good pharmacy one-half ounce Fluid Extract Dandelion, one ounce Compound Karyon, three ounces Compound Syrup Sarsaparilla. Shake these well in a bottle and take a teaspoonful doses after each meal and at bedtime; also drink plenty of good water.

It is claimed that there few victims of this dread and torturous disease who will fail to find ready relief in this simple home-made mixture, and in most cases a permanent cure is the result.

This simple recipe is said to strengthen and cleanse the eliminative tissues of the Kidneys so that they can filter and strain from the blood and system the poisons, acids and waste matter, which cause not only Rheumatism, but numerous other diseases. Every man or woman here who feels that their kidneys are not healthy and active, or who suffers from any urinary trouble whatever, should not hesitate to make up this mixture, as it is certain to do much good, and may save you from much misery and suffering after while.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the cause of the disease, and giving it a permanent strength by building up the constitution and assisting nature in doing its work. The pro prietors have so much faith in curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

## SINKS AND DRAINS A FREQUENT CAUSE OF TYPHOID.

Purify These and You Will Be Safe From Contagion.

DISINFECTING THE ONLY PREVENTIVE!

BORAX, A SIMPLE, SAFE AND SURE METHOD!

How to keep our homes clean, sweet and free from germ influences is a question.

While there is no occasion for alarm, it is all ways well to be forearmed on the theory that "An Ounce of Prevention is Better Than a Pound of Cure," and no ounce of prevention has yet been discovered that is more simple, more direct and more effective, yet harmless to the human system, than is Borax.  
Borax has been known and used for generations as a purifier and preventive against epidemic influences originating from uncleanly conditions resulting from unsanitary sinks and drains, and when used as a hot solution in the proportion of two table-spoons to a gallon of hot water flushed through the offending location, removes every trace of disease germs and renders the pipes clean and wholesome.  
Borax in addition to its hygienic qualities is a household necessity, and can be used for numerous domestic purposes. It softens the water, makes linen dazzling white, will cleanse every article in the kitchen or dining room and make it bright, will prevent muds, soften and whiten the skin, remove dandruff and cleanse the scalp, and for cleansing and sterilizing baby's milk bottle and nipple has no equal.  
Borax, unlike every other cleanser and disinfectant, is absolutely harmless to the system and is so simple, economical, and can be purchased at any druggist or grocer.

A dainty book in colors, called the "Jingle-Book," will be sent free to any Mother sending name and address of her baby and 10c for two one-poned cartoons of "20-Mule-Team" Borax, with 5c in stamps. Address Pacific Coast Borax Co., New York.

## EARLY DAY PLANK ROAD.

When the Railroads Came This Missouri Highway Was Abandoned.

"This talk about a highway across the State recalls to mind a similar enterprise prosecuted in the interior of the State in the steamboat days," says the Kansas City Star. "It was a twenty-five-mile plank highway between Glasgow and Huntsville," recently remarked Milton C. Tracy of Macon, Mo., whose father was interested in the road and who used to live in Huntsville.

"The road between Huntsville and Glasgow was a succession of clay hills the greater part of the way and in muddy weather the Christian religion made scant headway in those parts. We didn't know it then, but we do now, that those anathematized red hills served to develop the largest and strongest mules in the world and their big-boned descendants are now moving more merchandise than the steam cars."

"Glasgow was the distributing point for up-the-country merchandise. A dozen hack lines run out from there, the main one of which journeyed to Huntsville. The traffic over those molasses candy hills became so great and was attended by so many difficulties that something had to be done. Various kinds of road material were discussed and timber decided upon because it was plentiful and most of the pioneers were skilled in its use. The hills were cut through and the bottoms raised so the roadway was fairly level. Oak plank, twenty feet long, two inches thick and eighteen inches wide were nailed on heavy stringers, laid close together. There were five tollgates, with a tariff rate of a cent a head for stock, 5 cents for a man on horseback and 10 cents if he traveled in a vehicle. A footman paid the same as other animals—1 cent.

"There was a keeper at each tollgate, and his job with the road company, together with a cottage and garden donated for his use, made him a fair living. His rake-off on the tolls was 20 per cent.

"Work on the plank road was begun in April, 1853, and the last spike was driven in October, 1854. It was a gigantic enterprise for that day and the people thought it solved the transportation problem for all time. They didn't dream that within four or five years steam engines would be carting around in these parts and that the bulk of business would sweep by regardless of the river.

"At Huntsville the arrival of the first coach on the new road was made a general holiday by official proclamation. The schools were dismissed and but little of anything was done until the mail coach got in. I was among the crowd of youngsters that gathered around in admiration too deep for words.

"The Glasgow and Huntsville Road Company was a duly incorporated concern and had its officers just like a railroad company. William Smith, who is yet living at Moberly, ran the stage line. A coach left Glasgow and Huntsville about the same time each morning, furnishing daily mail each way. Anell Bros. operated large freight vans and did a healthy business. The late W. R. (Bob) Samuel of Huntsville was secretary for the road, an important position which paid quite well during the days of the road's activity.

Roanoke, in Howard county, was the biggest town between the terminals. It grew up into quite a place during the plank road's prosperity and many stores were operated there. But by and by the railroads came, the old road was torn up for firewood and Roanoke was abandoned far back in the country, swelling a long list of once good towns that have become lost or forgotten."

**Flight of the Butterflies.**  
One of the most beautiful sights in the world is the annual migration of butterflies across the Isthmus of Panama. Where they come from or whither they go no one knows, and though many distinguished naturalists have attempted to solve the problem it is still as strange a mystery as it was to the first European traveler who observed it. Toward the end of June a few scattered specimens are discovered flitting out to sea, and as the days go by the number increases until about July 14 or 15 the sky is occasionally almost obscured by myriads of these frail insects.

**What Did He See?**  
The professor of English in one of our Western colleges was noted for being very absent-minded. It was his custom to call the roll each morning before the lecture. One morning, after calling a name to which there was no response, he looked up, and, peering over his spectacles, he asked, sharply: "Who is the absent boy in the vacant chair I see before me?"

"Hully mackerel!" exclaimed the freckled lad who was peering over the rail of the drawbridge. "Just look how yer brother Pety can swim. Why, he can go like a canoe."  
"Yep," replied the other lad, solemnly, "and he reminds me of a canoe."  
"Cause he can glide so good?"  
"Naw, 'cause he is going to get paddled when he gets home."

**Never Still.**  
"Lucy," called Mr. Harker, from the front porch, "where is that baby? Just now he was in the dining room, then I saw him in the parlor and now he has vanished again."  
"There he is out on the front steps," replied Mrs. Harker with a smile.  
"Oh, George, isn't he a picture?"  
"Hm! Yes, a regular moving picture."

## If Washington Were There.

Two prominent society women of Washington were seated in the gallery reserved for the families of Congressmen.

"What a grand body of men!" exclaimed the younger of the two enthusiastically.  
"Do you think so?" asked the other demurely.

"Why, of course I do. See how alert and businesslike they are. I am sure if George Washington could come back to Congress he would be proud of such a dazzling spectacle."  
"I fear, dear," remarked the elder of the two seriously, "that if George Washington were to come back and see Congress he would lose no time in delivering another farewell address."—Lippincott's.

## RHEUMATISM CAN NOT BE RUBBED AWAY

It is perfectly natural to rub the spot that hurts, and when the muscles, nerves, joints and bones are throbbing and twitching with the pains of Rheumatism the sufferer is apt to turn to the liniment bottle, or some other external application, in an effort to get relief from the disease, by producing counter-irritation on the flesh. Such treatment will quiet the pain temporarily, but can have no direct curative effect on the real disease because it does not reach the blood, where the cause is located. Rheumatism is more than skin deep—it is rooted and grounded in the blood and can only be reached by constitutional treatment—IT CANNOT BE RUBBED AWAY. Rheumatism is due to an excess of uric acid in the blood, brought about by the accumulation in the system of refuse matter which the natural avenues of bodily waste, the Bowels and Kidneys, have failed to carry off. This refuse matter, coming in contact with the different acids of the body, forms uric acid which is absorbed into the blood and distributed to all parts of the body, and Rheumatism gets possession of the system. The aches and pains are only symptoms, and though they may be scattered or relieved for a time by surface treatment, they will reappear at the first exposure to cold or dampness, or after an attack of indigestion or other irregularity. Rheumatism can never be permanently cured while the circulation remains saturated with irritating, pain-producing uric acid poison. The disease will shift from muscle to muscle or joint to joint, settling on the nerves, causing inflammation and swelling and such terrible pains that the nervous system is often shattered, the health undermined, and perhaps the patient becomes deformed and crippled for life. S. S. S. thoroughly cleanses the blood and renovates the circulation by neutralizing the acids and expelling all foreign matter from the system. It warms and invigorates the blood so that instead of a weak, sour stream, constantly depositing acid and corrosive matter in the muscles, nerves, joints and bones, the body is fed and nourished by rich, health-sustaining blood which completely and permanently cures Rheumatism. S. S. S. is composed of both purifying and tonic properties—just what is needed in every case of Rheumatism. It contains no potash, alkali or other mineral ingredient, but is made entirely of purifying, healing extracts and juices of roots, herbs and barks. If you are suffering from Rheumatism do not waste valuable time trying to rub a blood disease away, but begin the use of S. S. S. and write us about your case and our physicians will give you any information or advice desired free of charge and will send our special treatise on Rheumatism.
